# SCOVILL DULLETIN SEPTEMBER, 1965

Published by Scovill Manufacturing Company for its Employees

#### Social Security Hospital Benefits

Under the new law changes, active employees who are now 65 years of age, or who will become 65 by April 1, 1966 and are still active at that time, should register with Social Security in order to become eligible for Hospital insurance on July 1, 1966.

To assist these eligible employees, a representative of Social Security will be available in the Employee Relations Building starting sometime in September. They will be contacted individually and a convenient appointment will be made for them.

Retirees, who are now receiving Social Security benefits, will automatically be covered for the Hospital benefits. They will have to make application if they wish Medical insurance. This group will receive application cards in the mail starting this month. To assist them in completing their applica-

tions, and to avoid their having to go to the Social Security Office, group meetings, probably in the SERA Building, will be announced shortly. A Social Security representative will be present to explain the plans. These meetings will be held so that all retirees will have an opportunity to register before the end of March, 1966. Benefits will not be available until July, 1966.

Blue Cross and CMS coverage can only be changed by agreement between the Company and the Union. No such change will be made without ample notice.

Two new booklets recently issued by the Social Security Administration are available at the Bulletin Office—"A Brief Explanation of Medicare Health Insurance for the Aged", and Social Security Amendments, 1965".

#### Gen. Mfg. Div. To Make Servicator

Scovill has acquired from U.S. Servicator Corp. of Clifton, New Jersey, the exclusive rights for marketing and manufacturing the Servicator, an automatic computer for determining the service requirements of automobiles.

Installed under the dashboard, this precision instrument automatically tells the driver the type of maintenance that should be performed on his car. At proper intervals, measured by actual hours of car usage, the Servicator ejects a card showing the particular service required at that time. This system, based on actual engine usage, is believed to be a more accurate measurement of service requirements than one based on speedometer mileage.

The Servicator will be marketed and (Continued on Page 2, Col. 3)

#### Scovill Building New Hampshire Plant

Scovill recently broke ground for a new 100,000 square foot, \$1,000,000 plant at Grenier Field, Manchester, New Hampshire. It is being built on city-owned land by the Greater Manchester Industrial Corp. and will be leased back to Scovill on a long-term basis.

(Continued on Page 2, Col. 3)

#### Booklet Available On Pre-Retirement Planning

Many of our employees—55 years or over—have signed up for the informative "Looking Forward to Retirement" program which will be re-activated this fall. Sponsored jointly by the Company and the Union, these series are open to all employees who meet the age requirement.

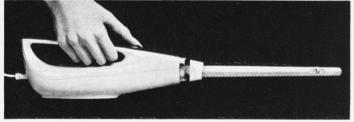

Meetings are held once a week from 2 to 4 p.m. Experts in the fields of medicine, law, pensions, social secu-

rity, employment, housing, adult education, etc., answer your questions in their respective fields. There is no charge for this service; it is free to Scovill employees, 55 years or over, and to their spouses.

An attractive 28-page booklet, entitled "Looking Forward to Retirement" is available. Those interested in receiving a copy, may write or phone the Bulletin Office, Ext. 2167.

Did you know that Hamilton Beach...a division of Scovill...

#### invented the knife with the hole in the handle?

Rarely does an appliance capture the public's fancy as as the Hamilton Beach electric Ninle. Introduced last Christmas, "the one with the hole in the handle" promptly became the most wanted kinfe in the market place. We're pleased to see our Hamilton Beach Division making such straßer, Pleased, but not staggered. Here at Scorill we've been pioneening deals for 162 years—naturally quite a few have rung the belt, From the eight Scovil

oursains have come such things as the failted object garment fasteners. Schnäder thre valves, words 'b biggest seller... the leading line of cosmetic containers... the first large-scale continuous casting machine in the U.S. Get acquainted with Scovill, a company that has paid dividends every year since 1856, the longest unbroken record of any industrial on the big board. For further information, write Scovill, Waterbury, Connecticut.

#### SCOVILL STARTS NEW ADVERTISING PROGRAM

This is the first in a series of new advertisements that Scovill will run in such business publications as The Wall Street Journal and Fortune magazine to acquaint potential customers with the diversity of its products and services.

The new program emphasizes the family relationship that exists between Scovill and such well known brand or division names as Hamilton Beach, Schrader, Gripper, Conmar, Clinton and Puritron.

# MEMO from Management:

### It's Still True Today

"The best goods cannot sell themselves—success depends upon the salesman, the advertising man, the merchant, the banker, the farmer, and the workers in the factories . . ."

