Michael Duffy Receives 40-Year Pin

Michael Duffy of the Hardening Room admires the 40-year diamond-studded service award pin presented to him by Scovill President L. P. Sperry. On hand to offer congratulations and best wishes were Foreman Arthur Mraz and Tool & Development Superintendent Willis H. Machin.

Blood Donors Needed—November 5th

The Blood Mobile Unit will be set up in Doolittle Hall on Thursday, November 5, for employees in the Casting Shop, Strip, Tube and Rod mills, and offices.

Office personnel especially are urged to make every effort to give a unit of blood along with the production departments who have done so well in supplying blood for the armed forces and for civilian use.

The war in Korea is over, yes, but blood is badly needed for many of our boys who were wounded and are in hospitals now.

Blood is also needed for civilian use at home. Our own employees have had cause to be thankful for the estab-

Five Retirements

VINCENZO CAVELLO, Waterville, retired with benefits to start on October 1, 1953. He has over 33 years of continuous service. Always in the Foundry, he was a scrap separator at the time of his retirement.

JOHN GAYER, Tin Shop, was retired with benefits to start on October 1, 1953. All of his 13.2 years of continuous service were spent in the Tin Shop as an iron worker.

FRANK MASI, Chucking, retired with benefits to start on October 1, 1953. He recently completed 53 years of continuous Scovill service and has served as a hand screw machine operator in Chucking since 1941.

DARWIN WEEKS, Rod Mill, was retired with benefits to start on October 1, 1953. His 28.2 years of continuous service were spent in the Rod Mill as a pump oiler.

JOHN DONNELLY, Waterville, was retired with benefits to start on October 12, 1953. Always in the Power House, he has been serving as a boiler room engineer since 1951.

ishment of the Blood Bank. Within the past three months Scovillites, or members of their families, have received blood in hospitals in Waterbury, Boston, Philadelphia, Meriden and New Haven. With the cooperation of our employees, most of this blood has been replaced but we still owe several units. Won't you help cancel this debt?

1954 Withholding Tax Rates

Income tax rates will go down; social security tax rates go up, starting January 1, 1954.

If the number of your withholding exemptions should be increased (such as by the birth of a child) or decreased (such as by the death of one of your dependents) please be sure to notify the Company immediately so that a proper adjustment of your tax can be made. The proper forms are available in the Employment Office.

The new tax chart will appear in the next issue of *THE BULLETIN*.

Scovill *Truspec* Aluminum Strip

The story of Scovill and its 64 years of research and development of new controls in processing aluminum is told in a new 20-page booklet which will receive its initial distribution at the National Metal Exposition opening in Cleveland, Ohio, today.

The booklet has been issued to announce the results of the latest research efforts by Scovill which states it has "a new industry standard in controlled quality and uniformity" in its cold-rolled aluminum strip. This is achieved by exceptionally close control of inherent physical and mechanical properties of the metal, making it possible to minimize "orange peel" and "earing" effects.

(Continued on Page 3, Column 4)

Your Jobs Depend On Stockholders

Scovill Manufacturing Company has a capital stock investment of over \$43,500,000. This investment is represented by two types of stock, preferred and common—preferred with a current value of \$12.5 million and common stock with about \$31 million par value. This stock is held by approximately 18,000 stockholders.

This group of stockholders changes from day to day, as some individuals sell all or part of their stockholdings, and other individuals become new Scovill stockholders or add to their existing holdings of the stock.

There is only one reason why an individual buys Scovill stock, and that is his personal belief that Scovill is a good company in which to put some of his savings.

What makes for that belief? The reputation Scovill has developed over many years is that it is a well-run company turning out a broad and diversified line of products which the public wants and at prices the public will pay. And behind that reputation are, obviously, the 11,000 Scovill employees who are putting their skills and their personal reputations into making and selling those Scovill products.

Without stockholders who have faith in Scovill, there would not be the necessary capital to keep the wheels turning in our plants. Without employees who have faith in Scovill, there would not be the business to attract the stockholders.

Alan C. Curtis
Vice-President

The Waterville Line

If you are building a new home or getting ready to modernize your house, you will of course want to have the best plumbing fittings available to complete this portion of the job.

The best line on the market is produced by our Waterville Division under its name and the M-VB trademark.

Whether it be kitchen or bathroom fittings that you will be specifying, be sure to let your plumber know that you want the Scovill line. These fittings are specified by the manufacturers and wholesalers of the highest quality plumbing goods.

