Golf Clinic Features Jimmy Thomson

The 7th Annual Golf Clinic, sponsored by the SERA, will be held on Tuesday, March 23, at Doolittle Hall, at 8:00 p.m.

Techniques of better golf will be demonstrated by Jimmy Thomson, top flight golf pro who is identified as one of the longest drivers in professional golfing circles.

All golfers in Waterbury will be welcome. Also on the program are golf, movies, refreshments, and door prizes.

The committee in charge includes: Co-Chairmen Jim Coffey and Len Corrado, Jim Brislin, Ray Driscoll, Les Fuller, Ray Kozen, Howie Kraft, Tom O'Connell and Ed Sabis.

Tickets are available at the Employee Activities Office (1st floor, Spencer Block) or from the committee.

Jimmy Thomson

Aircraft Fastener Manual

A new combination catalog and engineer's manual on our line of Paneloc aircraft fasteners has been released recently. The 58-page booklet, in addition to giving information on Paneloc fasteners, presents detailed engineering data on performance, installations and special applications.

The Scovill Paneloc fastener is designed, primarily for the aircraft industry, as a fastener to hold together two overlapping metal sheets under conditions of tension, shear and vibration. Hence it is also suited for use in similar applications in ships, railroad cars, busses, trucks, and, in fact, in any place where panels, inspection plates, ductwork, etc. must be held secure and still be readily removed and put back.

"Do It Yourself"

The "Do It Yourself" wave has been sweeping through the community, engulfing many Scovillites. At popular request, the SERA will sponsor a series of such programs.

The first in the series, with representatives of Apothecaries Hall to instruct, will be held at Doolittle Hall on Tuesday, March 16, at 8:00 p.m.

Terry Marvin of the Agriculture Dept. will handle that part of the program dealing with seeds, fertilizers, lime, construction of the lawn, and the angle to do with weeds and bugs.

Mr. B. S. Douglas will handle the painting as it pertains to the preparation and finishing of interior and exterior surfaces including walls, floors and ceilings. Also, expert advice will be given on the use of rollers and which paints can or cannot be used with a roller.

An added attraction for the evening will be Mr. Clem Sutton, technical representative of the Waterproof Paint and Varnish Co. of Watertown, Mass.

Other programs in the series will include experts in the fields of wood-working, upholstery, interior decorating, etc. There is no admission charge for these sessions.

Retirements

LAZZARO CHERUBINI, Steam Department, retired with benefits to start on February 22, 1954.

Mr. Cherubini came to Scovill in September, 1927, and has a continuous service record since 1945. At the time of his retirement he was serving as a janitor in the Steam Department.

AGNES BLONDIN, Assembly, retired with benefits to start on March 1, 1954.

Mrs. Blondin was hired on May 8, 1918, and has a continuous service record since 1922. She has served as an assembler-inspector-packer since 1942.

JOHN A. THERIAULT, Pipe Shop, retired with benefits to start on March 1, 1954.

Mr. Theriault came to Scovill in November, 1924. Always in the Pipe Shop, he has served continuously as a steam fitter since February 1926.

Annual Report For 1953

1953 sales of \$125,489,218 reached a new peak in the Company's history. It compares with \$94,282,288 in 1952 when we suffered from a prolonged strike in our Waterbury plants, and with \$118,484,161 in 1951.

Earnings for 1953 were \$3,706,066, or 3.0% of sales as compared with \$2,620,068 (or 2.8% of sales) in 1952, and \$5,566,825 or 4.7% of sales, in 1951. The fact that the record level of sales in 1953 produced earnings which were considerably less, percentage-wise, than 1951 and only slightly above 1952 indicates the narrowing spread between our costs and the prices at which we are able to sell our merchandise. As all indications point to a continuance of such price competition, it is necessary that we continually review our operations so that savings can be made wherever possible. All of us can play an important part in this undertaking.

Although sales throughout most of the year were at a very high level, a tapering off of new orders beginning in the middle of the year indicated a slow first quarter for 1954. It is our opinion that this decline in sales was caused by inventory accumulation in the trade during the early part of 1953 when government restrictions on basic materials were first lifted, and by a down trend in defense business following the cessation of hostilities in Korea. The natural reaction when supplies finally became plentiful and deliveries speeded up was to hold up new orders and cut inventories. We feel that our customers' inventories have now been reduced to a point which will require the placing of new business. While competition for this business is keen, our experience, know-how, modern equipment and well-accepted product lines should enable us to obtain our share of what is available.

