Headed Products Line Opened

The relocated production facilities of the Headed Products Line in the Waterbury East Plant were officially opened at ceremonies held at the site on August 13, 1959. The opening marked completion of the transfer of all Waterville operations, except the brass and aluminum sand casting foundry, to Waterbury.

Since January, a good many Scovill people have worked hard to complete the transfer. The Waterville plumbing

lines were moved into available space in the Waterbury West Plant. Together with the Foundry (the only Scovill operation now remaining at Waterville), the Plumbing lines were established as a new division — the Plumbers Brass and Foundry Division—under General Manager Arthur H. Goepel. Office employees of the new division are head-quartered on the second floor of the Employee Relations Building.

Many pieces of equipment had to be moved, and extensive site preparations were required before Waterville's Industrial Fastener Line (now known as Headed Products) could be transferred into its new location in Bldg. 136. The

ceremonies were a fitting tribute to a job well done. The Headed Products Line is now a part of the Screw Products and Forging Division.

Executive Vice President Mark L. Sperry, 2nd, opened the official ceremony on August 13th by introducing Company and Union officials and outside guests to the employees of the new department, all of whom had been invited to attend. In honor of the occasion, George A. Goss, Jr., former General Manager of Waterville Division, presented a large brass key, which had been cast at the Waterville Foundry, to Willis H. Machin, Vice President

OLD PLATING ROOM AT WATERVILLE PLANT

NEW PLATING FACILITIES IN WATERBURY

OLD PRODUCTION LINE AT WATERVILLE

NEW WATERBURY SET-UP IS TYPICAL

MEMO *from Management:*

Investment In Faith

The pictures on page one of this issue of the *BULLETIN* show a lot more than the contrast between old and new facilities for the production of headed products, which include hundreds of items from spikes for golf shoes to the industrial fasteners which hold together so many things of living.

For years, these fasteners were made in Waterville. They were well-made. But the old Waterville plant could not make both fasteners and money, under today's pressures of domestic and foreign competition. So our company was faced with choosing one of four courses:—

- shut down
- sell out
- move away
- stay home and rebuild

Scovill elected to try it the hard way, by consolidating Waterville operations in Waterbury. But to keep this business, keep these jobs, and hope for a profit has meant a sizeable outlay of money — the hard money a corporation has to figure as carefully as a family.

While a good location could be made available in the former case shop in Bldg. #136, some heavy equipment had to be moved out. A \$25,000 extension of the forge shop had to be built to house heat-treating equipment. A new floor was needed, and new lighting. If you've ever installed a single fluorescent fixture in a kitchen, you can imagine what it costs to light up 50,000 square feet of floor space to the level of good workmanship.

Just to paint this new "factory within a factory" cost \$12,000 for materials and labor. That is equivalent to painting 200 kitchens. The machines are newly painted, too. All in all, the new headed fastener facility is a proud place to work. All in all, it cost the company about a quarter of a million dollars for preparation, and moving. New equipment and structure bring the total to half a million—to keep this business and these jobs in Waterbury.

The pictures show also the progress Scovill is making to improve its profit position through improvement and cost reduction programs. It takes money to make money or save money; and it takes work to make the investment pay off.

Management has spent this money in the hope of making the profits that provide money for growth, and dividends. Management has provided the facilities; it is up to the people of Scovill — all of us — to provide the productivity that justifies this investment in faith.

SERA To Hold Annual Meeting

The annual membership meeting of the Scovill Employee Recreation Association, Inc. will be held on Tuesday, September 15, 1959, at 8:00 p. m. at the Scovill Girls' Clubhouse.

All employees of the Waterbury (including New Milford) and Oakville divisions are members of the association and are urged to attend.

Reports of the past year's activities will be given; election of the Board of Directors will be held; and members will be asked to vote on amendments to the Constitution.

The proposed amendments involve changing the wording of pertinent articles which refer to "employees of all Waterbury, Oakville and Waterville Divisions" to read "all Waterbury and Oakville Divisions". Articles which include reference to divisions in the Waterbury plant will be changed to provide for all divisions as presently established in Waterbury.

