Blood Donor Day Friday, Sept. 21

The next visit of the Blood Mobile Unit to Scovill will be on Friday, Sept. 21, from 1:00 to 5:30 p.m. at Doolittle Hall.

While primarily set up as "West Plant, Section #1 Day", it is hoped all eligible employees and family members will sign up. Due to no fault of our employees, the last visitation

netted only 58 pints; and we are now 122 units behind our annual quota.

The supply of blood at the local hospitals has had to be replenished from the Hartford Blood Center which has acquired it from other communities. Headquarters has warned that Waterbury has used 33,489 pints of blood while contributing only 24,638 units during the six-year period the plan has been in effect. In July of this year, only 159 pints were collected and 450 pints were used for Waterbury residents.

In the event of an emergency, the Hartford Center warns, it may be impossible to continue to allocate from other communities into our hospitals.

Evening Courses

With the opening of the academic year in September, several schools in the area are offering evening courses in engineering, business administration and the liberal arts. Many of the courses grant credits toward a bachelor's or associate's degree.

Courses are available at the Waterbury Branch of the University of Connecticut, Post College in Waterbury, New Haven College, Hillyer College in Hartford, University of Bridgeport, Quinnipiac College of New Haven and at the Hartford Branch of the University of Connecticut.

(Continued on Page 4, Col. 4)

Labor Day Shutdown

The Waterbury and Waterville divisions of Scovill will be closed on Monday, September 3, 1956, in observance of Labor Day.

All departments will open with the first shift on Tuesday, Sept. 4. Any deviation from the above will be announced by departmental posting or by individual notification.

One Year Ago

The hurricane season is with us again. Let us pray that the season does not bring to this area the disaster of a year ago.

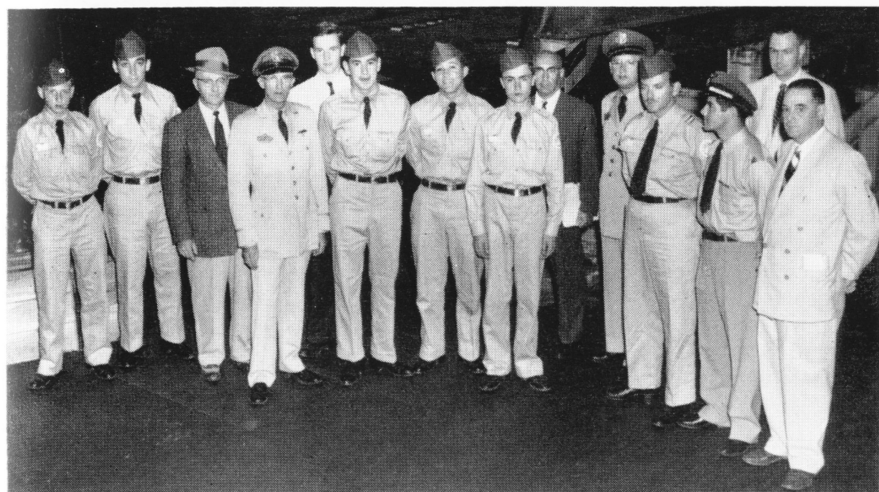

It is to be hoped that work that has been done in our river beds and on their banks will take care of any flooding that may come. The wrecking of buildings last year along the streams will result in less damming of streams because of debris, and should greatly reduce fatalities in the event of disastrous floods.

One lesson all who live near the rivers and creeks should have learned is to evacuate upon notice of flooding upstream. And may the dams that are deemed necessary soon be provided to impound excessive water in the valleys.

Alan C. Curtis

Vice President

Peruvian CAP Cadets Visit Scovill

A tour of the Scovill Mills was made recently by five Civil Air Patrol cadets from Peru. They are part of a group of 150 cadets from 22 countries who are in the United States under the international cadet exchange program.

Accompanied by two senior officers and two Connecticut CAP officers, the cadets (two on extreme left, three in center of photo) were guided through Continuous Casting and Continuous Strip Mill by Lyle Carlson, John Danaber.

Scovill Tubing In Largest Refinery

—Photos courtesy of C. F. Braun & Co., Engineers and Constructors.

