I. L. Coulter—Asst. Comptroller.

A. O. Wolf—Asst. Secretary and Asst. Treasurer with respect to the affairs of Hamilton Beach Co. Div., and Asst. General Manager of Hamilton Beach Co. Div.

J. B. Goss—Asst. Secretary.

H. Merriman—Asst. Secretary.

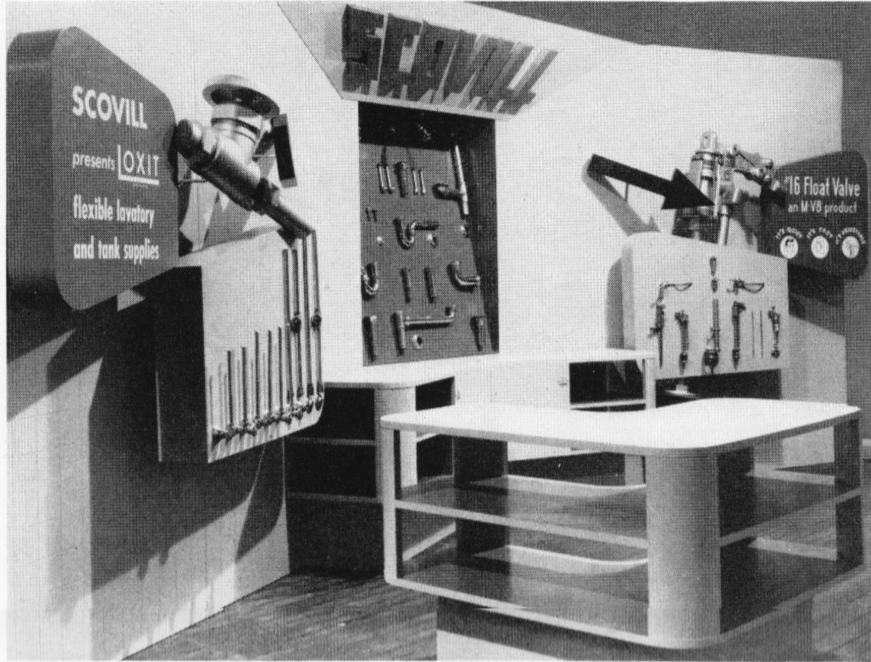

L. Snyder—Asst. Secretary with respect to the affairs of Oakville Co. Div.

R. C. Flood—Asst. Secretary with respect to the affairs of A. Schrader's Son Div.

J. J. Hoben—Works Manager, Mills Division.

F. E. George—Auditor.

## Waterville Booth at Home Comfort Show

One of the exhibits at the 1951 Home Comfort Exposition to be held soon at Navy Pier in Chicago will be this attractive Scovill display featuring Waterville Division's M-VB #16 Float Valve and Loxit line of supply pipes.

The National Association of Master Plumbers will sponsor the 1951 Home Comfort Exposition at their 69th annual convention at Navy Pier in Chicago on May 26-31.

Progressive plumbing and heating contractor-retailers, many of whom are engaged in merchandising the industry's products and related appliances, will attend the convention.

Wholesalers will also be there to see displayed products and to discuss better methods of marketing them.

On hand at the Exposition from the Waterville Division will be A. H. Goepel, Assistant General Manager, and members of the Plumbing Sales organization. George Selden will represent the Advertising Department.

## Half Free--Half Slave

We all know that the peoples of Russia are slaves. Their master is the police force of the state. They can have no initiative. Their once great scholars — musicians and scientists abjectly accept the dictates of the state — or go to Siberia. Anyone who does not accept the rulings of the state is spirited away in the night — to death or worse. That life is what awaits those who exist in a police state.

But what of those who live in those states that are on their way to complete socialism? Let us consider the plight of the English people. England was once the leading nation of the world. It was the bastion of private enterprise. And then, after the terrors of World War II its people listened to the Socialist politicians. Five years ago war-weary England gave control of their nation to the do-gooders — to those who promised them the most for nothing.

And what now? Well — the Bank of England is nationalized — so are the railroads and motor transport industry — the coal mines and the electric power industry — medicine — and now the steel industry.

With so much of the vital sinews of England's economy publicly owned and controlled, the people should be quite well off. They should be reaping the reward for throwing away the obligation to care for themselves. They should be receiving plenty for nothing. But here's what they get — 4 ounces of beefsteak per person per week — 2 ounces of cheese — 2 eggs per person per week. Not enough coal to adequately warm their homes — and they are sitting on one of the largest coal deposits known — electric power is rationed. The railroads are losing money. Wealth has been taxed out of existence.

England is on the way to complete socialism. Its people brought it on themselves. They accepted the promises of more and more for nothing. It is not likely they will be able to free themselves from the octopus of state control. They cannot remain half free — half slave. Their future is not bright.

