Business-Education Program Initiated With Tour Of Scovill Plant

Waterbury's new Business-Education Program, under joint sponsorship of the Board of Education and the Chamber of Commerce, for members of the Department of Education was inaugurated on November 18, when 35 administrators, principals and teachers visited the Scovill Main Plant.

Top row, 2nd photo:—Company officials pictured with Dr. J. G. Gilmartin, superintendent of schools (2nd, left) at the Girls' Clubhouse following luncheon, are: A. P. Hickcox, Vice-Pres. and Director of Purchases; President L. P. Sperry, Works Manager J. J. Hoben, and Vice-Pres. A. C. Curtiss.

Holihan Record Wins National Acclaim

"They Don't Change Their Jobs Very Often" is the general theme of headlines which have appeared in newspapers throughout most of the 48 states recently. Carried by the wire services, the story pays tribute to the four Holihan brothers and one sister who have served Scovill for over 222 years.

They are: Henry (now deceased) foreman, with 50 years; Edna, accounting clerk, 47 years; Irving, foreman, 45 years; Earl, assistant foreman, 40 years; and Orion, tool designer, 37 years.

The Company expressed its great pride in this service record, honoring the Holihan clan at a special ceremony held August 19, 1953, at which time the oldest brother (the late Henry) received his 50-year service award from President L. P. Sperry, himself a 50-year Scovill veteran.

Recognition has also been paid by many Scovill customers and business associates who have read this story. Typical of the sentiments expressed is

the following letter received from the Elgin National Watch Company of Elgin, Illinois:

"... The enclosed story was clipped from our local Elgin Courier News. This is a very wonderful story about Scovill and is certainly indicative of the kind of company that we here at Elgin have known Scovill to be.

"Our records of the distant past are not too clear, but it is our belief that we have been on Scovill's records even longer than Henry Holihan.

"You are to be congratulated on this fine story and certainly the Holihans have.

"Good solid employees and management, like the Holihans and Scovill, is the 'stuff' that has made this country and will maintain it. It is the prayer of all of us that it is still the order of the day.

"Heartiest congratulations from all of us at Elgin on this wonderful, wonderful story."

Suggestion Awards

The Industrial Improvement Committee has announced the following awards during November:

\$20.00

Domenic Cherubini, Casting
Elmer DiPietro, Mfg. Eyelet

\$15.00

Giacomo Bianchi, Casting
William Kovach, Strip Mill
Enzo Mori, Strip Mill
Daniel Smith, Strip Mill
Arman Tora, Casting

\$10.00

George Chandler, Slide Fast. Tool
Edward Hogan, Slide Fast. Tool
Joseph Lokis, Strip Mill
Raymond Malia, Slide Fast. Tool
Anthony Mastrofrancesco, Casting
Joseph White, Strip Mill

Our Jobs Depend On Ideas

In the early days of our Republic brass buttons were imported from England. The English could make a superior button at less cost than could we Americans.

Abel Porter and his three partners set up business in 1802 because they believed they had a way of making good buttons at costs that were competitive. The venture was a success. That was the start of Scovill.

Throughout Scovill's history the ideas of employees have increased the versatility of the Company. Successful ideas have made new jobs and provided steadier employment.

Security in employment can only come from supplying the consumer with goods that are wanted at competitive prices. Our ability to do so will depend largely on ideas for the improvement of product methods and processes.

Alan C. Curtiss
Vice-President

Ted Levick Retires

Edwin N. Levick, Assistant Credit Manager, was retired from active service as of November 30, 1953, with 36 years of continuous service.

Mr. Levick came to Scovill as a bookkeeper and ledger worker in the Main Office in November, 1917. In 1920 he became overseer in the Commercial Accounting Dept. which was changed to Credit Dept. in 1934. He was named Asst. Credit Manager in January, 1945, and served in that position until his retirement.

