Apprentices Presented Savings Bonds

In recognition of their outstanding showing in the recent state-wide contest for apprentices, Scovill presented U. S. Savings Bonds to first-place winner James Sutton and to the runners-up Robert Montory and Patrick Julian.

Hats Off To Payroll Dept.

Very few of us realize what is involved in making up weekly payrolls.

The proceedings get underway in the Payroll Department the first thing, Monday morning, when time and payroll reports are first available for the previous week.

All computations (gross pay, deductions, net pay) for each employee on the hourly and piecework payrolls must be in the hands of Mercer & Dunbar on Thursday. Salary pays must be finished on Wednesday. It is a difficult deadline to meet week after week.

Then comes a Thursday holiday, such as Thanksgiving. The plant is closed on Friday. The Company does not like to ask employees to make a special trip to the Pay Station on a day when they are not working. It does not like to ask employees to wait until the following Monday to receive their pay.

Thus, a heavier burden falls on the Payroll Department.

The Saturday and Sunday before Thanksgiving were just two more working days for Payroll Department employees but their efforts made it possible for all to be paid on Wednesday, two days ahead of schedule.

We take this opportunity to say a very sincere "Thank You" to the members of the Payroll Dept. as we know each employee of the Waterbury and Waterville divisions would like to do personally if it were possible.

Top photo:—Vice President A. C. Curtiss presents the bond to James Sutton, Hot Forge Toolroom. Looking on are Training Director C. A. DuBois (extreme left) and Tool and Forging Engineer G. C. Venter (right).

Bottom photo:—At the Waterville Division, Vice President and General Manager S. G. Gaillard made the presentations to Robert Montory and Patrick Julian. Left to right:—Mr. DuBois, Foreman of the Toolroom W. J. Gleason, Robert Montory, Patrick Julian, Mr. Gaillard and Plant Manager L. G. Robinson.

Retired Folks To Have Theatre Party

Our retired folks will be guests of Miss Julia Smith at the State Theatre on Thursday, December 13. Chairman George Hubbard asks members to be at the theatre by 12:45 p. m. and to be sure to have their cards (which are now being mailed) as tickets for themselves and one guest.

Five Retire

JAMES SHARKA, Attaching Machines, was retired as of Nov. 19, 1956.

Mr. Sharka came to Scovill in March, 1942, and has a continuous service record of 14.5 years. He served in the Chucking Dept. until October, 1945, when he went to the Attaching Machines as a floor man. Illness forced him to leave in May, 1956.

The following have retired from active service as of December 1, 1956.

MISS SARA FITZPATRICK, Metals Research, was hired Aug., 1906, and has 32.3 years of continuous service. She

Allocating 1957 United Funds Receipts

Waterbury area residents recently raised \$737,000.00 for support of the United Fund of Greater Waterbury.

The distribution of this money among the 38 member agencies is now being worked out. The allocation of the money is a job as big and important as the raising of the funds, for the dollars distributed must be measured in terms of human needs, not in mere columns of figures and rows of statistics.

A plan has been devised whereby five panels of citizens, with a specific group of member agencies assigned to each panel, will study the programs and financial need of the agencies. The panels will then submit their recommendations to the Central Budget Committee and, finally, to the Fund Board of Directors for final action.

(Continued on Page 3, Col. 2)

"Holiday Special" Blood Donor Day

Tuesday, December 18, has been set as the "Holiday Special" Blood Donor Day at Doolittle Hall.

All employees and members of their families are invited to join with Section #2 of the Waterbury Division in making this day another record-breaking day for the city. Last year, this visit netted 162 pints—with your help, this can be topped.

Departments included in Section #2 are:—Casting Shop, Hydro Press, Extruded Rod Mill, Tube Mill, Continuous Strip Mill, Steam Dept., Salvage, Metals Research, East Machine, Electrical, Plant Protection and various offices.