"The supremacy of Waterbury in manufacturing depends upon the citizens. A fine water power, a coal mine, a forest; all are inert matters until the skilled hands and brains of man put them to use—they cannot become a part of industry without man's aid.

"Waterbury has a supply of fine drinking (potable) water; a good school system and some fine school buildings; good air to breathe, and is so situated that it is possible to enjoy beautiful, rolling-hill country, in just a few minutes' ride from town, but it hasn't very many boosters such as we have observed elsewhere—when the town's name is ever on the air, in the newspapers, and on people's tongues. The slogan, "Waterbury has something on everybody", has passed: it is dead: whereas it should be displayed on billboards instead of the soaps, tobacco, stockings, beverages, etc., we see each day. We have heard this lack of boosting spirit attributed to New England conservatism, but we believe it due to a lack of advertising sense."

The above paragraphs were written 41 years ago—they appeared in the June, 1924 issue of the *BULLETIN*.

Times haven't really changed. Back in 1924, some people realized what has become so apparent today—it pays to advertise, whether you are selling a product or a community.

Waterbury has a big selling job to do if it is to compete effectively with other communities and live up to the promise of its new highways. Fortunately, there are individuals and organizations in our city who are aware of this and are willing to do something about it.

Scovill has certainly learned over the years that just making a good product isn't enough for business success. You have to speak loudly and clearly in bringing the advantages of your products to the attention of prospective customers. Our divisions are doing this in their advertising and promotional programs. And the new corporate advertising program shown on the front page of this *BULLETIN* will bring the story of Scovill's product diversity and product leadership to important people in the business and financial community.

Styles may have changed but people haven't. What was so true in 1924 is still true today. Good products don't sell themselves. If we think we have the best products, let's be sure prospective customers know about them.

#### Servicator

(Continued from Page 1, Col. 3)

produced by the General Manufacturing Division. It has been successfully field tested and used by consumers for over three years.

Scovill plans to market this maintenance computer through automobile manufacturers, automobile dealers, automobile service organizations, fleet owners and operators; and industrial equipment manufacturers and users. Other specialized industrial applications are also being developed. Scovill has retained Servicator's experienced sales personnel to work with its own sales force in developing these markets.

This new item will add further diversity to the broad line of automotive products now produced by the General Manufacturing Division.

#### New Hampshire Plant

(Continued from Page 1, Col. 1)

The new plant will be run by Scovill's Schrader Division and will be used for the production of aerosol valves. Schrader has been producing these valves in leased facilities in the Manchester area since 1962. It has proven itself to be an excellent location for this type of production. When expanding sales of aerosol valves made it necessary to provide additional production facilities, the Manchester location was the logical choice for a new plant. It is estimated that construction will be completed by the end of this year.

This will be the third new plant that Schrader has completed in the past year. The new Wake Forest, North Carolina plant is producing Schrader's industrial products line, while the recently completed plant in Dickson, Tennessee is producing tire valves and related automotive products.

Schrader is the world's largest producer of tire valves, with production facilities in the U.S.A., Canada, Mexico, Brazil, England, France, Australia, and India. In addition to its aerosol valves and tire valves, Schrader produces a diversified line of industrial air control equipment and a line of specialized automotive products.

## Our Phone Number To Change Sept. 22

The Waterbury telephone number for Scovill will be changed from 754-1171 to 757-6061 effective September 22, 1965, according to notice by the telephone company. However, either number may be used until Sept., 1966.

THE GERARD ANCTILS THANK SCOVILL BLOOD DONORS

"It's so good to have Mom back home, knowing she'll soon be able to live a normal, happy and active life — thanks to the wonderful Scovill men who went to St. Raphael's hospital in New Haven, to give a pint of blood when she was scheduled for heart surgery." These sentiments of Claire Anctil are heartily seconded by Dad Gerard and brothers Donald and Armand (not pictured).

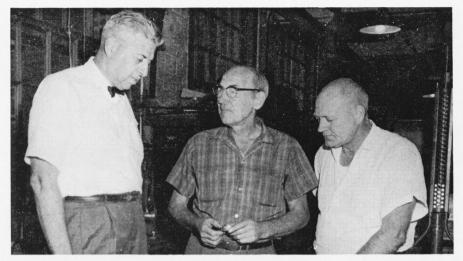

Mrs. Germaine Anctil, wife of Gerard Anctil, of the Strip Mill, is the most recent family member of a Scovill employee to undergo heart surgery.

