## Work Started On New E. R. Bldg.

Scovill Vice-President Mark L. Sperry (seated in the cab of the power shovel) awaits word from President L. P. Sperry to start operations for the construction work of the new hospital and Employee Relations building (see drawing above) on Thursday, November 11, 1954.

Standing with President Sperry at the formal ground breaking ceremony are:—Vice-President William M. Goss, Vice-President in charge of Employee Relations Alan C. Curtiss, and members of the engineering staff who designed the building:—heating and ventilating engineer John J. Fitzgerald, chief electrical engineer Emory Rogers, architectural designer Armand S. Fisher, chief plant engineer Norman Schlink, construction engineer Louis A. Warner and architectural designer Julian F. Abele.

## Kids' Christmas Party

The annual Children's Christmas Party, sponsored by the Scovill Girls' Club, again will be held on two days to accommodate all reservations.

The parties will be held at Doolittle Hall on Saturday and Sunday, December 18 and 19, from 2:00 to 4:00 p.m., with a limited attendance each day of 500 children.

All Scovill children between the ages of 2 and 10 years are invited to attend the parties which are sponsored by the Girls' Club together with the assistance of the SERA and the Scovill Sunshine Fund.

All reservations must be in by Thursday, Dec. 16, in order to arrange for a gift for each child. Tickets will be issued on the basis of: the first 500 reservations to be received will be given tickets for Saturday unless Sunday tickets are desired; the remainder to receive Sunday tickets.

Tickets are available at the Employee Activities Office, Spencer Block.

The new hospital and Employee Relations building is expected to be ready for occupancy late next summer. The 30,000 square foot structure, in an "L" shape, will extend 154 feet on East Main St. and 127 feet along the Hayden St. entrance.

The two-story building, designed by Scovill engineers, follows modernistic lines. The exterior will be faced with brick with continuous glass windows. The entrance features pre-cast granite stone and aluminum trim. With its equipment, the building is expected to cost about \$500,000.

## Retired Folks' Club

The Scovill Retired Folks' Club has been invited, by Miss Julia Smith, to a showing of "They Rode West", a technicolor movie, at the State Theatre on Wednesday, December 15.

Robert Francis and May Wynn (who provided the love interest in "The Caine Mutiny") co-star in the film and will be on hand in the lobby of the theatre to give our retired folks an autographed photo if they desire one.

## The New Contract

Your Company and Local 1604 UAW-CIO have entered a one-year agreement which will expire December 15, 1955. This new contract offers a wage increase and additional benefits for employees and members of their families. Included in this new contract are the following provisions:

A general wage increase of four cents an hour effective Nov. 8, 1954

Skilled trades adjustment of two and a half per cent also effective November 8 (This is in addition to the general four cents per hour.)

Increases in insurances fully paid for by the Company which become effective December 6, 1954 and include Comprehensive Blue Cross which provides \$12 a day for 100 days of each admission for employees and members of their families

An increase of \$5 a week in disability benefits over the present \$30

Extending to employees and their families increased surgical benefits under preferred C.M.S. allowing up to \$300 per operation and the addition of X-ray coverage not previously available.

These new provisions naturally add considerably to our costs of doing business. Unless we can find new ways and methods to absorb these additional costs in improved productivity and savings we may find we are no longer competitive in some of our products.

*Alan C. Curtiss*  
Vice-President

## Scovillites Donate 192 Pints of Blood

### "Holiday Special" Donations Set New City Record

Scovill employees, and members of their families, again have proven they can be counted on to do their part in a worthy cause. The 192 units of blood collected at the November 30th visit of the Bloodmobile set a new record in the city of Waterbury for one-day visits of the Unit.

With only one-fourth of the plant involved, 240 employees volunteered to give blood on this day. Due to re-

jections for various reasons, 192 pints of blood were collected.

Sincere thanks and congratulations to all who made this record possible—the workers who did such a fine job in signing up the volunteers — employees and members of their families who donated — employees who volunteered even though they are in other sections of the plant which were not scheduled to give at this time.