Scovill copper-nickel tubes are playing an important part in the construction of the world's largest and most modern refinery which is being built by Tidewater Oil Company, 15 miles south of Wilmington, Delaware.

Some 85,000 Scovill tubes have been used in the various exchangers and condensers for this model of refining ingenuity. The tubes are 70-30 copper-nickel, 3/4 inch, 16-gage and 240 inches long.

Tidewater's Delaware Flying A Refinery is unique. It will process 130,000 barrels of crude oil a day in an "around - the - clock" operation; goes "on stream" later this year.

In planning the refinery, Tidewater engineers incorporated the most advanced design in order to provide the greatest flexibility in operations. The refinery facilities now being built will utilize any kind of crude oil for the economic manufacture of products of the very highest quality.

At this refinery towers the 350-foot stack of the world's largest crude unit. This unit will take 130,000 barrels of crude oil daily and convert it into gas,

gasoline, naphtha, and other products for further processing.

Other units going up at the Delaware Flying A refinery include the Orthoflow fluid catalytic cracking unit which will soar 250 feet into the air—as high as a 25-story building—and will process 102,000 barrels daily. The fluid coker, one of the world's two largest, will have a capacity of 42,000

(Continued on Page 3, Col. 2)

Two Retire

ENRICO PELLEGRINI, North Mill, was retired as of May 1, 1956.

Mr. Pellegrini, who has been at Scovill since 1915, has served in various departments and, for a period, was work supervisor in the East Mill. In 1949 he went to the North Mill, where he was serving as a sweeper when retired.

MICHELE SANTORO, Waterville Div., was retired as of July 1, 1956.

Mr. Santoro came to the Waterbury Div. in 1915 and since 1922, when his continuous service record began, has been in the Screw Dept. In 1942 he transferred with the department to the Waterville Div. He was serving as a sweeper when retired.

Retired Folks' Picnic

Members of the Scovill Retired Folks' Club will start the Fall season with a picnic at the Woodtick Recreation Area on Tuesday, Sept. 11.

They will meet at the Scovill Girls' Clubhouse at 1:30 p.m. and will be taken to Woodtick in cars. Members who will be driving and can take passengers are asked to stop at the clubhouse and take along a few members.

In the case of inclement weather, the meeting will be in the Clubhouse.

Mills Division Announces New Sales Managers

Mr. C. P. Goss, Manager of the Mills Div., has issued notice of two appointments effective Sept. 1, 1956.

Mr. Clarence W. Seeley has been appointed Regional Sales Manager, Mills Div., with headquarters at Cleveland, Ohio. He will supervise and be responsible for the sale of Mill Products in the region comprising the following District Sales Offices:—Cleveland, Cincinnati, Detroit, Pittsburgh and Sturgis.

Mr. Holden C. Lewis has been appointed District Sales Manager of the Philadelphia Office. He will be responsible for the sale of Mill Products in the territory covered by that office, and will also administer the office operation of other divisions located in the Philadelphia Office.

Credit Union No. 1 Lists Changes

Credit Union #1 is currently going through the process of changing to a machine bookkeeping system and asks cooperation of all members in helping to make this change as quickly and smoothly as possible.

Passbooks are to be deposited in the box in your department. A deposit box will also be on the office door for your convenience.

Effective August 20, 1956, the office hours will be as follows:

For Loan Applications

Tuesday—12:00 noon to 1:00 p.m.
" 2:30 to 4:30 p.m.

For Check Distribution

Thursday—12:00 noon to 1:00 p.m.
" 2:30 to 4:30 p.m.
Friday—12:00 noon to 1:00 p.m.
" 2:30 to 4:30 p.m.

SERA Day Camp

The ninth season of the SERA Day Camp for employees' children and grandchildren will end either August 24 or 31 depending upon the number of children registered for these weeks. This year, the attendance averaged over 100 children each week.

The day camp, a service sponsored by the Scovill Employee Recreation Association, is held at the Woodtick Recreation Area, Monday thru Friday, from 8 a. m. to 5 p. m.