If your department is not on this list, contact the Employee Activities Office, Ext. 834, and make an appointment — the unit will be at Doolittle Hall from 1 to 5:30 p. m. on Dec. 18.

Support Your Community

A great many residents of the Waterbury area earn their living in local factories. Many others work in stores or in other establishments which render the many services so necessary to the well-being of the community. All who have a useful place in the community must prosper. They have invested in Waterbury's future. We can reward them by using their services.

There are, of course, difficulties in patronizing local stores. The parking situation is bad. But that is on the way to being corrected. We would certainly be inconvenienced if many of our local retail and service institutions closed shop. The only way to prevent that is to patronize them. In helping them, we help ourselves.

Vice President

A. H. Lanouette Presented 50-Year Award

Arthur H. Lanouette, Supervisor in the Waterville Div. Slotting & Townsend Dept., accepts his 50-year award from Vice Pres. and Gen. Manager S. G. Gaillard at a supper given in his honor at Phil's Restaurant recently. Approximately 150 people were present for the occasion. In photo (left to right):—Plant Manager L. G. Robinson, Mrs. Lanouette, Mr. Lanouette and Mr. Gaillard.

Toys For Christmas

The Scovill Girls' Club is planning to have packages for needy families again this Christmas. The Club is looking for new toys to put in these packages for girls or boys of all ages.

Some were collected at a card party recently. Others were bought by money earned at a Chinese auction, but they are still way under the quota.

If you have any new toys and would like to help, contact Margaret Snowden at ext. 2293 or leave the toys at the Hayden Street Gate.

Kids' Christmas Party

The annual Kids' Christmas Party will be held Saturday and Sunday, December 22 and 23, at Doolittle Hall from 2 to 4 p.m.

This party is for employees' children and grandchildren only — between the ages of 2 and 10.

Tickets are being sold on the first-come, first-served basis and are limited to 500 children for each day. Reservations must be in by Friday, December 14, in order to arrange for refreshments and a gift for each child.

Tickets may be obtained at the Employee Activities Office.

Were They Lucky?

Your attention must have been drawn to the notice posted in your department during the past week — with illustrations—telling of two very lucky employees who recently had their non-safety glasses smashed while working.

Lucky? Indeed it must have been sheer luck which prevented either one of them from losing at least one eye.

In the first accident — a long piece of wire broke and the flying end struck the victim's left lens. It was shattered but, fortunately, no damage to his eye — he WAS lucky!

In the second accident — The end of a strip of brass from a coil being removed from the "slitters" struck the right lens of this employee's glasses. Again, the lens was smashed but no injury to his eye. *He was lucky too.*

Both employees are now wearing prescription safety glasses — neither one is going to trust to luck again.

If you have to wear prescription glasses on the job, ask at the hospital about the cost of prescription safety glasses. You'll be surprised at the low cost.

You know, you might not be as lucky!

Slow Down And Be Sure

Racing out of the parking lot to beat the other fellow home at the end of a work day can develop into a dangerous habit. Others do it just to show off. It is one way to show how to get to a hospital quick. Be courteous and safe.

At the end of a work day, we're all thinking of our comfortable homes and hot suppers waiting there. But, that is no reason to race from the parking lot at breakneck speed to get to the nearest street exit. Your home will still be there if you're five minutes later than usual.

It is not only good manners to be a courteous driver, it is a safe practice.

Here are some safety suggestions for vehicle owners who drive to work:

1. Keep your automobile in safe operating condition.
2. Remember our plant speed limit is 10 miles per hour.
3. Give pedestrians the right of way on all plant roadways; these are also walkways.

How Can You Tell?

By Robert W. Butler, M. D.

The answer to that is, *you can't!* Often times it's a tough diagnosis for your doctor to make, and you can be pretty sure that if it's tough for him, it's impossible for *you* — so don't wait until you feel like you're falling apart at the seams before finding out!