## 50, 40-Year Awards Presented

Top: President L. P. Sperry presented the 50-year award to Andrew J. Crafa of Press II. On hand for the occasion were Factory Supt. J. G. Wolff, Foreman Frank Shanahan and General Foreman James Dunn.

Bottom: Arthur Taylor, General Foreman of the Millwrights, received his 40-year service award with Vice-President Mark Sperry and Chief Maintenance Engineer Tom Colina on hand for the occasion.

## S-Day - - December 15

December 15 has been designated as S-Day, a day on which all motorists, and pedestrians, are urged to exercise caution and safety to see if the nation as a whole cannot have one day free of highway deaths.

This one-day objective is designed to bring home to the traveling public that, if fatalities are reduced as a result of the campaign, then by extra caution throughout the year the death toll can also be reduced.

Each year automobile manufacturers build into their cars new and improved safety factors. S-Day should help build into us safety precautions that may save our lives.

### Pinochle

Scores for the evening of November 18 show that Bill Mancini's boys were top team for that night — 32,285 points; Erv Honyotski's team came in next with 31,820 points; John Matulunas' team netted 29,900 points.

In the tournament to date, Erv Honyotski's team is leading with 226,840 points; Bill Mancini's men total 225,700; John Matulunas' 220,235.

Individual high scores for the evening went to Erv Honyotski with 4,415; John Matulunas with 4,305.

### Cribbage Doings

In the second round of the tournament to date, the National League is leading with a total of 10,723 points; the American League has 10,632.

Evening scores for November 30 were: National League, 5,438 points; American League, 5,420.

Individual high went to Erv Honyotski and Ed Meafski with 1,461.

### Holiday Store Schedule

The schedule of stores for the Christmas period has been announced as follows:

Saturday, December 11 and 18, stores will open at 9:30 a.m. and close at 8:45 p.m.

Monday, December 20 and continuing through Thursday, December 23, stores will open at 9:30 a.m. and close at 8:45 p.m.

Monday, December 27, stores will be closed.

### Scovill Foremen's Club

At the November 29 meeting of the Scovill Foremen's Club, members were shown a sound-color film entitled "Connecticut, Land of Steady Habits," presented by the Connecticut Light & Power Company.

Guest speaker George Smith, of the Charles W. Scranton & Co., brokerage firm, gave a talk on "secret formulas for becoming a millionaire."

## Millwrights Are Our Heavy Moving Men

In the process of loading one of the 35-ton propane tanks onto a flat car are (left to right) Charles Lewis, Vincent Valuckas, Humbert Mucci, George King, Henry Yeske, Ernest Garbauskas and Charles Dubuque, foreman.

Propane, which has been in use at Scovill for 15 years as a source of heat for annealing, has finally given way to natural gas. When a tank (like that pictured above) must be shipped away, it is a job requiring the services

of the Millwrights. When it isn't practical to lift heavy loads, the Millwrights have two other methods which they use: they either slide 'em or roll 'em. In this case it is roll 'em, and the Millwrights know how.

# 50<sup>th</sup> Anniversary

## How Come?

By Robert W. Butler, M. D.

Nobody was ever born with TB and nobody ever inherited it. You have to catch it—or better, it has to catch you! You catch it from someone who already has it by breathing in the germs which he has shot into the air by coughing, sneezing or spitting. You can get it in a couple of other ways too; by kissing someone who has it, or by putting into your mouth things that are not sterilized after being used by someone who has active TB.

Nobody is immune to TB — a disease which is no respecter of persons. You may make your living by pushing a shovel, a pencil, or a roll of ribbon — if you're in the right place at the right time to be tagged by the right bug, you're *it!* Furthermore, you're fair game whatever your age or sex, despite the fact that the highest percentage of its victims are in the prime of life.