Included in the daily schedule are swimming lessons, quiet games and rest periods, movies, supervised free play, story telling, hiking, nature study, competitive games and sports, hot dog roasts and special events. These activities are well supervised by Marita Carolan, Dan Grasso, Barbara Lord, Dorothy Muller, Maryann Pranulis and Bill Stack who are experienced and qualified counselors.

The features of the camp which make it so popular are: the facilities and conditions at Woodtick; the best in leadership; the program and cost.

Softball Games

The last game of the first round was played on Tuesday, August 14, at the Waterville Park, Diamond #4. S.W.E.R.A. beat the Pinmakers 10 to 3 in this regularly scheduled game, tying both teams for first place with 9 wins and 1 loss. The play-off game will take place on Tuesday, August 21, to decide the first-round champions.

To date, three games have been played in the second round, but no definite standing has been established due to games postponed and ties.

The August 3rd games were cancelled due to rain and will be played at the completion of the regular schedule. Then the winners of the first round will play the winners of the second round for the 1956 softball championship in a two out of three game play-off.

The schedule for the August 27th games are: Gripper Eyelet vs. Pinmakers, Brass Mills #1; Service Dept. vs. West Tool, Brass Mills #2; S.W. E.R.A. vs. Mills Div., Brass Mills #3 and Drafting vs. Mfg., City Mills.

Be Alert For Men Overhead

This man is working aloft — very much aloft—making repairs to a very tall stack at the Casting Shop. He is trained to follow precautions not only for his own safety, but also for those who may be below him.

One of his first safety measures is to close off the area directly below him to keep bystanders clear of objects which may fall and, if he finds it necessary to drop objects from above, he will provide a guarded "drop area".

Immediately upon completion of the job, he will remove such objects as tools, nuts, bolts, planks, etc. Serious accidents have occurred when loose objects were left on high places because vibrations often move them until they finally fall.

All these safety precautions taken on the part of the workman above are useless if the people below don't take heed and stay out of danger areas.

USE YOUR ASH TRAY AND SAVE OUR FORESTS!

Comfortable Though Hot

By Robert W. Butler, M. D.

An article in "Today's Health" by Ruth and Edward Brecher gave some rules on how to keep comfortable and healthy in hot weather. They're sound, and worth reading:

How can you help your own body stay comfortable and healthy when the mercury soars?

1. Drink plenty of liquids so you'll have plenty of moisture for sweating. Don't rely on thirst as a guide, for it sometimes lags behind need. Drinks may be either cold or warm — whichever you prefer.
2. Increase your salt intake somewhat to replace salt lost through sweating (unless you are on a low-salt diet).
3. Relax; the amount of heat you produce depends on your muscular activity.
4. Use fans to circulate air indoors, but don't sleep with the fan aimed directly at your body. Place the fan at the foot of the bed, tilted upward.
5. Wear a white jersey or gym shirt when sweating outdoors in the sun, to distribute the sweat and ward off some of the sun's heat.
6. Keep an eye on babies and small children; their sweat glands have limited capacity and they are therefore subject to heat exhaustion. When children are fretful in very hot weather, keep their heads moist by covering with a wetted cap or a handkerchief. A considerable part of the heat generated in a child's body is produced by the brain, so that cooling the head is essential. (Keeping your own hair wet is a good idea, too—if you don't take cold easily).
7. Avoid too much exposure to blazing sunshine — or any other source of intense heat — at any one time. It can lead to heat stroke. Older people and those who have been ill should be especially careful about over-exposure.
8. Be alert for symptoms of approaching heat prostration — dizzi-

ness, faintness, weariness and nausea. When these occur, it's time to call quits to activity. Get out of the sun, relax and sponge yourself off with cold water.

Try these things and you'll find they'll work. If you don't want to try 'em, you'll just have to wait until October.

barrels daily; a huge vapor recovery gas plant will have a capacity of 90 million cubic feet of gas a day.

Here also will be the world's largest sulfur recovery plant; a 50,000 kilowatt power station located on a 40-acre site, the total output of which will be used to meet the needs of the refinery; and other subsidiary units and facilities.

"Scoops" From Zippers

By Louise Foell

California is the next stop for *George O'Brien* and his family. We all extend our very best wishes for success to *George*.