By buying Scovill-made products wherever you can, you will continue to help keep up production and insure steady jobs for yourself and other Company employees.

Scovill Foremen's Assoc.

A group of interested representatives have been meeting and discussing an association for Scovill foremen since November, 1952. They formed three committees:—by-laws, activities, and organization and membership.

On Monday, October 12, the group held an organizational meeting and are now set up to develop the association. All eligible men in the Main Plant will be contacted on becoming members of the Scovill Foremen's Association. The next meeting is planned for Wednesday, November 4, at 7:00 p.m. in the SERA Clubhouse.

The plant has been divided into seven divisions; each division is represented by one member (trustee) who will be in charge of activities by and

Man And Eternity

Countless books have been written about the history of man, his evolution and the laws and customs and other things which govern his daily life and well-being. Many are theoretical, others are based on some sort of scientific research. Standing out head and shoulders above all books is the Bible.

Contained in its pages is the dramatic and vital story of man from the time God first created Adam and Eve through the life of Christ on earth and the beginning of the Christian era. The book has served as an inspiration to millions of persons and is used in courts of law as a symbol of one's fidelity to his word. Contained in its pages are lessons that are as true today as they were thousands of years ago.

Ever since this book was first published about 500 years ago, it has consistently outsold all other books published. It has provided inspiration and hope to countless millions who turn to it daily. If you have lost the habit of Bible reading, Bible Week, which we are celebrating this week, will be a good time to renew your association with this masterpiece of ages.

Girls' Club News

By Louise Foell

Dorothy Bernier O'Rielly, who was an active Council member while here, became the mother of a lovely son. Best of luck and happiness to the O'Riellys.

Many thanks to Dorothy Budris and her committee for their efforts in making the first fall event (The Beauty Show) the huge success it was.

Calling new members — It's fun getting together for our varied program of events. By joining now, you'd be just in time for all the holiday programs. Speaking of the holiday season, remember that the Clubrooms are available to members for showers and parties.

Keep October 31 open for our Hallowe'en party which will be held at the Club. It sure will be fun dressing up. How about getting your crowd together?

John O'Brien, Sl. Fastn. Sales

Phillip Rasmussen, Gen. Training

Allen Taylor, Drill & Tap

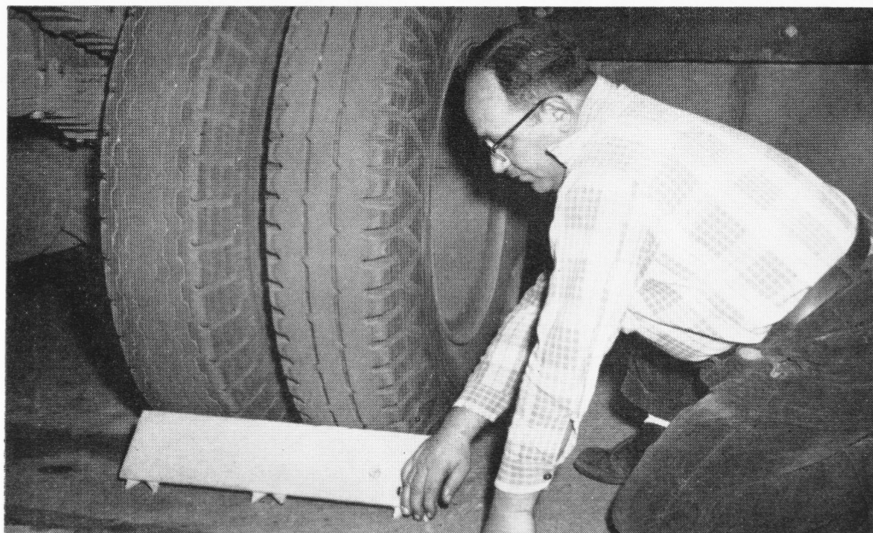

Rod & Gun Club

Calling all members — please plan to attend the monthly meeting on Tuesday, October 20, at 8 p.m. in the third floor conference room of the Spencer Block.

Wheel Blocks To Stop Rollaways

Accidents have happened, even in our own plant, when trailers or trucks were pushed away from loading platforms by fork trucks. Every platform is be-

ing provided with heavy wood or steel blocks but, like many other good safety devices, these blocks will prevent accidents — *only if used.*

Jerry Ricciardi, of the Millwright Dept., places a dependable wheel block under a trailer to prevent it from rolling away from the platform.

How To Eat

By Robert W. Butler, M.D.

If your diet is a good one, make the most of it by cultivating good eating habits, too. In that way you'll make the most of the food and save yourself a lot of discomfort as well.