The chances are that most of us have taken TB germs into our bodies at sometime or other, and because of our strong bodily defenses have had no symptoms. When they got in, they were quickly surrounded by a wall of cells and fibres—and gradually by a hard, lime-like substance which kept them from spreading. Sometimes these germs will die there—sometimes they live there quietly for many years waiting for our resistance to be lowered by illness, by too much work, or by too much play. That's a very important fact for the attention of the holders of two jobs, and for the members of the *burn-the-candle-at-both-ends* club. Get your resistance down and that wall you built up years ago may crumble and give those germs a chance to get out and go to work — and that's no good.

Three to five of any thousand people chosen at random as they cross a busy street intersection have it and don't know it! They are the people who probably pass most of it along because they haven't yet developed symptoms of the kind which drive

people to their doctors. The obvious answer is the annual physical examination and chest X-ray, just to make sure you're not one of the five. You can't start curing a disease until you discover you have it, and the quicker you discover it, the quicker the cure.

Of course, the best treatment of any disease is its prevention and there are things you can do. Keep in good general health by getting enough rest, sleep and exercise and by eating a balanced diet. Not part of the time, but *all* the time. Keep out of range of the coughers and sneezers and keep hands away from your mouth unless they've been freshly washed. And be sure that the restaurants you eat in do a real cleaning job on their dishes, glasses and silver. Do these things; give your doctor his annual chance to look you over and get your chest X-rayed, and your chances of no TB (or a quicker cure) are excellent.

Much has been learned about the treatment of this disease in the last few years and while we can't consider the cure to be a fast process, it's a lot quicker than it was even 10 years ago. So don't worry about whether or not you have it — just find out. And don't worry if you have it, because the outlook is good, and there are jobs for you after the cure.

Christmas seals are making their appearance now and every time you see one ask yourself the question "Why didn't I make that appointment for the examination and X-ray?" You'll soon get so fed up with asking yourself the question that you'll *do* it!

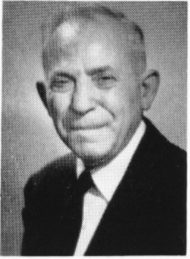

### Safety Shoe Store

Safety shoes are on sale at the Safety Shoe Store in Bldg. 61-A (behind the Spencer Block), every Tuesday and Thursday from 7:30 a.m. to 4:30 p.m.

If those days are inconvenient, call the Safety Office at ext. 888 and make an appointment.

November 30 — John Dolan, Millwrights;  
December 4—John Alcorace, Hot Forge Tool.

## Mangers - - Appropriate Decorations For The Christmas Season

Twenty - three years ago when Michael Scannell's son Robert was only 2 years old, (Robert now 25, is employed in the Gen. Mfg. Training Room) Michael made a manger for his family. Michael was always handy with tools and has always been interested in working with wood. Since that time, 23 years ago, he has made mangers for friends, and has done countless other things with wood, including making all the improvements on the Scannell home at 126 Mansfield Ave.

Mike's talents and his mangers have become well known in the city and he is receiving orders for them from relatives, friends and even strangers. While Mike does not care to make a business of selling his handiwork, he is happy to know people want one of his mangers in their homes at Christmas time and is willing to accept as many orders as he can possibly fill by Christmas.

In his workshop in the cellar, Michael, using a table saw and a jig saw, cuts out the parts of plywood for the mangers. These parts are carefully glued and nailed together, then sanded, stained and varnished. It takes him about eight hours to do this basic work.

Mike Scannell, surrounded by a few of the mangers he has made, looks over a figure which, when glued into place, will complete another one.

He also wires them so that they can be lighted, putting in a socket that will take a 5-watt bulb.

When Mike has finished, he turns the mangers over to his wife Ruth (of our Lipstick Dept.) to be completed. She puts the finishing touches on them by arranging and gluing in the figures depicting the nativity.

The mangers, when finished and lighted, make a beautiful and appropriate decoration to have at Christmas

time to remind us of the true meaning of Christmas.