With this example before us can we make the same mistake?

*Alan C. Curtiss*  
Vice-President

## L. J. Ross Elected Director Of Scovill

Mr. Lester J. Ross, elected for his first term as a Director of Scovill, has long been prominently identified with business activities in the Naugatuck Valley.

Since 1913, he has been connected with the Torrington Company; has served as a Director of that firm since August, 1942, and as its President since 1946. He is also a Director of: the First Federal Savings & Loan Association, the Torrington National Bank and Trust Company, Turner & Seymour Company (all of Torrington), and the Naugatuck Valley Industrial Council.

### New Line Of Safety Shoes

Available Soon

Lightweight — cool for Summer. Watch THE BULLETIN for further details and arrangements.

### New Assignments

#### Engineering

Chief Maintenance Engineer T. W. Colina has issued the following notice:

Effective April 23, 1951, the North Mill Maintenance Department and the Roll Grinding Room have been placed under the supervision of James Hanley. He will report to Chief Maintenance Engineer T. W. Colina.

#### Tool & Development

Mr. W. H. Machin, Superintendent of the Tool and Development Division, has announced the following:

Effective April 30, 1951, Joseph A. Muckle has been relieved of his responsibilities as General Foreman of the General Mfg. Tool Room. He has been assigned to Waterville Div.

Mr. L. G. Robinson, Plant Manager, Waterville Div., announces that Mr. Muckle has been appointed Assistant to the Factory Superintendent Fred J. Senior, with duties as assigned by him.

### Retired Folks' Club

The Scovill Retired Folks' Club will wind up the season with the meeting of Tuesday, June 5. Weather permitting, the group will go to the Wood-tick area for a picnic-meeting.

### All-Sports Banquet

#### Set For May 16th

The SERA Board of Directors will serve as host to members of all varsity teams, which represented the SERA in IRA competitions during the past year, at the annual banquet which will be held at Doolittle Hall on Wednesday, May 16.

Appropriate awards will be given to representative team members at this time. Erving Honyotski is Chairman for the event and announces a fine program of entertainment has been set up for the evening.

## Alcoholism

Alcoholism is a disease. An illness that is growing and too often not recognized in time. We feel sorry for a victim of cancer, heart or polio, but the alcoholic really has a trail of misunderstanding, fierce resentment, financial insecurity and disgusted friends and employers.

The alcoholic's family and children lead warped lives and still nothing much has been done to help the alcoholic toward rehabilitation.

However, progress is being made toward permanent cure. First, the alcoholic must have strong enough will to stop drinking.

Today in Waterbury, there is an alcoholic clinic on Grove Street. This clinic is ready at alltimes to help the alcoholic. There is also a local branch of Alcoholic Anonymous. Both of these organizations have had great success with their treatments, and it seems that at last progress is being made in reducing the number afflicted with this disease.

By Dom Polo

ROBERT DAYHARSH was married on May 5 and EUCLID BISAILLON will be married on June 30. Congratulations!

Our deepest sympathy goes to DAVE GRIFFIN who lost his mother recently.

Congratulations are also in order for Mr. and Mrs. FRANK ZACCAGNINI who celebrated their 14th wedding anniversary on April 14 and to Mr. and Mrs. CHARLES TISHUE who celebrated their 5th on March 25.

## Electrical Bowling

Bowling in the Electrical League has been completed for the season, with the Volts Team coming out on top with 53 games won and 31 lost. Fuses took second top spot with 48 and 36.

Honors for the season went to:—

### First Division

High Average—A. Woods, 113

High Three—M. Kulko, 370

High Single—G. Blower, 150

### Second Division

High Average—J. Ross, 102

High Three—E. DeBisschop, 348

High Single—C. Doyle, 140

### Third Division

High Average—W. Guilfoile, 99

High Three—R. Kemp—352

High Single—R. Pryor, 127

## Carbon Tetrachloride Again--Again, Warning!

"Carbon Tet" is not being used in these pictures, they were staged to illustrate our point.

Left:—definitely, don't do this. Fumes are dangerous.

Right:—Madeline Ciarlone's protected from all types of fumes while working in this exhaust booth. Carbon tet can be used in arrangements of this sort.

In spite of plant regulations and repeated warnings in *THE BULLETIN*, carbon tet has caused a near-serious accident due to improper advice and disregard of good advice.

An employee, desiring to do a good cleaning job, was improperly advised to use carbon tet. When our Oil House turned him down and warned

of the hazard, he obtained some from another department where limited use of it was permitted under supervision.

After a brief use of the chemical he became ill. Fortunately, the exposure was short and with prompt hospital attention, the result was not serious.

This deadly stuff is rarely authorized for use in our plant. Like dynamite, arsenic and other unfriendly necessities for life and progress, it can be used with complete safety but many precautions must be taken.