Dot Martin is quite excited these days—daughter *Irma* was a very pretty bridesmaid recently and *Dot* is now a full fledged driver with a license.

Mary Scott becomes a favorite friend of all future brides that she knows: reason—she makes very pretty lace hankies for the bridal party and in colors to match.

Another Slide Fastener employee heading for permanent residence in California is *Kitty Cregan*. We send along our best wishes with *Kitty*.

Vacations are over for: *Bob Lynch*—back from Hammonasset; *Connie Campi*—her favorite spot, Dude Ranch, Lake George; *Hazel Brodeur*—a motor trip.

A brand new boat was christened *Ju-Nell* in New Hampshire recently. Captain *Edward Joseph* is in full charge. *Ju-Nell* represents two very lovely ladies in *Eddie's* home—his wife and daughter.

More new cars—a Dodge for *Ann Shainsky* and a Chevrolet for *Claire Daley*. Just in time for summer motoring.

Slide Fastener announces wedding bells for *Joan Lengyel* and *George Raczkauski*. The big event took place on August 18th. Congratulations to a nice couple.

John Mulcaby celebrated his 90th birthday on August 18th. *Mr. Mulcaby* is a retired Scovill guard. His daughter is *Mary Grady*, Wire Form, and his granddaughter is *Doris Grady*, Chain Machines. A very happy birthday to *John Mulcaby* from all of us in Slide Fastener.

Equipment, parts and material are moving in daily at the construction site. A Tidewater official recently stated that about 90 trucks and 10 freight cars, packed with everything from safety matches to huge transformers, are pouring in every day — with rush items arriving by airplane.

It is estimated that 10,000 freight loads and 70,000 truckloads will have been received by the time the Delaware Flying A Refinery is completed.

All of this material and engineering know-how is building a refinery of the future — one which will be a showplace of the oil industry and which will produce the finest of "Flying A" gasolines and "Veedol" motor oils to serve motorists and Scovill employees and products are playing an important part in bringing this about.

First Friday Club

The First Friday Club of Scovill will hold its monthly meeting at the Scovill Girls' Clubhouse on September 7, at 5:30 p.m.; dinner at 5:45 p.m.

Any male employee wishing to attend may do so by contacting any one of the following members on the activities committee: *Jim Burke*, Press #2; *Charles Shea*, Strip Mill Office; *Frank Miller*, Mill Production Office or *Al Baker*, Tube Mill Anneal.

Our tentative speaker is Rev. Tomney of the Blessed Sacrament Church.

Salt Tablet Season Is Still With Us

By Walter J. Racicot

Yep! Salt tablets are still fashionable during hot, humid weather and usually the month of August in "Brasstown, U.S.A." can be "dog-gone" hot.

Excessive sweating by men and women in production departments indicates loss of valuable body salt and this loss should be replaced by salt tablets or by adding more salt to food.

Medical science has shown that heat exhaustion and heat fatigue can be brought about by the loss of that precious mineral.

To replace salt loss, take one salt tablet (do not chew it) with each glass of water you drink during the day.

It is also advisable to increase your intake of fruit juices too, such as orange, lemon, grapefruit, lime, pineapple and tomato juices. Why? Because you lose your Vitamin "C" when you sweat.

Girls' Club News

By Juanita Addessio

We hear that *Jean Carlin* made a beautiful Maid of Honor at her sister's wedding recently.

Jo (HH) Byrrolly was feted at a birthday party by her family and friends — she is no longer a teenager.

Vacation

Margaret Snowden, Mill, & Grind., is off to Lake Placid for a week.

Rose Shea, Payroll, is motoring through New England for a week of relaxation.

Mary Shelly, Addressograph, will spend a week at home. I also hope that *Mary's* mother will be up and about real soon—she fell and broke her hip.

Ruth Peterson, Employee Activities, spent a week relaxing at Seaside, New Jersey.

Leona Deegan, Electric Shell, went up to Niagara Falls and then down to Washington, D. C.