Again in 1953 the amounts spent on new plant and equipment to improve our operations exceeded those paid in dividends. During the year we spent \$4,990,291 for new equipment and \$823,973 for other property, mostly buildings, a total of \$5,814,264.

At the year end, there were 10,363 employees, of whom 2,007 had continuous service records of 25 years or more. Included in the total payroll costs of \$48,937,535 for the year 1953, is \$1,962,649 paid for pension plans, both formal and voluntary. Pension plans have now been effected with all recognized bargaining units in the United States.

\$1,435,930 was paid for hospitalization, surgical, accidental death and dismemberment, disability, life, and Workmen's Compensation insurances. These insurances constitute real protection to our workers and their families.

In looking ahead, there are always many uncertainties that can either impede or inspire progress. Our success in coping with these uncertainties will depend on the alertness and aggressiveness of Scovill employees. We are confident that we have a group of workers that is eminently qualified to meet this challenge and carry on the reputation for quality and service that is associated with our Company.

L. P. Sperry
President

New Snap Fasteners For Plastic Raincoats

Wearers of plastic rainwear will no longer have to tug at snap fasteners to get their raincoat open. A new snap

fastener, designed especially for this application has been added to our GRIPPER line.

This new product can be opened easily yet has the necessary strength to keep the garment closed under ordinary wear. It is a "new answer to the old problem" of providing for light weight plastic garments a rust proof closure which has an adequately firm holding action and yet can be opened easily and without strain on the material.

Edmund D. Janes, B & F division sales manager, says, "A popular type of rain protection is the plastic raincoat which can be folded into a small compact package. This calls for an extremely light plastic which, in turn, challenges the closure manufacturer to design snap fasteners of minimum thickness and smooth and easy action. By making them of brass the rust problem is also solved."

Thus another forward step has been taken in maintaining the Scovill policy of devising a fastener for every purpose.

Financial Summary

The Financial Picture

On the front page of this issue of THE BULLETIN is a thumbnail sketch of our 1953 operations as compared with 1952 and 1951. These figures indicate that business expenditures are no different than running a household.

The income figures in a way can be related to our own income. The monies expended by the Company can also be related to the expenditures of our households. In the latter case such items as rent, food, heat, light, clothing, and transportation can be substituted.

As for profit, an individual's profit picture can perhaps be measured in such items as bank savings, insurance, savings bonds, equity in a home and similar items.

It is the ability of our Company to continue to make a profit that provides all of us with jobs. If we do our part to help the Company to continue to make a profit, we in turn will have steadier jobs and a more secure income.

"Scoops" From Zippers

By Louise Foell

Vacation time started early for Marie Martineau, who spent two heavenly weeks in Miami, Florida.

Sick list includes: Anne Mapiello and Paul Shegda. Speedy recoveries are wished for both of them.

We all miss lovely Kay Ryan who has left to take up household duties.

Did you know that: Theresa Guglielmo's husband is "Guggie," Waterbury's most popular policeman?

Robert Huckins is back with us again from a two weeks cruise from Norfolk, Virginia. The cruise was for Uncle Sam.

I understand that Slide Fastener was well represented at the recent basketball tournament in New Haven.

The first of the Club's 1954 activities will be the annual banquet to be held in Doolittle Alley Hall on Thursday, April 8 — STEAK DINNER.

Door Prizes — Sports Movies — first showing of Ducks Unlimited new film, "Canada Goose", is a special feature on the program.

Members are urged to get their tickets early so that the committee can make proper arrangements.

Watch For Those Traffic Hazard Signs

This picture shows one of the traffic hazard signs placed around the plant. Because the plant was laid out many years ago there are places where caution is necessary to avoid accidents.

Every day, suggestions are made for more signs to tell people this or that, and the problem is to limit signs to places where there is a real problem.

The signs which are posted are warnings against possible serious hazard. For your own safety, observe these signs at all times.

Have You Got It?

By Robert W. Butler, M. D.

Many of you younger people have probably never heard of the word "Consumption" — meaning Tuberculosis, that is — but your grandparents never called it anything else. The word consumption comes from a Latin word which means "eat up" — exactly what the tuberculosis germs do to you when they get a good start inside your body. Now if there's any eating to be done, you'd certainly rather do it yourself than have something eating you; and with a little care you can!