The Nominating Committee which will present a slate of candidates for election to the Board is made up of: Eleanor Fitzpatrick, Closure Div.; William Warner, Offices; Vincent Manzoli, Manufacturing Div.; Margaret Sanchi, Mills; Leonard Campoli, Service Div.; Dennis Mollica, Screw Products; John Sullivan, Oakville Div.; and Theodore Szczepanski, presently of Screw Products but representing Waterville Div. in accordance with present By-laws.

As provided by the By-laws: the Board of Directors will also have nominated four people from departments not represented on the list submitted by the Nominating Committee. Additional nominations (not to exceed five) will be accepted from the floor. The nominee must be present at the meeting to accept nomination or the person making the nomination must have written proof of the proposed candidate's willingness to accept.

Following the annual membership meeting, the newly elected Board will meet to elect officers of the association for the coming year.

Union Contract

Copies of the new agreement between the Company and the Union are now available. Employees wishing to have a copy of the agreement, as amended June 30, 1959, may have one by stopping in at the Employment Office.

and General Manager of the Screw Products and Forging Division.

President Selden T. Williams congratulated all those who had worked so hard to accomplish this move. He emphasized that while the opening ceremony signified our pride of accomplishment through united effort, it was also a time for serious thought, continuous resolve and for determination to make this department fulfill its promise. He stated that the decision to keep this operation alive in Waterbury has cost the company a good deal of money — and will cost a good deal more if we are to remain competitive. "I hope for the good of the stockholders, the employees of the company, and the community that it pays off."

50, 40, AND 25-YEAR SERVICE RECORDS HONORED. President S. T. Williams congratulates Mollie Collins on the completion of 50 years of continuous service; Marie Elward, 40 years; Mary Spokas, 25 years; Fragher Knight, 25 years; Patrick (John) Cronan, 25 years; and Peter Genovese, 25 years.

New Assignments

Closure Div.

G. M. WILLIAMS, JR.—Production Manager in charge of Dept. 678, in addition to assisting the Works Manager on special assignments.

WILLIAM MCGRATH — Foreman, Closure Tool & Machine Dept. 376.

RAYMOND SZCZEPANSKI — Asst. Foreman, Closure Tool & Mach. Dept.

Maintenance Div.

GEORGE BLOCK—is responsible for the operation of the Roll Grinding Room, Dept. 302, which is now under direction of the East Machine Room. Mr. Block is foreman of East Machine.

Mills Div.

ELBERT SPERRING—Quality Control Engineer, Metals Research Dept.

Purchasing Dept.

ELBERT E. COLEY—in charge of Oil House, Dept. 656, in addition to his duties as Foreman of General Stores, Depts. 631 and 655.

Training Course

METHODS OBSERVER. Alfred Burch was graduated as of Aug. 16, 1959 and has been assigned to the Planning Dept.

DRAFTSMAN. George Lautenschlager graduated as of Sept. 6, 1959 and has been assigned to the Drafting Room.

TOOLMAKER. Charles Seeley completed his training as of Sept. 6, 1959 and has been assigned to Mfg. Eyelet.

NEW RE-ATTACHABLE COUPLING FOR GAS PUMP HOSE

PERMANENTLY-ATTACHED COUPLING

Girls' Club News

By Juanita Adessio

Our best wishes to *Mollie Collins* on her retirement. We take this opportunity to thank her for all the help she has given the Club throughout her years of association, which began in 1936—that's when she joined the Club. *Mollie* has served on various committees, has been treasurer, vice president twice and was President in 1954. Keep in touch, *Mollie!*

Our Card Party is being planned for October 12th—so please bear this date in mind. It certainly ought to be an easy one to remember. We're looking forward to meeting our new members at this time as well as you older members. There'll be a door prize, table prizes, Chinese auction and refreshments. You'll receive notices soon.

Dues for the third quarter will be deducted this month. If they are not deducted from your pay, please contact a Council member as you might consider yourself a member but, according to our present records, you might not be. Over a period of time, you might have been actively employed, laid off and rehired—if you had not been contacted as to whether or not you wished to be reinstated in the Club, you are probably still listed in our inactive group. We try to contact all members—active and inactive—but it isn't always possible.

We hope soon to be able to contact every girl in the plant who is not now listed as a member, to check her status or to invite her to join the club.

The SERA Children's Day Camp is now closed for the season and we are happy to report that the Girls' Club sponsored 30 children to the camp this year. (Hear they had quite a ball!)