Don't bolt your food! Half-chewing your food and then washing it down with water or a beverage insults your stomach. Sooner or later you'll hear from it, and it won't be pleasant. If you already have the habit of eating too rapidly, practice chewing every mouthful until it is practically liquid before you swallow it. Even chewing liquids a few times will help keep you reminded.

Don't eat when you're too tired. Rest for a while before your meals, and again after them. If you have one-half hour for lunch, spend five minutes resting before you eat, ten minutes eating (you won't spend any more than that anyway), another five minutes resting and you still have ten minutes for that cigarette. You'll probably have to do it by the clock, because the five minute rest periods will seem like that many hours until you become accustomed to the new schedule.

Don't plan to have a large meal on the table the minute you get home from a day's work, either. That's the time you should plan on at least a one-half hour rest period before eating. Your body needs it, and so does your stomach.

Don't eat if you're in a hurry. Plan if you can to make any after work dates you have for a couple of hours or more after you get home. If you can't do that, eat something light and easily digested; then plan to have another meal later when you can do it and your stomach justice.

Don't rush through a big meal and then rush to get somewhere else — your stomach might not like it. Don't eat a big meal if you're more than normally nervous, worried, or out of sorts. Remember that the dinner table

is not a battle ground, so don't have a family argument there. It's very bad for the digestion, and what's more, nobody ever won a decent fight on an empty stomach, anyway.

That's only one-half the battle however — the very important other half is the formation of good eating habits which help your body to use the good food properly. Nobody can tell when the effects of the bad habits will bite you, so change to the good ones now!

Ten-Year Awards

Oct. 6—Josephine Petitjean, Waterville; Oct. 7—Gertrude Lane, Waterville; Oct. 9—Fedele Polzella, Drawing.

Oct. 10—Helen D'Angelo, Waterville; Oct. 11 — Salvatore Bernacchi, Waterville, Wesley Jermoluk, Salvage.

Oct. 12 — Frances Genua, Assembling; Oct. 13 — Michael Guerrero, Chucking; Oct. 16—Josephine Bombaci, Manufacturing Time.

Newlyweds

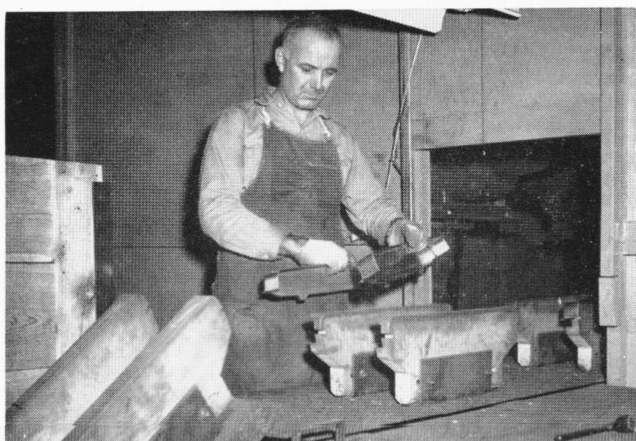

Introducing Mr. and Mrs. John Petino who were married recently. John's father is Emanuel Petino who is an employee of the Strip Mill.

New Automatic Buffing Machine

A chain-type drive conveyor transports the refrigerator bottle shelves through three sets of buff wheels with Tripoli rouge to be buffed; then through a fourth set containing Moco rouge, to be colored. Note the spring clamps holding the shelves in place on the wooden chucks in the photograph. A set of buffing wheels may be seen to the right.

With the buffing and coloring operations completed, Joseph Ford removes two shelves from the chucks. He will then stack them onto the wooden racks to his right. A set of wooden chucks (left foreground) is being upended by the conveyor to be returned to the loading area.

For the past three months a new type automatic buffing machine has been in operation in the new Buff Room, Building 12-2, which was formerly occupied by the Japan Room. This machine was purchased to buff flat refrigerator parts, an operation formerly done by hand. As a result, the use of muscle for power has been greatly reduced.

Here's how the machine works:—

It is equipped with eight sets of buffing wheels (we're using four at present) with two wheels on each spindle, a chain-type drive conveyor and 62 steel sheet covers (these protect the conveyor chain from dust). Two wooden chucks are bolted to every other cover. These chucks, which are removable, are actually molds of the jobs to be run, and new ones must be put on for different shaped work. At the present time, refrigerator bottle shelves and egg racks are being buffed.