You may feel pretty well. Your friends may tell you that you look like a million. You may be red, rosy and robust — but you may still have it; or your girl (or boy) friend may have it, and that makes you a good candidate if you *don't* happen to have it now.

Tuberculosis is a sneaky disease. Just remember that. It doesn't hit you all of a sudden like scarlet fever, measles, mumps, pneumonia, a headache or a broken leg. You just don't go to bed feeling fine and then awaken with symptoms — it just doesn't work that way. You can have it, and it can be active for months before you're sick enough to feel that you have to see the doctor. Multiply those months by 3, 4, 5, 6, 7, 8, 9 or 10, and that's the length of time you can figure for a cure. Not painful, but expensive.

In this age of milk pasteurization, most of the germs which cause tuberculosis come from people who have the disease. The bug itself is so small that it must be magnified about 500 times to be visible to the human eye. (Too bad it isn't as big as a wasp so that you'd know at once when you were bitten!)

Nobody is immune to this disease. It's not hereditary, although some people apparently have more resistance to it than others. You're never born with it—you absorb it sometime between the cradle and the grave if you're going to get it, and you'll get it from contact with someone who has it. He, by the way, got it from someone else.

Precaution, once more, if you'll pardon me for harping on it, is what will ultimately eliminate the disease. I can

remember with a shaking shudder having consumed my share of "spoon cream" during vacations in New Hampshire many years ago. Now spoon cream meant just what it said: it was solid—you could take a spoonful of it, turn it upside down and it would stay in the spoon; defying all the laws of gravity. It was God's greatest gift to coffee, but it *wasn't* pasteurized, and I was lucky, in my ignorance, that's all.

Don't drink any unpasteurized milk anywhere — or any other dairy products made from it, either. Also, be sure that any meat you eat is thoroughly cooked. What'll it be — you or TB?

That's all pretty simple, but avoiding germs of human origin is a bit more difficult. It can be done with a little thought — constant thought, that is, and by following a few rules:

To begin with, *keep in good general health.* That means: get enough rest and sleep, enough exercise, and eat a balanced diet — every day.

Avoid the coughers; but remember that while TB is much more common in the lungs than elsewhere, it can attack almost any part of your anatomy. So, keep *clean.* Germs don't like soap and water, so wash your hands before putting them near your face, and before handling food. And don't eat or drink in *any* place where the food-handlers are not clean or where they don't do a real job of sterilizing dishes and utensils.

Have a physical examination and chest X-ray once a year. If you feel good and the doctor finds nothing wrong, you'll feel better than ever. If you have no symptoms and he still finds you have early TB, get the right prescription and you're a 10 to 1 shot to be around, active and working 10 years from now. And you may well catch it before you pass it on to other members of your family, too.

(Continued on Page 3, Column 2)

Service Awards

Twenty-Five Years

Thomas F. McAvoy
Waterville
November 30, 1956

Charles C. Berardi
Tube Mill
December 1, 1956

Ten Years

November 20—*Albert J. Rosenbeck*, Casting Shop; November 21 — *Michael Buczak*, Waterville; November 25 — *Robert G. Pryor*, Electrical; November 26 — *Genevieve S. Gensler*, Slide Fastener Assembly; *Milton E. Harvey*, Steam Dept.; November 29—*William A. Finnegan*, Electrical.

Rod And Gun Club

It happened during the last and final lap of the Reeves Competition.

Ray Ladden and *Danny Camerota* as usual fished together. *Danny* was pretty well ahead on points and had a fighting chance for the 1956 championship.

About two o'clock *Danny's* float went down and, with superb skill, a 15½ inch trout was hooked and netted.

Danny produced a hunk of rawhide, carefully tied the trout, and thoughtfully hung it over the side of the boat. Fish have been known to shrink as much as half an inch unless kept in water, that is, with the exception of course of the now-famous *Rothnagel* pickerel, which actually increased in size!

You can't count your chickens before they are hatched, nor can you count your fish before they are officially measured in—but here was a sure thing! A 15½ inch trout is hard to beat.