The tuberculosis germ spreads from person to person most frequently, usually from close contact with one who has the disease in an active form and may not know it. Best ways of spread: kissing, coughing and sneezing, with one good cough dispersing thousands of germs over an area of several feet. It can also be spread by handling contaminated articles and then placing the hands to the face before washing.

This disease may attack almost any part of the body. While the great percentage of cases involve the lungs, it may also invade intestines, eyes, kidneys, glands, bones and joints. Many children years ago became hunch-backed, or otherwise crippled by drinking infected milk. Pasteurization of milk and testing of cows

for tuberculosis has cut down these deformities tremendously — but they killed the infected cows to do it! Some people think that raw milk tastes better, but the pasteurized kind is certainly safer.

Fortunately for us, the tuberculosis germ usually eats us slowly; so that by taking precautions to discover the disease early, people can be reasonably sure of healing the damage it has done before it's too late. If you are more tired than you should be and for no reason, or are losing weight for no reason either, or if your cough lasts longer than a week or two, or certainly if you see blood in your sputum, you should see your doctor for a check-up without delay.

Don't postpone an examination because you're "afraid the doctor will find something!" If you have it you'll go for that check-up sooner or later anyway — you'll have to — so do it early, and heal the disease quickly.

Let's eat rather than be eaten!

Remember When?

These three fishermen were snapped with their catch July 12, 1941. Jim Littlejohn, Russ Hickman and Charles Rietdyke didn't need to tell any tall tales — not with this picture as evidence. How about this year, boys?

Don't forget—fishing season opens April 17.

Pinochle Tournament

Scores for the evening of March 4 show that John Matulunas' team was high for that night with 33,650 points. Bill Mancini's boys were runners-up with 32,830 and Erv Honyotski's team had 30,860.

In the tournament to date, John Matulunas' team is leading with 228,735; Bill Mancini's men total 225,630; Erv Honyotski's, 223,680.

Individual high score for the night went to Archie Hollywood with 4,295 points. John Matulunas was second with 4,225.

Fishing Notes

By Jim Littlejohn

Members of the Fishing Committee visited Davey Brothers Trout Hatchery at Plainville and saw some of the fine fish that will be put in Woodtick Sunday, April 11, at 11 a.m.

This year brown trout from 10" to 20" will be stocked, and the employees are assured of some of the best sport in the state. Bring your family out April 11, and see this stocking program.

Boats are being repaired and painted and all equipment should be in first class condition for opening day.

Life Out East

By Harry Shewbridge

A week ago I appeared at work with my face the color of a well boiled lobster. My story was that I fell asleep under a sun lamp. Some folks believed my story and sympathized with me. Others chose to believe a story the details of which can only be obtained from Jack Murkley (Planning). In spite of my insistence that it was a sun lamp and nothing else, the test apparently will come when we have the first warm spell. Then, if hair starts to sprout on my bald spot, Jack was right. Dear Jack.

By the way, Jackie Carolan is out of the hospital and recuperating rapidly. That's real good news.

And, in case you didn't guess it by looking at him, Jack Pyatt is back from a week in Florida. He flew down, got himself a good tan, and flew back. He says Miami Beach is all that the folders say it is, including the bathing suits.

Now for a few notes about the Tube Mill. First, and most sincerely, the employees of the mill wish to extend their sympathy to Charlie Klobedanz on his recent loss. Second, is the question, "Who, with the initials J. J., waited patiently at the Payne Whitney Gym in New Haven, to see the Sacred Heart basketball game which, as we all know, was played at the Arena?" Third, and last, a memo to Ted Williams from the gang around the Extrusion Press — Please Get Well Soon!

Make Your Lawn The Green Spot Of The Neighborhood

Now that spring is upon us, home owners and prospective gardeners should begin their annual checkup of garden tools and lawn equipment. Listed below are a few pointers on what to do to prepare for this growing season.