Della Riccio, secretary, reports the Bowling League gets underway at Sena's Recreation Center on Thursday, Sept. 10th at 5:15 p. m. Betty Colbasanni is Treasurer for the group.

Hose Coupling Line Expanded

The General Manufacturing Division in its constant drive to keep abreast of the customers' likes and demands, has expanded its Industrial Hose Coupling line by adding a line of Re-attachable Couplings.

Scovill has made a line of Permanently-attached couplings since the mid-30's. In fact, Scovill was the first company to make this type of coupling.

The new Re-attachable Couplings are being made for use on gasoline

pump hose. They are machined from brass rod and finished with a polished chrome plated surface.

One of the advantages of the couplings is that they can be taken off a used length of hose and re-attached to a new length.

Although there are other Re-attachable Couplings on the market, ours have several advantages that our competitors' do not have. For one, ours have wider wrench surfaces which make them easier to attach. Another feature is that our construction prevents any possibility of leakage.

PETITE BUT POWERFUL. Our Hamilton Beach Division's new "batbox" vacuum cleaner was featured at the Summer Housewares Show in Atlantic City last month.

Pictured in a demonstration of its power, the vacuum cleaner inflated this C.I.D. air house with a volume of 3,665 cubic feet of air in 1 hour and 52 minutes. The air house, measuring 30 x 20 x 10 feet, is made of U. S. Rubber Fiberthin. Housewife-model

Ingeborg Jorgenson vacuums the rug with intake hose while another, connected to the cleaner exhaust, maintains full air pressure for the house. The new cleaner houses a full horse-power motor and is fashion-endorsed by hat designer Lilly Dache.

Retirements

WILLIAM DAVIES, Gauge-Slitter and Trimmer, North Mill, retired as of July 20, 1959 with 34.2 years of service.

CARMINE CIPRIANO, toolmaker in Manufacturing Eyelet Tool Room, retired on August 1, 1959 with 47.2 years of service.

JOHN MEIER, toolsetter in New Milford Tube Mill, retired as of August 3, 1959 with 24.4 years' service.

September 1 Retirements

BRONISLAVAS BIVAINIS, Productive Helper in Scrap Processing—26.2 yrs.

MARY (MOLLIE) COLLINS, Service Timekeeper in Trucking—50 yrs., 1 mo.

FREDERIC W. COLUCCI, toolsetter in Screw Machine - Multiple Spindles—17.3 years.

HENRY T. DODD, Foreman in Slide Fast. Tool — 39 yrs., 4 mos.

ANNA FANNING, Assembler in Assembling Dept.—34.6 years.

WALTER R. FIFTAL, Assistant Foreman in Plumbers Brass Tool Room—40 yrs., 10 mos.

CORNELIUS GRANOTH, Foreman in Slotters & Threaders—43 years.

BERTHA LANE, Assembler in Assembling Dept.—20.7 years.

MARIE LAPIERRE, Assembler in Waterville Assembly Dept.—13.6 years.

EVELYN P. MALTBY, Manufacturing Timekeeper in Packing A—16 yrs., 7 mos.

WALTER J. MASSE, annealer's helper in New Milford Tube Mill—36.6 years.

JOSEPHINE A. MCCARTHY, Manufacturing Timekeeper in Closing Room—49 yrs., 5 mos.

NEWELL PORCH, Foreman in Head, Rehead & Clip Dept.—28 yrs., 7 mos.

Your Social Security

You don't have to be old to get protection of social security.

Even if you are a teenager, you start building toward financial security on your first job. Then, when you marry and raise a family, you'll have the peace of mind that comes with knowing they will have a steady basic income in case of your death.

Tell your family about the survivor benefits payable to them. It's good business to know *your* rights under social security.

PARTIES AND PURSES FOR RETIRING EMPLOYEES. Among the August retirees feted by co-workers at lunch-hour parties were (top photo) Nellie Grysko of Press 2 and (lower photo) Carmine Cipriano of the Manufacturing Eyelet Tool Room.

Retired Folks' Club

The date of the Retired Folks' Club picnic at Woodtick has been changed to Tuesday, September 15th.

Notice of the meeting will be sent to all members with details.

With Our Retired Folks

Our sincere congratulations and best wishes for many more years of happiness to Mr. and Mrs. Joseph Vance who celebrate their 50th wedding anniversary on September 9th. Joe retired in 1951 after 35 years of service.