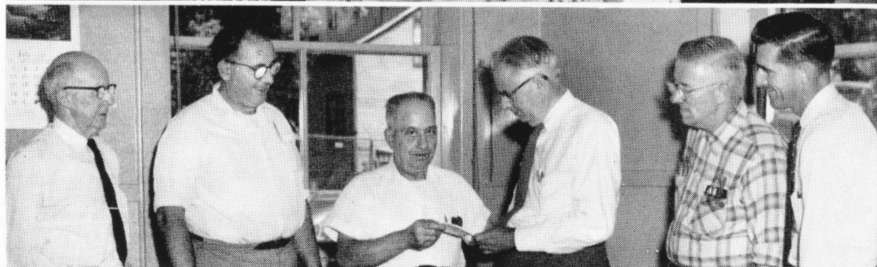

Marguerite Rossi and *Mary Caruso*, Platting, spent some time in Canada.

Martha O'Brien, Payroll, and daughter, *Eleanor*, went to Madison, Connecticut.

Hazel Carrington, Factory Accounting, and *Louise Bolt*, General Accounting, are going to the Cape with their families.

Antoinette "Tony" Polo, Payroll, was the guest of honor at a shower given by 35 of her co-workers, at the Carriage Drive. *Tony* is getting married September 8th to *Bill Albanese*.

Two Scovillites Honored On Retirement

Top photo:—*Michele Giusto* (at head of table) was guest of honor at a retirement party given by his friends and co-workers of the Hot Forge Dept. He was presented a purse and warm wishes for many happy years of retirement.

Bottom:—*Thomas Verrastro*, Waterville Foundry, who was retired recently, was presented a certificate in honor of his 33 years of continuous service. In photo:—Factory Supt. *F. J. Senior*, Foreman *W. J. Keating*, *Mr. Verrastro*, Plant Mgr. *L. G. Robinson*, Foundry Supt. *P. E. Malloy*, Gen. Foreman *R. H. Kozen*.

Witnessed Sinking Of Andrea Doria

Seaman Recruit *Richard Atherton*, son of *John Atherton*, *Gripper Eyelet*, was awarded a ribbon for his performance at the rescue scene of the liner, the *Andrea Doria*.

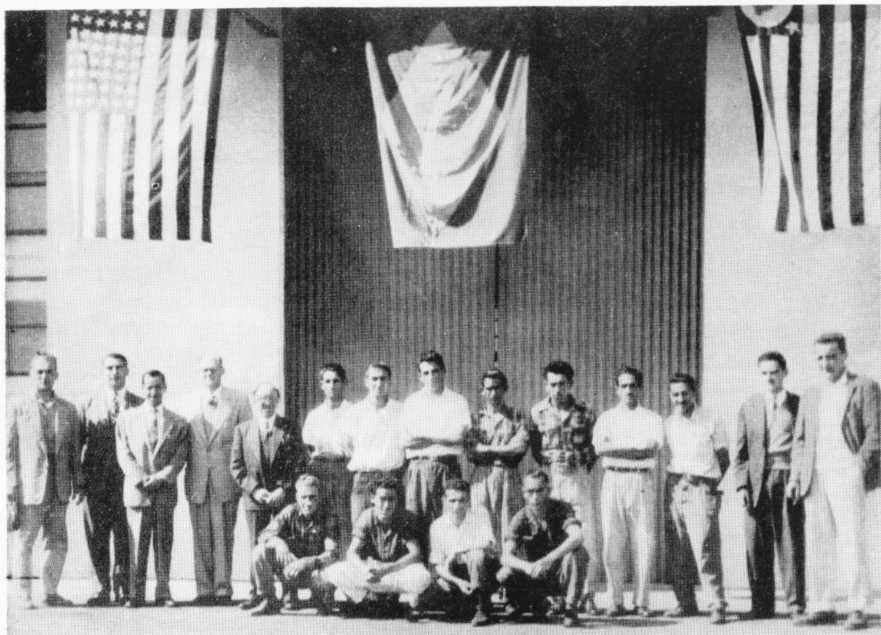

Seaman Recruit *Atherton* was stationed on the destroyer, U.S.S. *Heyliger* when it received a message to go to the aid of the *Andrea Doria* last July 26 when it collided with the *Stockholm*.

Arriving at the scene at 4:30 a.m., the crew of the *Heyliger* helped to

transfer the *Doria* passengers from lifeboats to its sister ship the U.S.S. *E. H. Allen* and to hook the vacant lifeboats and transfer them to the care of Coast Guard vessels.