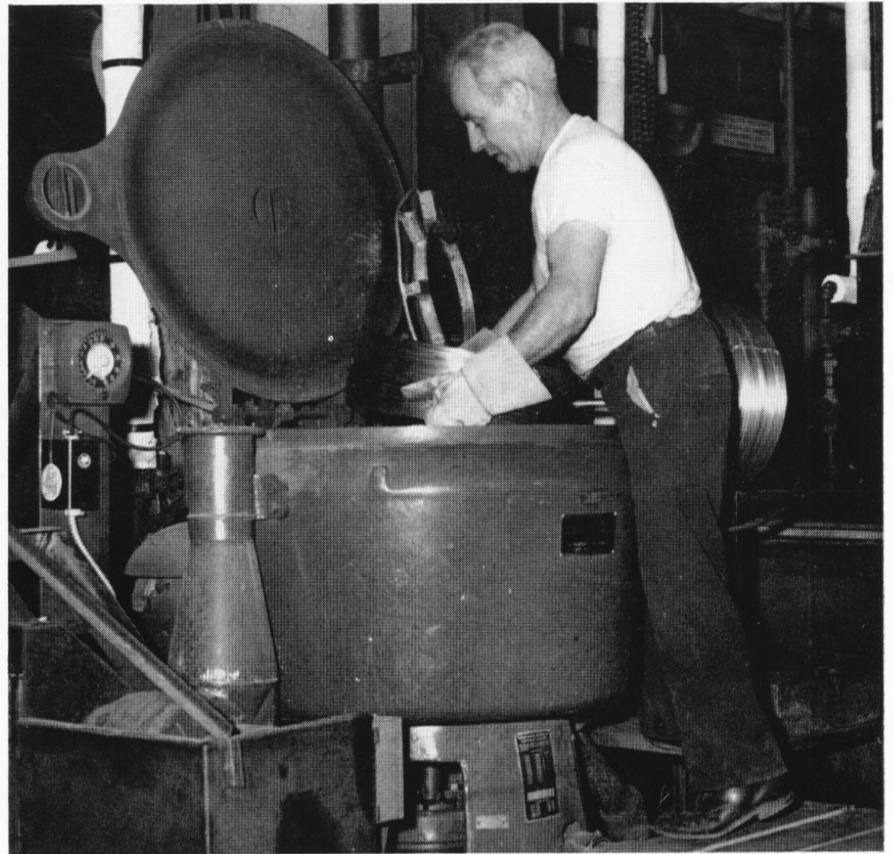

1. Assemble and inspect the basic tools: rake, hoe, spade, etc. Test the handles for strength and look them over for rough spots and splinters which may need sandpapering or taping.

2. Similarly check on your mowing equipment. Are the blades on the lawn mower and shears sharp and properly adjusted? Are all moving parts properly oiled and free of rust? If you have a power mower, is the engine in good operating condition?

3. Lay out the garden hose and test it for cracks and other leaks. Check your sprinkling equipment and see that it is in working order. Bear in mind your troubles during last summer's drought, and be sure that you have the types of sprinklers that will most efficiently cover the various sizes and shapes of the areas that will need watering, and sufficient length of hose to get the sprinklers to the correct positions on your lawn and in your garden.

4. Take a look around the place to see what shrubs may need replacing and what bare spots require re-seeding; then put your orders in, so

New Drier In Cleaning Department

Patsy Sacco is shown setting one coil of wire into the new drier. Leaning against the cover of the drier is a wringer which is used to separate the coils, making it easier to lift each coil of wire out after the drying operation.

In operation since November in the Cleaning Department, Bldg. 112-1, is a Tolhurst Centrifugal Drier. This electrically run machine dries wire in tightly bound coils. It does a much more thorough job than the hot air oven used before the drier was installed. The oven was not as fast and spotting often resulted, thus making another operation of cleaning necessary before the wire could be used. The combination of centrifugal force and hot air dries a load in approximately one and a half minutes.

Before the coils of wire can be put in the machine they have to go

through a sequence of cleaning and rinsing. Finally the wire is ready to be dried.

After the coils are set on a spindle, the cover closed, and the drier started, hot air is forced by a blower into the drier. The water is spun off the coils, emptied into a chute which leads into a drain, and is carried off.

Although a timer is used to stop the drier automatically, the machine can be stopped by a shoe-type brake which is operated by a self-locking foot pedal. The brake on this particular drier is not used because a complete stopping of the machine would result in damage to the wire rendering it unusable. While the timer stops the drier at the designated time, it does not stop the spindle from revolving. The spindle comes to a gradual halt leaving the wire in perfect condition, and the operation is through. The entire cleaning and drying procedure takes approximately 5.5 minutes.

In addition to stepping up production through the speed of the drying operation, the new machine has another advantage — it's complete safety. The cover on the drier cannot be lifted up unless the power is off, thus assuring complete safety when the machine is in operation.