Donald MacIntosh, Sr., says "tis really a small world." He retired in March, 1958 and this summer returned to his native Scotland after 49 years absence. In a hotel lobby in Perth, Don thought he recognized another American standing close by. On introducing himself, he discovered the other man to be a Jock McNaughton of Detroit, Michigan. The two men had served their apprenticeships together in Scotland, both left their homeland in 1910 and this was the first trip home for either of them!

HARRY A. ANDERSEN RETIRES. Mr. A. O. Wolf, General Manager of the Hamilton Beach Division, presents a gift to Mr. Andersen on behalf of his associates together with their sincere wishes for a long and happy retirement.

Harry Andersen, works manager at Hamilton Beach Company Division, retired after 48 years of outstanding service. In years of service, Mr. Andersen was the oldest Hamilton Beach employee, having joined the company in 1911 as a stockkeeper. He was later promoted to purchasing agent and assumed the duties of works manager in 1926.

MICHAEL CATUCCIO FIRST WISE OWL. *General Mfg. Div. Works Manager George L. Chase presents Wise Owl Club membership certificate to Michael Catuccio. Onlookers are Safety Engineer W. M. McClesney, Milling & Grinding Foreman C. A. Anderson and Wise Owl Committee Chairman J. M. Burrall.*

The first Scovillite to become a member of the Wise Owl Club is Michael Catuccio of the Milling & Grinding Dept. who became eligible for membership when his prescription safety glasses saved one of his eyes. While at work, his safety glasses were struck and damaged by a flying wrench — but, there was no injury to his eye.

Wise Owl Clubs, sponsored by the National Society for the Prevention of Blindness, are established in over 2,000 plants throughout the country. The Society recognizes that all accidents cannot be prevented but that needless eye injuries and tragic loss of sight can be prevented by use of safety glasses.

In unavoidable accident situations which grow fewer each year, the committee hopes that all employees will be Wise Owls with safety glasses protecting their eyes.

"Nice slide, Dad—You're SAFE at home!"

How Much Can You Do?

By Robert W. Butler, M.D.

These are trying times on the human anatomy. The pace is fast—how long will you last?

We are afflicted with speed in these modern times with everyone in a hurry to get away from where he is; and after he gets there, he is in just as great a hurry to get back to the place he left. One look at the highways on a good weekend offers more than ample proof of this—people are trying to live two weeks in two days.

Twenty or thirty years ago an automobile was a luxury. Now it seems to have become almost a necessity in this age of speed, which is perfectly alright (we're not agin automobiles) as long as the owner doesn't kill himself getting to own it or to support it. When a man owns the car, that's fine—but when the car owns the man, that's no good.

We mention the automobile only because it is the most outstanding of many things which keep too many noses constantly at too many grindstones.

Many people are working extra hours at extra jobs to make extra money to buy things they could get along without, or to buy things costlier than they need. Fancy automobiles, TV sets, boats, radios, etc., have put many men in bed, some of them in the grave.

We all have emergencies at times which require more money than our regular income provides, and for a short period most of us can take the strain demanded by extra work. There is a limit, however, and if we exceed it, we must be prepared to pay the

Obituaries

OSMAN HALIM died on August 8, 1959 after a month's illness.

Mr. Halim was serving as a caster's helper when stricken in late July. He had been employed in Scovill since April, 1930.

JACK BASSETT died on August 9, 1959 after a brief illness.

Mr. Bassett was serving as a jitney driver in the Casting Shop when illness forced him to leave last March. He had over 18 years' service.

CHARLES MOSGROVE died on August 24 following a short illness.

Mr. Mosgrove was serving in the Repair Dept. as a repairman when he retired in August, 1953 with over 39 years of continuous service.

In addition to the illnesses which result from excessively long hours of work, many accidents at home, at work, and on the road—some of them fatal by the way—are the direct result of fatigue.

Better to watch the program on a small TV set, and to ride in a car with a little less class than to ride in a wheel chair or a hearse. It *can* happen here, you know, and what's the use of owning something you can't use or even see?

Modern medicine has done much to prolong the normal life span, and a great deal of the progress made has been cancelled out by the speed of modern living.