These items must go through three sets of buff wheels to obtain the proper standard of finish as each "hit" takes off a certain portion of the surface.

Scovill Foremen's Assoc.

(Continued from Page 1, Column 4)

for that particular group. They are:—
1) East Plant Manufacturing Depts., Herb Colby; 2) West Plant Manufacturing Depts., John Meehan; 3) West Plant Mills, (North and Wire Mills), Willard Shove.

4) East Plant Mills (Casting Shop, Rod, Tube and Strip Mills), John Greaney; Offices, E. B. Goss; Maintenance Depts., Bill Carew; Tool Depts., Ray Havican.

Temporary officers are: President, Art Chaffee; Vice-President, Herb Colby; Secretary, Fred Wilson; Treasurer, Joe Cepelak; Assistant Treasurer, Ray Havican.

As soon as the association is established, date for annual meeting and election of regular officers will be set.

These operations leave the work dirty due to buffing qualities of the Tripoli rouge used on the buff wheels. In order to clean and brighten them, they are colored at a fourth and last set of wheels which use Moco rouge.

An adjustable rouge applicator with a cam action of raising and lowering the rouge is set on top of each wheel. Also, each spindle is connected to an ampere gauge (located near the operator who loads the machine) which records the amount of pressure being applied by the wheels. The gauge can be adjusted easily if the pressure is too low or high.

The entire run, from the time of loading until the work is taken off, takes approximately two and a half minutes, with 28 pieces being buffed during that period.

The new machine buffs articles in a straight line only, so another buffing operation must be performed on the shelves or egg racks as they have rounded ends. This is done by hand at floor model motorized buffing wheels.

The automatic buffer is not visible upon entering the room as it is enclosed in a wooden structure to keep the room free of lint and rouge. Most particles are carried from the machine by suction blowers to a Rhoto-Clone which is in the Blacksmith Shop. When air reaches the Rhoto-Clone, it is cleaned by the combined action of centrifugal force and a thorough intermixing of water and dust-laden air. A few particles are apt to escape from the machine, but they are swept into floor suction blowers which are in the enclosure.

New Assignments

Manufacturing Division

Announced by G. A. Schlander, Superintendent of Manufacturing — Bldgs. 136, 65 and 65A:

Effective October 5, 1953, Donald F. Spellman has been assigned as Foreman of the second shift in Department #87, Shell Dept.

Announced by Factory Superintendent J. G. Wolf:

Effective October 8, 1953, Thomas A. Lynch has been appointed Foreman of Departments 21 and 23 (Buff Rooms) in addition to his present duties in Department 22. He will report to General Foreman J. A. McConas.

Manufactured Sales

Announced by P. E. Fenton, Vice-President in charge of Manufactured Sales:

Effective October 7, 1953, Ernest B. Lawton, Jr. has been appointed Sales Supervisor of the Screw Machine Products Division. He will be responsible for development of sales and marketing policies associated with divisions 95 and 96 and will report to Vice-President P. E. Fenton.

Mill Division Sales

Announced by C. P. Goss, Vice-President in charge of Mills Div. Sales:

Effective September 28, 1953, James R. Mitchell has been appointed sales coordinator, Mill Sales Division. He is responsible for coordinating sales of aluminum mill products, reporting to R. W. Goss, Sales Supervisor in charge of sale of Aluminum Mill Products.

Effective October 12, 1953, William G. Morris has been transferred to the Greensboro Office as a Mill Products salesman. He will report to Mr. G. D. Engle, District Manager of the New York Office.

Tool Depts.

Announced by W. H. Machin, Superintendent—Tool and Product Development Departments and Screw Machine Products Division:

Effective October 12, 1953, Frederick W. Troske, Jr. has been appointed Assistant Foreman of Dept. #356, Attaching Machine. He will report to Foreman John F. McAree.

Fishing Notes

By Jim Littlejohn

The fourth and final round of the Reeves Competition was held on October 10. Winners of this round were:

- Bass—J. Carron, 17½"
- Calico—H. Miller, 12"
- Pickereel—J. Foley, 16⅞"
- Perch—J. Matulunas, 12"
- Trout—L. Reid, 14"
- Bullhead—B. Madden, 12¼"

Top three for point standings for the championship are: J. Delaney with 10½ points, L. Daveluy with 7 points and J. Matulunas with 6 points.

The annual banquet and presentation of prizes will be held on Thursday, November 5, at the Copper Kettle. Get your tickets now as reservations are limited.