The visit to our Continuous Strip Mill by 35 members of the local public school system was the first in a series of tours planned by the Board of Education and the Chamber of Commerce in its new Business-Education program.

The visitors were guests of the Company at a luncheon served at the Girls' Clubhouse and then were taken on a tour of the Strip Mill. Later they met in the Display Room where Company officials spoke to them on various aspects of the brass industry.

These officials included: Vice-President A. C. Curtiss who also served as master of ceremonies at the luncheon; Mr. C. P. Goss, Vice-President in charge of mill sales; Vice-President in charge of manufacturing sales, P. E. Fenton; Vice-President in charge of manufacturing production, H. W. Wild; Treasurer M. L. Sperry, 2d; and Works Manager J. J. Hoben.

Posters were set up throughout the mill explaining the various operations and describing specific machines. Company guides, together with employees working at the machines, explained operations to the visitors.

Retired Folks' Club Plans Theatre Party

The regular monthly meeting of our Retired Folks' Club is scheduled for Thursday, December 10, when the members will attend a downtown movie as guests of the SERA and Miss Julia Smith of the State Theatre.

The group will meet in the lobby of the State Theatre, at 12:45 p.m., rain or shine. Notices have been sent to members in the usual manner and they are asked to bring their cards.

Your Public Relations Are Showing

Our dealings with those people with whom we live, work, play, shop and otherwise come in contact with are often classified as public relations. If we make a good impression, it is said that we have good public relations. If we leave a bad taste in other people's mouth, figuratively speaking, then it might be that we have poor public relations.

Everyone who works at Scovill is in a way a public relations contact for the people with whom he normally associates, as the main contacts outside people have with the Company are those they know who are employed there. What you say and do regarding your employer forms a basis for the community's opinion not only about you but about your employer and fellow workers.

Some people swear by their employer; others swear at him. Some people are noisy, chronic complainers; others are silent boosters. We all have our bad days but, in comparison to our good days, they are few in number. Generally, the community's impression of an organization is gathered through the expressed attitudes of employees. It often helps to blow off steam at the end of one of those bad days, but when you speak well of the Company and those people who work around you, it speaks well for you.

Pinochle Tournament

As of November 19, Bill Mancini's men are still leading the tournament with 176,655 points. John Matulunas' team is second with 175,590, and Erv Honyotski's is third with 172,565.

For that evening, Bill Mancini's men totaled 26,240, Erv Honyotski's — 25,270 and John Matulunas' — 23,785.

Tony Laudate was high man for the night with 4,395. Joe Michaud was runnerup with 4,265.

Pinochle games are now being held at the Girls' Clubhouse.

Pre-Christmas Shopping Schedule

The Merchants Bureau of the Chamber of Commerce has announced that stores will be open until 8:45 p.m. on the following dates:

December 7, 10, 12, 14, 17, 18, 19, 21, 22, 23.

The regular schedule (9:30 a.m. to 5:45 p.m.) will be resumed on Saturday, December 26, with the exception of Monday, December 28, Friday, January 1, and Saturday, January 2, when all stores will be closed.

Pattern Shop Relocated "Out East"

When Building 25 was demolished to make room for the new warehouse, the Pattern Shop moved "Out East" to Bldg. 7-1, formerly the old Silver Shop.

Pattern makers Jim Doyle (working supervisor) and Art Greene, with Apprentice Joe D'Amico (left to right above), make and repair various patterns for castings throughout the plant.

The entire second floor of Bldg. 7 is being used for storage of patterns.

White Canes

By Dr. Robert W. Butler, M.D.

Every now and again you see one—and as you hurry on about your own business you have a momentary feeling of pity for the unfortunate person who is carrying it — and then you forget all about what it means until you see the next one. And so it goes, month after month and year after year — "There, but for the grace of God, go I!"

How many totally blind people do you think there are in this country right now? The latest figures say about 260,000—or, enough to make up a city two and a half times the size of Waterbury! The National Society for the Prevention of Blindness says that at least one-half of all these cases of blindness could have been prevented.