After a while *Ray* and *Dan* decided to move. Just what happened isn't quite clear but—the trout and rawhide got loose and sank to the bottom. For more than three hours the boys tried everything but dive in in order to retrieve the trout. Finally came quitting time and two very disappointed fishermen gave up in despair and rowed in.

What about that trout? It meant the difference between being a contestant and a champion—for, if the trout had been measured in, *Danny Camerota* would have been the undisputed champion of 1956!

Mighty hunters are some of our Scovill men!

Art Lobley, without his *Ruth* who went to Florida instead, bagged two deer, one in Maine and one in Vermont.

Harry Walenda shot a buck, trailed him for five hours and lost him.

Dan Camerota got his deer and didn't lose it!

Louie Veilleux went with a group of "Automatic Rifle" hunters. The first day out *Louie* saw his pals in action with bullets flying in all directions. "I think I stay in cabin," mused *Louie*. He did and got home safe. Smart man, that *Louie*.

Choral Society

The Scovill Choral Society practices every Wednesday from 5:30 to 6:30 p. m. at the Girls' Clubhouse.

It has developed into a fine singing group of popular and secular music under the able direction of Ernest McCorkle. The group welcomes all who are interested in joining.

At the present time, of course, Christmas selections are being practiced at the rehearsals.

Retirements

(Continued from Page 1, Column 2)

served in various departments until May, 1925, when she went to Metals Research as a steno-clerk.

MRS. HATTIE MURTHA, Elec. Shell, first came to Scovill in Nov., 1915, and has a continuous service record of 27.6 years. She served in various departments in the Manufacturing Division until April, 1946, when she went to the Electric Shell Dept. as an assembler, inspector and packer.

EDWARD SKIBINSKI, Box Shop, came to Scovill in November, 1942, and has a continuous service record of 14.1 years. Always in the Box Shop, he was serving as a sawer when retired.

MRS. JULIA VALENTINO, Assembling, was hired in August, 1918, and has a continuous service record of 37.8 years. She has served in various manufacturing departments and, since Feb., 1937, she has been in the Assem. Room as a foot press operator.

How Can You Tell?

(Continued from Page 2, Col. 4)

Incidentally, while this is certainly no fund-raising corner, why not pass up the purchase of three or four packages of cigarets and buy Christmas seals? They produce the funds which fight this disease twelve months a year—and will ultimately wipe it out. That or your own continuing sensible precautions may well mean the saving of your own life or that of your children!

United Fund

(Continued from Page 1, Column 3)

Approximately 125 men and women are serving on the panels. They have been drawn from all fields of community interests and activities—housewives, businessmen, labor union members, school teachers, industrialists, newspapermen, clubwomen, clergymen. All creeds and colors are represented.

Panel meetings are held at one of the agencies assigned to the panel. The first hour is spent in observing the operations and discussing them with the staff. In the second section of the meeting, the panel goes into a detailed examination of the financing of the agency, and its job is then to balance the needs and services it has surveyed with the agency's requested amount of United Fund dollars and the amount that can be allocated.

Meetings are now being held and every effort is being made to complete the job before the end of the year so the agencies will know what their United Fund allocation will be by the first of the year.

Modernization Program In Blanking Room

Luigi Marinaccio, Blanking Room, presses the button which automatically starts the new Warco 100-ton double action press. The coil of metal has been put on the "Easy Load" (bottom right corner), through the solution box, and set into the machine ready to be cut and formed into specified sized shells.

One of the new machines included in the modernization and replacement program now taking place in the Blanking Room is the Warco 100-ton double action press. This press is one of the newest and most modern of its type.

It is heavier, bigger and faster than the machine it replaces. It is completely automatic with the latest features in electrical controls.

The old type press was a hand pull feed machine which required the metal to be pulled through the machine by hand.

Other features of the Warco include the central lubricating system which eliminates the oil can used with the old press; it has a completely automatic electronic safety device which will stop the machine instantaneously if anything goes wrong during the operation.