In this delicate operation, 14 pints of blood must be on hand before surgery can begin. As the blood is used in a machine which actually takes over the work of the heart during surgery, it is imperative not only that the blood be of the correct type but also that it is cross-matched to be sure it is absolutely compatible.

The long list of Scovill blood donors

made it possible to get the required number of donors (many of whom came from the Mills Division) who quickly volunteered their assistance. The night before the operation, 14 employees went to St. Raphael's hospital in New Haven to donate a unit of blood.

Recuperating at home, Mrs. Anctil firmly believes that part of the credit for her rapid recovery is due to the Scovill Blood Program which she, and the rest of the family, feel is a magnificient gesture by all donors.

\$100. Partial Payment To Charles Mott. Works Manager Norman Schaffer and Repair Room Foreman Harvey Krantz congratulate Mr. Mott on his second award in as many months. This month's award, in partial payment, was for his proposed method of salvaging damaged fuse parts so that parts can be reclaimed and reused. Last month's award, also a partial payment, was for \$125.

## August Awards For Suggestions

\$62.00 Award—Edward Borowski, Carpenter Shop

\$60.00 Award — John Janauskas, New Milford Tube Mill

\$50.00 Award — Frank D'Anna, New Milford Tube Mill

\$60.00 Award — Germaine Messino, Lacquer Room

\$43.00 Award — Philip Filipelli, Tank Fitting

#### Letters of Appreciation

Ann Oleskey, Mill Engineering; Richard Hill and Ireland Sommerville of New Milford Tube Mill; Doris Diana, Fuse Assembly; Jennie Byron, Ronald Baker and Warren Baker, Cosmetic Div.

## SERA Golf Outing Set for Sept. 11

All Scovill golfers are invited to participate in the SERA's annual Golf outing to be held Saturday, September 11, at the Southington Country Club.

Advance registration is necessary in order to permit the committee to provide food and refreshments for the day. Entry blanks are available at the Employee Activities Office.

Players will tee off between 7 and 9 a.m. from the first tee. Late arrivals will have to tee off at the convenience of the starter. Guests are welcome but not eligible for prizes.

Greens fee and registration fee are to be paid at the first tee.

## Parking At Scovill

For many years it has been Scovill policy to provide assigned parking space for many of its employees who must drive their cars to work. A small annual fee is charged for this service.

When this service began, few people drove cars and parking was no problem. Today, almost every employee owns a car and most every one wants to drive to work. The result—there are not enough parking spaces to serve everyone.

Some of our parking lots are located outside the plant. It is not uncommon to find strangers parked in spaces assigned to Scovillites.

In order to control our parking areas, the Plant Protection Department has erected large standard traffic signs at the entrances of these lots, stating that these areas are "private" and spaces are assigned to specific employees.

Presently an experiment in controlled parking is being tried at "S" lot — corner of Mill and East Main Streets. Parking stickers have been issued to employees who have been assigned to that area. Beginning September 1st, this area is being supervised by the Plant Protection Dept. and only cars displaying the Scovill sticker will be permitted to park there. Unauthorized cars will be tagged.

Should this experiment prove successful, the procedure will be extended to our other parking areas. It is expected that in this manner those employees who have been assigned a parking space will no longer be inconvenienced by finding some other car occupying the space assigned to them.

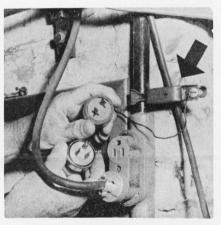

## Electrical Appliances Must Be "Grounded"

Pictured below are two plug and outlet arrangements which provide for shock-proof use of electrical appliances.

The upper hand holds the common type of plug — with two prongs — which must be "grounded". To make it safe, a metal clip (arrow) is connected to the appliance with a wire. The clip must always be on a conduit, water pipe, or a good "ground".

The lower hand holds a newer type plug — with three prongs — which fits the new outlet shown. This plug is used on a three wire cord and automatically grounds the appliance.

Either arrangement makes devices shockproof when properly installed.

Don't Be Shocked!—and you won't if that electrical appliance is properly "grounded" to prevent shock hazards. This is especially true of power tools—at home or in the shop.

### Adult Dancing

Ted Nicholas, well known professional and considered one of the top instructors in the state, will conduct classes in social dancing again this year in the SERA Building.

Open to all employees and their guests, the weekly sessions will start at 8:00 p.m. on Wednesday, September 15th. The evening will include a period of instruction — beginner and advanced, social hour, refreshments.