As the 1953 fishing season is drawing to a close at Woodtick, I would like to take this opportunity to thank everyone for their cooperation during the season and, to Mr. and Mrs. Les Hart, thank you for your fine efforts.

The restocking program will start on Sunday, November 8, at 11 a.m. Why not plan to be there.

Truspec Aluminum Strip

(Continued from Page 1, Column 2)

These two defects have dogged fabricators of the metal since such have made necessary additional finishing operations to remove imperfections caused by metal characteristics inherent in grain structure and size, temper, tolerances, and finish.

Scovill, America's oldest brass firm, first started negotiations with the Pittsburgh Reduction Company, predecessor of the Aluminum Company of America, shortly after Charles M. Hall received his process patent covering the reduction of aluminum by electrolysis.

Early inter-company correspondence shows that on July 9, 1889 the Pittsburgh Reduction Company agreed to furnish aluminum ingots to Scovill on the basis that the next six months "be devoted to testing possibilities of making a market for aluminum and aluminum alloys". This agreement in its entirety made Scovill a rolling mill as well as a manufacturing department for the Pittsburgh Company at that time.

Family Album

Thomas Morse, son of Rudy of Roll Grinding, was thirteen months old yesterday. His mother, Rose, is a former employee of Press #2.

Needlework Class In Session Wednesdays At SERA

Knitting needles, crochet needles, rug needles — all briskly flying to turn yarn into colorful afghans, rugs, sweaters. These are the sounds to be heard on a Wednesday evening at the SERA Clubhouse. Here are some of the group gathered in one corner of the lounge. Left to right:

Mae Dailey, instructor Kittie Stack, Minnie Connor, Kay Griffen, Mae Hanley, Dorene Nocera, Mabel Gelinas, Lydia Kalpin, Emma Pirone, Helen Martino, Mildred Stafstrom, instructor Margaret Snowden and Ann Cassel. You're invited to join them, any Wednesday evening.

Three Succumb

ARMANDO MANZOLLI, Tin Shop, died on September 30, 1953.

Mr. Manzolli was first hired on August 29, 1919, and worked intermittently during his years here. His last place of employment was the Tin Shop from 1923 until 1936, when he was forced to leave because of illness. While there, he served as a steel and iron worker's helper.

NICHOLAS GRECO, Tube Mill, died on October 5, 1953.

Mr. Greco was hired in April, 1917 but, due to several periods away from the plant, his continuous service record began in 1933. Except for a short period in the Casting Shop and Yard Department, all of his years with Scovill were spent in the Tube Mill where he served as an annealer's helper.

RAYMOND DUNN, ASMD, died on October 7, 1953.

Mr. Dunn became a Scovill employee on January 8, 1917, and had a continuous service record since 1924. He had been employed as a toolsetter in ASMD since 1929.

"Scoops" From Zippers

By Louise Foell

Evelyn Youngquist just loved the party with her co-workers on the 2nd shift.

Helen Andreato forgot her lunch for two days. Penny for your thoughts, Helen! Maybe they're worth more!

Charles Bozzuto of St. Fastn. Wire Form. and Grace Paznokas of St. Fastn. Assembly have sons on the Crosby Football Team. Now we can be assured of certain victory for each game. The boys are Peter Paznokas and Charles Bozzuto, Jr.

Loads of luck to Mr. and Mrs. Jim McBroom who have a husky 10-pound boy.

A few people seen around lately were: Helen Kobylinski driving her new Pontiac, and Millie Basso and Jean Fredin discussing beauty with Mrs. Graham (the beauty expert) at a downtown store.

Sincere sympathy to Mabel Korbusieski and Joan Dunn on the recent death of their father, Ray Dunn.

Best wishes for success to Amy Cable on her recent promotion.

We're all happy to have Alma Chernesky back after her recent illness.

Did you know that October 4 was Slide Fastener Day at the Danbury Fair? With the beautiful autumn weather, it seems as tho everyone in St. Fastn. was there.

Scovill Ladies Hear New York Cosmeticians

Approximately 250 ladies attended the demonstration by Harriet Hubbard Ayer representatives Mrs. Ivy Palmer and Mrs. Vera Nelson on the art of proper makeup at Doolittle Alley Hall on Wednesday, October 7.

Upper photo, left to right: Mistress of Ceremonies, Mrs. Louise Foell; Chair-lady of the affair Dorothy Budvis, Mrs. Palmer, Mrs. Roger Graham, who is cosmetician at the Grieve, Bisset and Holland store, and Mrs. Nelson. Mrs. Frances Genoa, Assembly, served as model during the demonstration.