Our older people today, who are living longer than their parents, lived the simpler life in their early years—no automobiles to speed them up, no movies, radios, or television to *keep* them up.

Wonder what the length of life and state of health will show 25 years from now? Could be interesting. Let's slow up a bit and become a statistic in the right column!

Fishing Notes

Tentative plans for the 1959 Reeves' Competition have scheduled the following fishing dates:—

September 12th and 26th

October 10th and 24th

As soon as approval is obtained from the SERA Fishing Committee, notices will be distributed.

Fifteen Respond To Blood "SOS" Call

A Scovill employee recently underwent open heart surgery at Grace-New Haven Hospital—a major operation for which live blood must be available.

The Employee Activities Office called employees known to have the particular type of blood needed. Without hesitation the first 15 people called said they were willing to help.

The operation was scheduled for 9 a. m. at Grace-New Haven, and the donors were required to be there by 7:30. They met at the Hayden Street Gate where transportation was provided for them; were on their way at 6:45 a. m. and returned to work immediately after donating blood.

The fact that the employee in need was a stranger was not given a second thought — all these volunteers knew was that a fellow human being was in trouble and they could help. Coming from various parts of the plant, the donors were:—

Eugenie Ashe, Strip Mill; William Aureli, Slide Fastener Design; Anthony Brooks, East Power; Joseph Butler, Strip Mill; Mary Corbett, Purchasing; Leonard Corrado, Strip Mill; Gertrude Degnan, Hot Forge.

Also, Winston Ferson, Casting; Charles Green, Metals Research; Raymond Ladden, B & F Production; Katherine McHale, Transcribing; Vincent Polzella, Cosmetic Container; Emil Roberge, Hot Forge; Genevieve Robillard, East Hospital; Alvin Turner, Pack. A.

SERA Golf Outing

All Scovill golfers are invited to participate in the SERA Annual Golf Outing on Saturday, October 3, at the Southington Country Club.

Entry blanks are being sent to all departments and known golfers and also are available at the Employee Activities Office. Deadline for registrations, together with \$2.00 entry fee, is noon hour on Thursday, October 1st.

Tee-off time is set for 7 to 9 a. m. in order of arrival. The little green truck with food and refreshments will be on hand starting at 10 a. m. The greens fee of \$2.00 will be paid by each person at the clubhouse.

The committee in charge consists of Co-chairmen Floyd Martin and Ralph Orsini, Victor Bart, John Blake, Edward Brown, John Capone, William Dacey, John McGovern, Albert Pronovost, Arthur Rompre and Edward Brown. Joe Brenneis, as usual, will be in attendance.

FAMILIAR FACES AT SCOVILL BLOOD DAYS. Employees who have donated substantial amounts of blood are pictured at the August 18th visitation. They are, left to right: Henry Hart, a 1-gallon donor; Gertrude Degnan, 3 gallons; Ernest Sherman, 2 gallons; Shirley Armstrong, 3 gallons; Anthony Laudate, 1 gallon. Extreme right is Mrs. Leon Maysbaw, Red Cross volunteer worker.

127 Employees Donate Blood

August 18th, the day of the Blood-mobile visit to Doolittle Hall, turned out to be an intensely hot one. Nevertheless, 136 employees stopped in to offer a pint of blood.

From this number, 127 pints of blood were collected, bringing the total number of donations from employees to 426 pints for 1959 through three visitations of the Mobile Unit.

Carmen Errico was awarded a two-gallon donor pin.

One-gallon pins went to Thomas F. Johnson, Anthony J. Laudate, Edward O'Loughlin, Alfred White.

TWO AND ONE GALLON DONORS. Carmen Errico, standing, who was awarded a two-gallon donor pin, chats with Albert Bernier who has just passed the one-gallon mark. Red Cross volunteer worker is Dorothy Pichard.

Thank You One and All

From a letter sent to President S. T. Williams recently by Mrs. Harold Beaulac, Chairman of the local Blood Program:—

We are very proud of the excellent record set by Scovill Company employees for blood donations for the fiscal year of 1958 and 1959.

Your employees gave a total of 719 pints which is an average of 14% and represents the highest industrial average in the city.

It is industries such as yours that keep our blood records up so that we are well ahead of most of the other large cities in the State in blood collections.

Our congratulations to you and your employees for your splendid cooperation with the Blood Program.