## "Scoops" From Zippers

By Louise Foell

Connie O'Brien was pleasantly surprised by her family on Thanksgiving Day. The family came from Way Down Maine.

It was quite a thrill to Grace (Mom) Paznokas and Charlie (Pop) Bozzuto to hear their sons and Crosby football heroes interviewed by Sportscaster John Cluney on his radio program Thursday, Nov. 18.

By the way, I also hear that Chuck Fabey's son (Slide Fastener Tool) is a coming athlete, also at Crosby.

Are you planning a trip to France or possibly Canada? Do you need to brush up on the French language? Marie Roberge makes a marvelous teacher.

Lucy Rinaldi is the proud mama whose son's picture was in The American with the YMCA fencing team.

Louise Zollo and Helen Andreano were seen Christmas shopping in New York recently.

Edith Carolan and Anne Romano enjoyed the performance of "Madame Butterfly" at the Met on November 20.

Hello again to Dorothy Martin who has returned from a sick leave.

Slide Fastener wishes to extend sympathy to our co-worker Gretta Beebe on the death of her husband.

Last, but not least, don't forget S. F. Christmas party on December 11, at Doolittle Hall. The committee for the party is as follows:

Chairman — Frank Yursaitis; co-chairman — Harry Foss; Treasurer — Neal Touby; entertainment—Emil Konopaske, Don Mower, C. Fabey; food—Alex Montvill, Gert Kapaski, L. D. Foell; set-ups—Don Taylor, Tom Ryan; hall decorations—John Thompson; table decorations—Hilda McGhee, Barbara Ross.

## Life Out East

By Harry Shewbridge

Probably one of the outstanding Scovillite social events of the season occurred on Saturday, Nov. 20, at St. Francis Church in Waterbury. It was then that Joan, another one of Ed Brown's beautiful daughters, took the name of McElligott. The matron of honor was the former Rosalind Brown, whom some of you may remember as a timekeeper several years ago. The reception following the ceremony took place at Waverly Inn. Anyone who attended said the same thing, "the bride was beautiful."

The Rod Mill seems to have captured the news in this issue. Edna Walsh is back again in the office and Charlie Vaughan became a father for the second time when his wife presented him with a new citizen named Douglas Stephen.

Finally, it's good news to report that George Ashman is back again in Slide Fastener, well on the road to recovery.

P.S. Now that Thanksgiving is behind us, and you had it to do all over again, would you eat twice as much turkey, or half as much? Remember Christmas is coming.

By Juanita Adessio

WE NEED VOLUNTEERS — to help repair and paint toys to be distributed at Christmas time. The time is getting closer and there is still so much work to be done. What a shame and waste it would be disappointing some little kid because some adult was just *so busy* he couldn't manage to give a couple of hours to putting these toys into A-1 condition. It's more than worthwhile and certainly very rewarding to know that you are contributing to the real *Spirit of Christmas*. Why not try it! You certainly have nothing to lose — but do have something to gain! Contact Margaret Snowden, if you're interested and arrangements can be made accordingly. Have your own group if you like—make it your own do-it-yourself party! Swingin' a paint brush can be fun! Our thanks to those who have already so very generously given their time and efforts to this work, and to those who have sent in toys. They are very greatly appreciated.

What's New? Want any information on the big, beautiful new '55 chariots? B & F Sales Office can give it to you! Two of the boys have new Fords—Terry Narbut is driving a new Oldsmobile—Jackie Gilland is gliding around in a new Chrysler — there's a new Plymouth in the crystal ball for Penny Reilly. Course, there are a few of us left driving the old junks, but we hope that Swami sees bright things for us in the future.

The Club is sponsoring a Ski Tour the 17, 18 and 19 of December to New Hampshire. Guess it won't be long before we will be seeing quite a few people on up-turned bed slats.

Just a Reminder—there'll be another bus trip coming up on the 11 and 12 of December. Here's your opportunity to see New York in its Christmas splendor—see the Christmas Pageant — do some Christmas shopping, etc. We hear through the grapevine these bus trips really are fun — why not join in on this one?