## Survival Under Atomic Attack

### No. 8—What About Radioactivity In The House?

Keep all windows and doors closed until it is officially reported that there is no pollution in the neighborhood.

A few simple steps will go a long way toward keeping your house from being contaminated by lingering radioactive wastes scattered about in some bombings. As a rule, it is far easier to prevent radioactive pollution of a household than to remove it.

Keep all windows and doors closed for at least several hours after an atomic bombing. In fact, better leave them shut until civil defense authorities pass the word that there is no

lingering radioactivity in your neighborhood. Should you get an official report that there is serious contamination in the vicinity, better cover all broken windows with blankets or cardboard.

Whenever there is widespread neighborhood pollution, it will be impossible to keep your house absolutely free of it. A little is bound to seep in through cracks or down the chimney.

By all means, close the dampers in fireplace flues and shut off air conditioners and ventilating fans not equipped with special filters.

Unless you are careful, some radioactivity is likely to be tracked in by people or pets. Keep your cat or dog indoors. When you come in from outside, leave your shoes at the door, for their soles are likely to be covered with radioactive dusts. Better still, wear rubbers, galoshes or other disposable foot covering over your shoes.

Take these precautions, but don't worry. There isn't much chance really dangerous amounts will pile up in the house.

Laundry contaminated objects in special buckets or tubs.

Should you help to clean up a contaminated area, you might get some radioactive materials on both your body and clothing. So don't go home and sit around in your work clothes.

Take off your outer garments outdoors or in the basement.

Then wash, if you can, using warm water and plenty of soap. Never fail to launder your working clothes, but don't use the family washing machine. Scrub all contaminated objects in buckets or tubs used for that purpose only.

## Trade Shows -- A Valuable Sales Tool For Scovill

1. George Selden of Advertising, Elizabeth Kent of the Art Dept., and Everett Hunt of Waterville Sales look over a miniature model of the Waterville display (see Page 1).  
 2. Everett Cook (left) and Tom Slater, Art Dept., work on a section of a plaster of Paris model.  
 3. Dan Camerota, Finishing Lab, sprays the Loxit replica.  
 4. John Borowski, Carpenter Shop, attaches the M-VB #16 Float Valve to one of the panels.  
 5. Anna Mulhern, Advertising, arranges samples which are to be tied onto the display board.  
 6. Walter Pond completes the electrical wiring.

If you have ever been to a State Fair, you will know what it is like to go to a trade show. Almost every industry has some of these "State Fairs" each year, and all the manufacturers in the industry show their wares to the assembled customers and prospects. At the National Heavy Outerwear Show, for instance, there were booths displaying machinery, equipment, supplies, materials, services and garments for the clothing industry. We showed GRIPPER Fasteners, GRIPPER Zippers and other metal closures.

In the past few years, Scovill has had exhibits in the Automotive Accessories Show, International Association of Clothing Designers Show, the Drug Show, the Power Show, and the National Hardware Show, just to name a few. Our various Sales divisions enter a total of about twelve a year, displaying our products to buyers from all over the country.

Scovill creates a great many of the displays used in these shows, and with close cooperation among the departments involved, has produced many prize-winning exhibits.

Let's say that the Sales and Advertising departments decide to enter a show. They have to outline what the Company wants to accomplish by entering the show and select the pro-

ducts to be exhibited. The purpose may be to promote a new product, or in times of material shortage, we may enter a show just to keep the Scovill name before the trade.

Art Director Elizabeth Kent, with her assistants, Thomas Slater and Everett Cook, take Sales and Advertising ideas and work them into creative displays. These are then worked out in drawings or modeled in cardboard in miniature and submitted to the Sales and Advertising departments for approval. Any suggested changes are made on the model and then estimated production costs are obtained from Tom Pawlowski of the Carpen-

ter Shop, Mike Toomey of the Finishing Lab and Nathan Pierpont of the Electrical Department.

When final approval to proceed has been given, Miss Kent and John Borowski of the Carpenter Shop make plans for construction of the display. They discuss the size it is to be, the material (masonite, plywood, etc.) to be used and the most practical and easiest way to construct it. The background, panels, framework, shadow boxes, tables and raised wooden letters (which are designed by Miss Kent) are made by Mr. Borowski.

In some cases (as in the display being worked on in the pictures above), plaster of Paris models are used. This display (see picture of finished display on page 1) features the M-VB #16 Float Valve and Loxit line of supply pipes, being enlarged approximately 6½ times their original size.

When completed, they were sent to the Finishing Lab where Dan Camerota sprayed them with bronzing liquids until they closely matched the actual samples. He also sprays the carpentry work such as panels, background, raised letters, stenciling, etc. Some displays require as many as four or five different colors which must match the color samples worked out by Miss Kent.