For Our Family Album

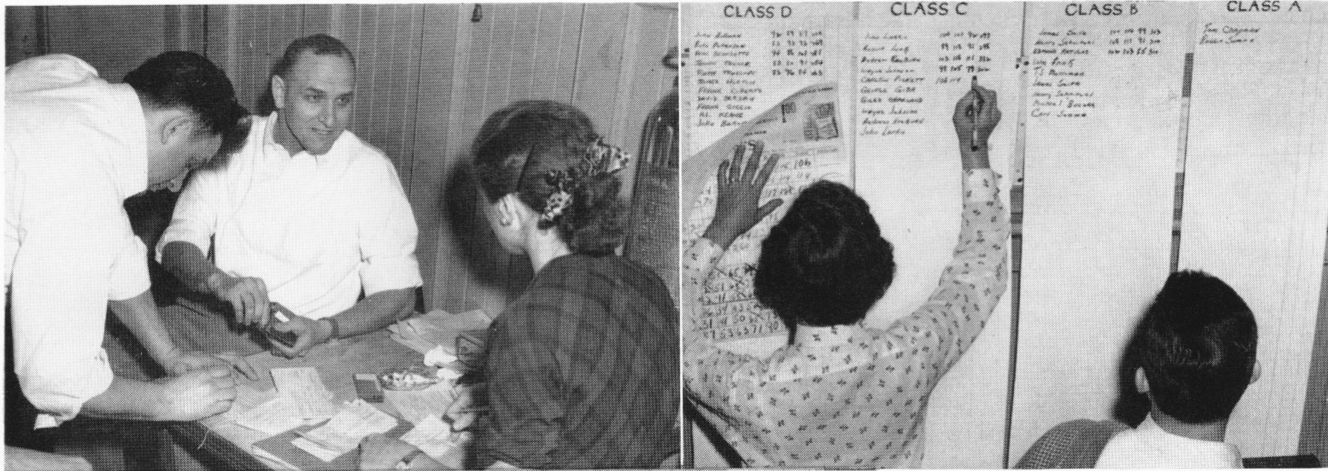

These young ladies are eleven-year old Joan and twelve-year old Sally Schultz. They are the children of Al in Slide Fastener Finish.

Right: Robert Jean Granoth, 14-month old grandson of Neal Granoth and nephew of Henry Perrault, both of Waterville's Roll Thread Department.

7th Annual SERA Bowling Tourney Attracts 150

Two Succumb

Typical scenes at Sena's Recreation Center during the afternoon of Saturday, March 6, when 150 Scovill bowlers competed for prizes.

Top left: Committee member Ruth Peterson accepts Bob Kucheravay's entry; top right: Committee member Jean Ostroski kept bowlers posted on scores. Al Kean also served on the committee.

CLARENCE DOYLE, Electrical Maintenance, died on March 1, 1954.

He first came to Scovill in 1915, and had a continuous service record since 1917. He was serving as a tester in the Electrical Department at the time of his death.

ARTHUR C. EVANS, Engineering, died on March 8, 1954.

Mr. Evans had a continuous service record of over 33 years, having come to Scovill in November, 1920. At the time of his death he was serving as a plant layout and planning engineer.

By Juanita Adressio

Judy Bradshaw of the Rod Mill, recently returned from Florida, is now sporting a gorgeous Florida Tan. We can look for more of these tans from now on.

Ruth Tourangeau and Grace Kelly will be down in Florida for the next couple of weeks "lazing" in the sun and having a super good time (without me). Since the Dodgers are in spring training at Vero Beach, outside Miami, they will be seeing a few exhibition games at the Miami Stadium.

Jackie Gilland and her "Bill" are on their way to Jacksonville to visit Jackie's parents' new Homestead, but they will eventually get to St. Petersburg to watch those "ole" Yankees bat a few balls around. I guess they will see some exhibition games too, with the Red Socks at Sarasota and the Phillies at Clearwater.

Nellie Kalinauskas, North Mill, has a gleam in her eyes these days to match the gleam of that new diamond that Ollie Stevens gave her. They have set the date for June 19.

The Girls' Club is sponsoring a couple of trips, one is the "Veronica's Veil" Passion Play in Union City, New Jersey, Sunday, March 21. This includes orchestra seats and transportation, plus a California breakfast at Danbury Connecticut. The bus leaves at 8:30 a.m. Tickets are limited. The second trip is to New York for the week-end of March 27 and 28. The tickets, at a very reasonable price, cover transportation, tickets for the Easter Pageant at Radio City, dinner with floor show at the China B'or, hotel room for the night and TV tickets. Please contact any council member for tickets.

Don't forget the White Elephant Sale on Saturday, April 3. If you have anything you would like to donate leave it at one of the Guard Houses.