Will you try a little 16-minute experiment? If you'll do it, you are going to need a timekeeper. When you get home, sit down and close your eyes, (keep them closed or put on a blindfold that lets no light into your eyes) for just three minutes. Now walk around the house — you're perfectly familiar with the lay-out of things there, but you'd better keep your hands out in front of you just the same — for another three minutes. Now sit down in front of the T.V. set for ten minutes and "watch" the show. Now open your eyes, or take off the blindfold.

You have been in darkness for about 1/64th of the waking hours of one day. That is a very small part of one week — to say nothing of a lifetime, but it was a long 16 minutes, wasn't it?

The causes of blindness are many, some working quickly, others very slowly. There is nothing quicker than losing one or both eyes by accident, and some accidents of the kind which happen at home or on the street, are difficult to prepare for in advance. However, if you are working at a job where there is danger to your eyes —

in the plant or at home — there is rarely any excuse for getting into trouble. Eye protection, in the form of safety glasses or shields, are available to you, so don't fail to use them.

Your safety glasses will do you just as much good on the counter at Joe's Lunch as they will in your pocket. The next time you fail to put them on may be only a short time before somebody fits you with a glass eye, and they make very good looking ones now. They can match your seeing eye perfectly, and fix them so that they move up and down and in and out with the good eye. In fact, at a distance of three or four feet, you can't tell it from the real one.

The people who make the posters and drawings which bring out points like "you can walk with an artificial leg but you can't see with an artificial eye"; and "you can eat with false teeth, but you can't see with an artificial eye" aren't doing it just to be funny. They're deadly serious in an attempt to save you from a great deal of suffering, a partially—or totally—black world and all that it means to you.

Now that we think of it, we don't write these things just for the exercise, either.

Let's use the equipment provided for us all the time. It's better equipment than white canes or seeing-eye dogs.

Fishing Notes

By Jim Littlejohn

If you have not seen the new boat dock at Woodtick, why not take a run out and look it over?

The restocking program is off until spring. Watch THE BULLETIN for future information. Some new fishing regulations are expected from Hartford for the 1954 season. If they should affect fishing at Woodtick, employees will be notified through this publication.

The Facts Of Ice

National Safety Council's tests, plus accident figures compiled over the years, show that winter adds three serious hazards to normal driving.

Reduced visibility — comes from more hours of darkness, coated windshields and windows, snow banks and stalled vehicles.

Inadequate traction — due to snow, ice, sleet, and wetness. One out of six fatal accidents last year occurred when it was rainy, snowy or foggy. One out of four took place on icy, snowy, muddy, or wet roads.

Temperature changes—play a great part in determining braking distances on snow and ice. As the temperature rises, ice and snow get more slippery. For example, at 20 mph when the thermometer reads 32°, you need 250 feet to stop. But when the temperature drops to 0°, you can stop in 110 feet. That puts a 140-foot margin between you and trouble.

Regardless of the type of tires or chains you have one, *the way you use the brakes* has a lot to do with how soon you stop. Tests prove:

... *on glare ice*, brakes should always be pumped. Alternately applying and completely releasing brakes not only helps stop in less distance, you retain better steering control. *A sliding or spinning wheel gives no directional control at all.*

... *on packed snow*, and other less slippery surfaces, you can usually feel when brakes lock and wheels start sliding. On such surfaces then it's best to apply brakes gently until the wheels start to slide and then release them slightly. If this doesn't do the trick, *start pumping.*

To *get going* it helps to start in second gear and feed power to your car evenly and easily. But no amount of skill can escape these facts:

On *glare ice*. You'll get started almost *eight times* easier with chains than with conventional tires, *six times* easier than with abrasive, winterized mud-snow tires.

On *hard-packed snow*. Chains are *four times* better than conventional tires, *three times* better than winterized mud-snow tires.