The Kiddies Christmas Parties will be held on December 18 and 19 — but first we have to fill the stockings — this will be on December 7. Wouldn't you like to help do it? Maybe you're a new member and aren't too familiar with our goings on at Christmas — this is a good way to get right into the middle of things. There are over 1000 stockings to be filled so you see we've a big job ahead of us!

## Josephine Hill Feted On Retirement

Josephine Hill of Lipstick (right) was feted at a recent party given by her co-workers. She was presented with a purse and corsage. On behalf of her friends, best wishes for a happy retirement were extended by supervisor Alexander Sconziano (center) and Elizabeth Moriarty, (left) also retired.

# Industrial Hose Salesmen Hold Meeting

"Improved customer service" was the basic idea behind the recent two-day refresher course held for our industrial hose coupling sales specialists. Keeping the salesmen posted on the latest developments in the field enables them to help our customers in their application problems.

Scovill salesmen from the field participated in discussions conducted by the heads of our production, research, marketing, sales, tool and development departments. They also toured the factory and visited the laboratory where couplings are tested under various types of service conditions.

Scovill's industrial couplings are extensively used in the petroleum and gas industries as well as in other applications where liquids are conveyed through flexible conductors. Couplings for use with either rubber or plastic hose are made from brass with various protective coatings for special applications.

## Three Succumb

JOHN GRADY, Waterville, died on November 11, 1954.

Mr. Grady came to Scovill on November 20, 1924, and had a continuous service record since September 28, 1927. Always in the Headers Dept. he was serving as a vault man when he died.

LEONARDO SANTASIERO, retired, died on November 15, 1954.

Mr. Santasiero came to Scovill on May 5, 1913, and had a continuous service record since June of that year. Always in the Trucking Dept., he was serving as a pan sorter and inspector when he retired in April of 1948.

WESLEY JERMOLUK, Salvage, died on November 21, 1954.

Mr. Jermoluk came to Scovill on August 12, 1943, and had a continuous service record since October of that year. In Salvage since 1945, he was serving as an operator-sorter until illness forced him to leave in August of 1954.

## Training Course

Robertson Boyd graduated as a Tool-maker on November 7, 1954. He has been assigned to the Blanking & Drawing Tl. Rm.

## Attending Conference

Seated, left to right:—George De-More, Waterbury; Harold Javitt, Los Angeles; R. M. Broker, New York; G. D. Engle, New York Office Manager; S. M. Main, Coupling Div. Sales Manager; Tom Lange, Chicago; N. J. Schaffer, Waterbury; W. R. Westfall, Special Representative; and G. K. Thornton, Advertising Manager.

Standing:—Howard Kemter, Cleveland; Paul Rhodes, G. L. Chase, R. W. Whipple, Waterbury; Ronald O'Hanley, Advertising; W. J. Malvey, Waterbury.

By Charlie Rietyke

President Ed DeBisschop has designated Tuesday evening, December 21, for the annual meeting of the Rod and Gun Club. This very important gathering will be held at the Employment Office Reception Room at 8 o'clock.

Secretary John Patrick and Treasurer Ray Laneville will render their annual reports after which a new slate of officers will be presented for election. All members are urged to be present and to exercise their voting privilege.

The Club has set aside the sum of \$100 to help the trout restocking program. SERA will contribute \$300 for the purchase of trout. The Club donation will be used for large trout only. Tentative plans call for delivery at our pond at Woodtick for Sunday morning, March 20, 1955. That's farsighted long range planning.

Got your tip-ups ready yet? Ice fishing is just around the corner! If you need help or advice, see such experts as Henry Miller, Bill Ollis, Rocco Lobraico or Bill Vining. Matulunas can advise you on what kind of sandwiches to take and John Hubbard will gladly recommend the proper liquid refreshments. Ice fishing is permitted in many of our lakes, although some people prefer to do their ice fishing in mint juleps.

Be sure to attend the meeting!