Ice Follies Tickets

The 1957 Ice Follies' discount tickets for the evening performance to be held Sunday, December 9, may be obtained at the Employee Activities Off.

Tickets for all other performances (December 10 to December 16) may be obtained at the regular price.

This new Warco is used for double action cut-and-draw and cut-and-form work. It has a 100-ton capacity compared to the old machine which had only a 87-ton capacity.

The coil of metal is placed on an "Easy Load"; from there the metal goes through a solution box where it is lubricated, then runs through the front feed rolls and into the center of the machine where the dies are set to cut a certain size and type shell. The shell goes down a chute set at the side of the machine and into a barrel, ready for further processing or for shipment. The skeleton passes on through the back feed roll of the machine; is chopped up and goes into a scrap pan.

Christmas Card Mailing In Plant

The Mailing Dept. is asking the cooperation of employees on the matter of mailing Christmas cards in the plant. They ask that you give the full name of the employee and write out the name of the department employee works in—do not use Dept. numbers.

Rod And Gun Club Hold Annual Fishing Banquet

Doolittle Hall was the scene of the well attended annual Rod and Gun Club Fishing Banquet. These fishermen had a wonderful steak dinner, speakers and sportsmen's movies. Left photo:—*Ray Ladden*, SERA Fishing Chairman, draws the lucky numbers for the door prizes.

Others at the head table are Vice President *Alan C. Curtiss*, Judge *Francis T. Reeves* and SERA President *Albert Kean*. Right photo:—*Nelson Smith*, Rod Finishing, and *John Matulunas*, Multiple Spindle Screw Machine, shared the honors as top fishermen for the 1956 season.

Averyll Bradshaw Is Bid A Fond Farewell

The girls of the Telephone Dept. bid a fond farewell to Averyll Bradshaw (second from left) who left the department to take up household duties. They presented her a purse and a cake. Averyll is flanked by Josephine Byrolly and Chief Operator Helen McAvoy. Smiling their approval are the Scovill operators (left to right) Esther Meramble, Helen Hayes and Phyllis Normand.

Mail Early For Christmas

Pointing up the need for your cooperation on his 1956 "Mail Early for Christmas" campaign, Postmaster William J. Phelan says if you will follow these three simple rules, all of your gifts can be delivered before Christmas day: *wrap them securely, address them correctly and mail them early.*

Amplifying these rules, the Postmaster said "Avoid the risk of mailing poorly wrapped packages. Use corrugated mailing cartons, plenty of heavy brown wrapping paper and be sure that every package is tied with

strong cord. Cartons containing several gift packages should be stuffed with tissue or old newspapers to cushion the shocks."

Speaking about correct addressing of Christmas gifts and cards, the Postmaster said, "Be sure your Christmas mailing list is up to date and that you have the complete name, address, zone number, city and state for everyone on your list. Send all your Christmas cards by First-Class mail, because they will be processed and delivered quicker, and they'll be forwarded or returned, if it becomes necessary."

Only Christmas cards sent First-Class may carry written messages, a custom everyone enjoys. Moreover, Christmas card envelopes smaller than 2 3/4" by 4" or larger than 9" by 12" require hand cancellation, and thus must carry First-Class postage.

The Postmaster urges everyone to secure free labels at the Post Office marked *All for Local Delivery* and *All for Out of Town Delivery*. Then, sort your Christmas cards accordingly, tie them in two separate bundles with each address facing the same way, attach the correct label to each bundle.

Early mailing of all Christmas gifts and cards is the biggest factor in getting everything delivered before Christmas, according to the Postmaster. The whole Christmas mailing period is a battle against time. Delays now in getting your Christmas cards and gift packages to the Post Office may cause a slow-up all along the line.

In conclusion the Postmaster said that he was glad to see that many people are getting the Christmas gifts and cards for distant points mailed this week, pointing out that all mail going *Long Distance* should be sent before *December 10th*. Christmas packages for *Local Delivery* should be mailed by *December 15th*.