Caution: Controversy followed last year's recommendations on glare-ice driving. The Safety Council's tests, together with the Associate Members' experience, leave no room for doubt: *chains are your safest bet.* For *high speeds* we recommend nothing but prayer.

North Mill Sets Up Self-Service Center

The North Mill recently grouped all its vending machines into a convenient and safe location, just off the main aisle, to make their use and servicing safe and easy. On this side of the staircase are grouped the machines, the Credit Union deposit box and receptacles for empty

containers, trash and butts. The bulletin board is located on the other side of the staircase.

This plan has resulted in less total space used for these facilities yet more space for employees to stand safely out of the path of operations.

Life Out East

By Harry Shewbridge

Nothing much for news this week except for the Tube Mill. Everywhere the topic of conversation is the local Christmas parties. As someone said (and it wasn't Confucius) "all the girls are asking each other what they are going to wear at the party, while all the boys are asking how much it's going to cost".

Santa Claus came early this year. At the recent Helena Rubenstein beauty show, all the girls received as gifts, lipstick cigarette lighters and Cracker Jack lipsticks. I'm not sure just what shade Cracker Jack is but they all got the same shade. Now to get my wife one and who cares if she finds lipstick on my handkerchief.

Speaking of Christmas (and what else is there to talk about?); Jerry Corrigan (Tube Mill) took his two youngsters downtown only to discover that their eyes are bigger than Santa Claus' stomach. What a list they drew up!

And to you wives, if you want to know how your husband thinks you're built, go into the department stores and look at the salesgirls. They tell me the stock answer they get from the Christmas shopping husbands is "Oh, she's just about your size". Now boys, we know better.

Finally, a word for the holidays. There's something about this time of year that makes guys like George Ashman and me cut extra notches in our belts. What do you think it is, George? The winter air maybe? Happy Christmas shopping!

Tin Shop New Year's Eve Party

Tickets for the New Year's Eve party are going fast. If you haven't got yours yet, better hurry.

Girls' Club News

By Louise Foell

Sympathy

Our deepest sympathy goes to Mary Gorman of the Slide Fastener Office on the death of her father, and to Mildred Baltrush Houlihan of the Bulletin Office on the death of her mother.

Welcome New Members

Welcome to Lydia Kalpin, Mary Carey, Helen Bochicchio, Katherine McEvoy and Rose Bernier who became Club members.

Children's Parties

The parties for Scovillites' children (between the ages of 2 and 10 years) will be held on Saturday and Sunday, December 19 and 20. Ruth Peterson of the Employee Activities Office or your nearest Council member will make your reservations and send you the tickets.

Clo Read of Central Time is chairman of the parties and asks your assistance in filling the stockings which will be made up for the children. This will be done at the Girls' Clubhouse on Monday, December 14, at 8 p.m., following the regular monthly Council meeting at 7 p.m.

On Sale

Assorted cookies — on sale at the Girls' Clubhouse on Mondays, 12:15 - 12:45.

Chocolates and assorted hard candies — on sale at the Girls' Clubhouse on Monday, Wednesday and Friday, 12:15-12:45.

Wrapping paper, assorted writing paper, jewelry, novelties, etc. — being sold by Mollie Collins at the Trucking Office (Bldg. 22-2) on Monday, Wednesday and Friday, 12:15-12:45.

Orders for the above articles may be placed also with your nearest Council member. Cookies and candies may be seen also and orders placed at the Employee Activities Office, Spencer Block, 1st floor.

Odd 'n Ends

Josephine Keilty and Mabel Ottinger of the Waterville Division spent a delightful weekend in New York recently. They took in the Latin Quarter and also saw the famous Sophie Tucker.

Ten-Year Awards

Nov. 19—Bertha Brown, Electric Shell; Nov. 20—Alice Cernauskas, Slide Fastener Assembly; Nov. 21 — Joseph Robillard, Metals Research; Nov. 22—Noemi Mazzini, Slide Fastener Assembly.