Seaman Recruit *Atherton* and five other crew members of the *Heyliger* were the last to be on the *Andrea Doria* before it sank. Following the evacuation of all passengers, these six volunteers were each given a section of the ship to search for any remaining survivors. Completing this job they left the ship, together with the captain and 15 members of the *Doria's* crew, approximately 15 minutes before it sank a little after 10 a. m.

Schrader Brazilian Plant In Operation

Mr. Selden T. Williams, Vice President and General Manager of the A. Schrader's Son Division, is pictured (fifth from left) with the entire personnel of the division's plant in Jacarei, Brazil, on his trip there in July.

Actual production of tire valve parts got underway at the Jacarei, Brazil, plant of the A. Schrader's Son Division in June, according to report of Mr. S. T. Williams who returned recently from a visit to the plant.

While only parts of tire valves are being produced now, it is planned to have complete valves made at this plant in the very near future, with additional personnel hired as needed.

At the extreme left in the picture is Victor Kaczorek (of Brooklyn) who is on a temporary assignment as screw machine instructor. Next to him is the Asst. Manager, William Diener, an American, engaged in Brazil.

Third in the picture is Frank Fernandez (also from Brooklyn) who is Manager of the plant. Next is Earl Valet who has since returned to Brooklyn. At the extreme right is Carlo Manette, an Italian supervisor, hired in Brazil. The rest are Brazilian workers.

Mr. Williams reports all are surprised and very pleased with the mechanical aptitudes displayed by the Brazilians. With no other industries in the area (Jacarei is 47 miles from Sao Paulo) the men had never seen even a common twist drill and their ability to apply themselves to mechanical jobs has been amazing.

This new plant is an important new addition to Schrader's program to increase its international sales. It is well located to serve the large tire interests as well as the entire South American economy.

John J. Paszek, Tube Mill

Fishing Notes

By Ray Ladden

Your regular reporter is out for annual vacation, so I will try to fill his shoes.

Have a good rest *Charlie* and come back with a few fish stories of the ones that got away.

Since bass fishing opened up on July 1st, Woodtick has given up some big ones. *Les Hart* tells me that every week five or six big bass have hit the dust, weighing anywhere from two to six pounds. And you know the surprising thing about it is they are not all taken out at midnight. *Les* also said that just recently a 5½ pounder was caught in the bright sunshine.

A few calico have been caught that were of a pretty good size and, of course, bullheads, the old reliables, are always being taken out. Trout don't care to be caught during July and August out at Woodtick and the same for pickerel.

The water is down some but that is normal for July and August. We are keeping a good lookout to make sure it doesn't go down too low and harm our fishing.

Don't forget the Rod & Gun Club Outing on August 25, out at Woodtick. There are plenty of tickets available. See any of the committee — Ed DeBisschop, Henry Mill, Bob Anderson, Ray Ladden or John Hubbard.

Picnics scheduled at Woodtick during the week of August 20th are:

August 23—Cost Office

August 25—Rod and Gun Club

August 26—Men's Inter-Dept.

Bowling League

The Millwright Dept., Inter-Dept. Softball League, Oakville Production, Rod Mill and Employee Relations Dept. have tentative picnic dates set. These picnics will be held if enough interest is shown by the employees, otherwise they will be cancelled.

Three Succumb

BUDD SPICER, retired, died on August 2, 1956.

Mr. Spicer first came to Scovill in October, 1916, and had a continuous service record since March, 1920. He had always been a Millwright and was serving in that capacity when he was retired on June 1, 1947.

JOHN ST. LOUIS, retired, died on August 3, 1956.

Mr. St. Louis was hired in June, 1918, and had about 25 years of continuous service. He served in various departments until 1926, when he went to Pack A. He was a sweeper-floorman when retired on May 26, 1947.

PATRICK F. MURPHY, retired, died on August 11, 1956.

Mr. Murphy began his career at Scovill in 1908 and had a continuous service record since October, 1919. He served in various departments until 1921, when he went to the Mfg. Trucking Dept. where he was serving as a pan sorter and inspector when retired in April, 1953.