Samples of our products to be displayed are attractively arranged and wired or bolted onto the background. This is done by Display Board Maker Anna Mulhern of Advertising. She also does any sewing an exhibit might require such as drapes, curtains and many times clothes for manikins.

Electrical wiring for reflection or illumination is done by our electricians as parts of the display are completed. Each section is wired as a separate unit, as the display must be set up and approved before it can be sent to the place of the show. It is then dis-

sembled and crated by John Borowski and shipped to its destination.

Thus, another Scovill trade show is on the road.

## Ten-Year Awards

CARMELA SARNI, Waterville, Apr. 18; JOHN VALAITIS, Automobiles, Apr. 19; VICTOR SABALAIUSKAS, ASM Tool, Apr. 21; ARIALDO GRAMIGNA, Lacquer, JACK BASSETT, Casting, ANTHONY PASCUCCI, Waterville, Apr. 22.

ABRAM HORNBEIN, Tin Shop, THOMAS O'HARA, Lipstick, HUBERT ELLIOTT, ASMD, Apr. 23; HARRY WABUDA, Milling & Grinding, Apr. 24; HAROLD DONAHUE, Welding, Apr. 25.

CORNELIUS CAVANAUGH, Plant Protection, Apr. 28; SOPHIE STANKUS, Connector, PETER SMOLEY and LENA VARANELLI, both of Waterville, Apr. 29; EDWARD ANDERSON, Electrical, Apr. 30.

ARTHUR MERCIER, North Mill, May 2; HENRY KACHERGIS, Products Development, May 3; PHOEBE EGAN, Closing, May 4; V. JOSEPH GILLETTE, Button Eyelet Tool, EDMUND NAPIER, West Machine, DONALD HALL, Engineering, May 5.

FRANK McHALE, Gripper Eyelet, PAUL MURRAY and TOBY STABILE, both of Drawing, May 6; CONCETTA BIONDI, Drill & Tap, ANGELINA CALCA, Lipstick, May 7.

## Old-Time Album

Well, we certainly stumped the experts with our two old-time pictures in the issue of April 16.

"The Tiger", as he is known to his fellow mountain climbers, is better known to most Scovillites as Gene DeLage, of our Tax Office.

Our real old-timer is Harry Lathrop, who retired in 1931. He resides on Maple Avenue, West Cheshire.

## Fishing Activities

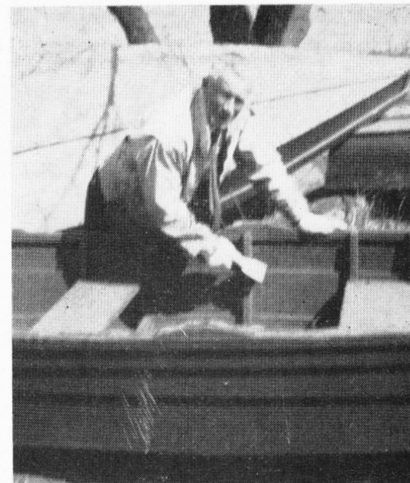

To date, the majority of Scovill fishermen who have tried their luck at Woodtick report some nice fish caught.

Walter Masse — 17" and 18" pickerel; Ray Vallieres — 18" pickerel; Fred Ehrhardt, and his new spinning outfit, caught two nice trout — 11" and 12"; Neil Granoth — 13" trout and some fine perch.

To date, largest fish caught: — perch, 13"; pickerel, 19½" caught by Henry Herron of Waterville Div.

Rod & Gun Club members are reminded to measure their big fish if they wish to win the season's prizes.

By the way, who was it who hooked a black snake on the Housatonic River, and on a dry fly, too?

—Photo by Dick Goss  
 Les Hart, caretaker, puts the finishing touches on one of the 24 boats which were readied for the start of the fishing season on April 21st.

# Three Scovillites Die

Three Scovill men to die recently were: retired Vice-President and Director *W. T. Hunter*, *Charles Warner*, also retired, and *Sabato Gizzie*, of the Waterville Division.

### William T. Hunter

*William T. Hunter*, retired, died in White Plains, N. Y. on April 19, after a long illness.

Mr. Hunter had been associated with the A. Schrader's Son Division for 50 years. He was serving as Vice-president in charge of that division at his retirement on July 1, 1949. He continued as a Director of Scovill until April of this year.

### Charles Warner

*Charles Warner*, retired, died on April 26, 1951.

Mr. Warner came to Scovill in March, 1936. Departments in which he worked included Valve, Buff, and Loading where he served as a fuse ring repairer at his retirement on June 13, 1942.

### Sabato Gizzie

*Sabato Gizzie*, Waterville, died on May 1, 1951.

Mr. Gizzie had 29 years of continuous service. Most of his years at Scovill were spent in the Waterville Buff Room. For the past few years, he made buffing and polishing wheels.