Girls' Club News

By Teresa Ryan

The annual Kiddie's Christmas Party for children and grandchildren of Scovill employees will be held at Doolittle Hall on December 22nd and 23rd. Tickets for children from 2 to 10 years of age may be obtained by contacting any council member or through the Employee Activities Office. There will be entertainment, refreshments and a gift, plus Santa Claus.

We are still looking for new toys for our needy families. Anyone wishing to donate a toy to some underprivileged child may do so by contacting Margaret Snowden of Milling and Grinding.

The girls in the Cost Office are doing a grand job dressing dolls for this drive to help make some less fortunate children happy.

Mr. and Mrs. Michael Kuba (Angeline Cidella, Press #1) have been honeymooning in Florida for three weeks.

Shirley Schnierer, Payroll, is quite elated over a recent weekend spent in Danbury (the hat city). She hopes to weekend there soon again.

Barbara Roche, Payroll, has taken up her new duties at the Employment Office. We will miss her bright and sunny smile in Payroll. Lots of luck, Barbara.

Mr. and Mrs. John Daniels (Vickie of Closing) are vacationing for two weeks in Florida.

Betty Doyle, Teletype, was pleasantly surprised at a miscellaneous shower on November 26th given by her friends and associates.

Pinochle Tournament

The Scovill pinochle tournament is now in full swing with stiff and interesting competition between the teams. So far in the first round, Matulunas' team is ahead with 202,295 points, followed by Laudate's boys with 195,940 points and Mancini's team with 190,130 points.

Team scores for the evening of November 15 were: Matulunas' team 26,610 points, Mancini's team 24,815 points and Laudate's team 23,420.

Individual high scores for the evening went to Archie Hollywood with 4,395 points and William Phelan with 4,125 points.

Three Succumb

CHARLES A. KLOBEDANZ, retired, died on November 15, 1956.

Mr. Klobedanz came to Scovill in August, 1917, and had a continuous service record since April, 1924. He had served in the Machine Room, and in the Tube, Rod and North Mills. In 1924, Mr. Klobedanz went to the Rod Mill where he was serving as a die polisher when retired in August, 1949.

GEORGE TREPANIER, Products Development Lab, died on Nov. 22, 1956.

Mr. Trepanier first came to Scovill in 1926, and left in November, 1931. During this period most of his service was in the Lacquer Room. Mr. Trepanier returned to Scovill September 13, 1956, as a lab assistant in the Products Development Lab. Illness forced him to leave on October 29th.

GEORGE WILEY, retired, died on November 26, 1956.

Mr. Wiley who came to Scovill in September, 1912, had a continuous service record since February, 1915. Always in the Tool and Machine Division, Mr. Wiley was serving as a grinding instructor in Milling and Grinding when retired in June, 1949.

Boy's maroon sport jacket, \$5, black and white plaid wool shirt, \$2, both size 8; combat boots, size 5, \$2. Call 6-5973 after 4 p. m.

American Flyer "S" gauge passenger train, whistle, transformer, 2 switches, crossover, crossing gate, uncoupler, 23 straight and 21 curved sections, \$25. Call Cheshire BRowning 2-8207.

Heatbath gas burner for kitchen range, used 2 months, original cost \$98 will sell for \$50; 12' Elgin runabout with trailer and motor, \$325, used 6 times; refrigerator, 2 years old. Call 4-0565.

Walnut finish desk, typewriter compartment, 40 x 21" top, 6 drawers, antique brass finish handles, good condition; 4-burner Estate gas range, large oven, separate broiler oven, white, excellent condition; Federal model #269 enlarger, 4-way easel, case, like new. Call 5-6458 after 5 p. m.

Single metal panel bed, spring, good condition; grey and red kitchen table, formica top, extension leaf, perfect condition, \$15. Call 4-6293.