Nov. 27—Mary Regan, Plating Room; Nov. 28—Martin Rodrigues, North Mill Finish; Nov. 29—Joseph Cappiello, Chucking, John Karbus, General Training No. 1

No. 30—Catherine Lawson, North Mill Finish; Dec. 1—Emilia Montagne, Connector; Dec. 2—Catherine Elliott, ASMD; Dec. 7—Ferris George, Hospital.

Manufacturing Eyelet Tool

November 17, 1953

Training Course

Edward Adamski graduated as a Toolmaker on November 1, 1953. He has been assigned to Button Eyelet.

Charles Dubauskas graduated on November 29, 1953 as a Toolmaker. He's been assigned to the Mfg. Eyelet Tl. Rm.

Robert Huckins graduated as a Toolmaker on November 1, 1953. He's been assigned to Slide Fastener Tool.

Willis Pond graduated on November 22, 1953 as a Draftsman. He has been assigned to Mech. Engineering.

Stanley Tarasewich graduated as a Draftsman on November 8, 1953. He's been assigned to Drafting.

What Is It? You Tell Us

Here's an article which was brought in for identity. We're at a loss as to its original purpose and would like your help. It is of silver, fan shaped and almost five inches at its widest point. The tongue in the center of the curve appears to be a clip which might have been used to attach the tray (?) to some other article. What's your guess, we'd be interested in hearing.

Another Photo For The Old-Time Album

The building above, familiarly known to all of us as the SERA Clubhouse, has been demolished to make room for two new modern buildings. Over 100 years old, it was purchased by Scovill after the fire of 1881. It was used by the SFA from 1915 until 1942, when it was turned over to the SERA.

Rod & Gun Club

The annual meeting of the Scovill Rod & Gun Club is scheduled to be held on Tuesday evening, December 15, in the third floor conference room of the Spencer Block at eight o'clock. The financial report will be read and there will be nomination and election of officers for 1954.

All members are urged to make a special effort to attend this meeting and give their views on making next year the best of all. Payment of dues for 1954 will be accepted at this meeting.

Some of our members had very successful hunting trips in Maine recently. As a result, venison seems to be the main dish in many households.

Fishermen

Call it beginner's luck if you wish, but Frank Grenier (left, of the Waterville Division) is mighty proud of his catch on his first fishing trip.

In photo, he and friend Rene Parent display their catch. Another fact for which Frank can be proud is that he and the Mrs. celebrated their silver wedding anniversary recently.

Three Succumb

BILL LOVETT, retired, died on November 21, 1953.

Mr. Lovett had ten years of continuous Company service during which time he served as a carpenter in the Carpenter Shop. He retired from active Scovill service last July.

NELLIE LYONS, retired, died on November 29, 1953.

Miss Lyons was hired in 1906, which was also her continuous service year. When retired on May 2, 1949, she was employed as a matron in Press #2. Prior to that, she served as a press operator.

SANTO GAROFALO, blanking, died on December 2, 1953.

Mr. Garofalo was hired in 1924, and had a continuous service record since 1945. Most of his years with Scovill were spent in Burnishing. When he left November of 1952 because of illness, he was a press operator in Blanking.

"Scoops" From Zippers

By Louise Foell

Sincere sympathy is extended to Jimmie Wagner (Laundry) on the recent loss of his father.

Congratulations are in order for Alice Cernauskas (Sl. Fastn. Assembly) and Mary Scott (Wire Forming) who received their ten-year service pins recently. Mary celebrated in New York City.

We all miss Eddie (Red) Reed who has switched from the first to second shift.

Our gracious and lovely Mary Grady was a model at the recent Beauty Show.

Many more happy years for Helen Bicchicchio, who celebrated her first wedding anniversary recently.

Congratulations to Dick Simpson and the Mrs. who were blessed with a baby girl on November 25.