The dancing sessions are not being conducted as a course but advance registration would assist the committee and Mr. Nicholas to plan the sessions. All are invited to drop in any week for as many weeks as they desire.

PASTE GAST

SEMINAR IN A TRAILER WITHIN SCOVILL GATES

Loctite Corporation's Labmobile pulled into the Hayden St. Gate and parked outside the West Machine Room re-

cently to allow Scovill personnel to attend a seminar and watch a demonstration of a proven new technology for assembling metal parts with self-hardening resins.

Fifty-two design, engineering and production personnel of the Waterbury and Oakville divisions were given an opportunity to see the latest technology for assembling metal parts with self-hardening plastics demonstrated and explained.

### Rod & Gun Club

By Walter Dziura

Our annual summer outing of August 14th was held at Woodtick with weather that couldn't have been better, according to the well over one hundred members and guests. Horseshoes and cards seem to be the most popular activities at these outings with Championship style being displayed by Ed Courtney and John Baker.

Lucky winners in the drawings for special prizes were:—

Don LeBonte, Emil Kazmaier and Ben Shimkus—transistor radios; Nick Guerrera, fishing reel; Fred Muccino, fish stringer; John Powell, spool of Monofilament line; John Franze and Florence Lambo, Hamilton Beach electric knives; Judy Gyllenhammer and Vic Manello, Hamilton Beach mixettes; Ed Birmingham and Bob Taylor, Hamilton Beach electric can opener; Stan Verseckas, rod and reel.

The trout in the upper pond are active in spite of the hot weather, according to reports received. Sizes are not spectacular but, still, a 12" or 14" trout is not to be scoffed at.

The Reeves fishing will be held Sept. 11-12; Sept. 25-26; Oct. 9-10; Oct. 23-24. Make your plans early so you can have your dates set aside; and your fishing companions chosen.

The next monthly meeting will be held on Sept. 21, at Woodtick.

A seminar, several sessions of onehour each, made it possible for so many of our personnel to learn how they can provide means to reduce costs and increase reliability throughout our design and manufacturing operations.

Those attending were invited to bring specific parts, assemblies, prints or drawings for discussion.

Arrangements for the Labmobile visit to the plant were made by Walter Hoerman, Engineer in Charge of our Synthetic Materials Lab.

#### Retirements

#### Effective Sept. 1, 1965

EMILE J. BRODEUR, electrician in Electrical Dept.—41 years.

Charles Leogrande, toolmaker in Mfg. Eyelet Tool—41 years.

RAYMOND MEREDITH, basket repair man in Cosmetic Finishing — 14.4 years' service.

DORA WISLOCKI, inspector and packer in Mfg. Packing—32 years.

#### Retired Folks' Club

The annual fall outing for all retired employees of the Waterbury and Oakville divisions will be held at Woodtick on Tuesday, September 14, weather permitting. If unfavorable, the outing will have to be cancelled as the 14th is also Scovill Employee Blood Donor Day and the SERA Building will not be available for a meeting.

Members will meet outside the SERA Building at 1:00 p.m.

Those driving out and who can take passengers are asked to stop at the SERA Building. Transportation will be provided for all.

## SERA To Hold Annual Meeting

The annual membership meeting of the Scovill Employee Recreation Association will be held on Tuesday, September 14, at 8:00 p.m. in the SERA Building.

All employees of the Waterbury (including New Milford) and Oakville Divisions are members of the association and are urged to attend.

Reports of the past year's activities will be given; election of the Board of Directors will be held; with entertainment and serving of refreshments after the business session.

John (Jim) Duigan of Trucking is chairman of the Nominating Committee and urges all employees interested in serving on the Board of Directors to contact him or any one of the other Committee members who are:—Joyce Emmons, Mills Division; Jean Ostroski, Group Insurance; Robert Fumire, Japan Room; Susan Guarrera, Cosmetic Container Div.; Kay Kantor, Oakville Division.

In accordance with Association bylaws:— The Nominating Committee shall prepare a list of 19 nominees; The current Board of Directors may nominate an additional 4 people from departments not represented on the Nominating Committee's list; additional nominations, not to exceed five, will be accepted from the floor at the annual meeting. A nominee so named must be at the meeting to accept the nomination or the person making the nomination must have written proof of willingness to accept the nomination.

Following the annual membership meeting, the newly elected Board will meet to elect officers of the association

for the coming year.

Huge 70-Ton Boiler Stops Traffic on Trip to Scovill

Traffic stopped and all eyes were on the parade which heralded the arrival of our new 70-ton steam generator as it made its way to our Power House recently.

The boiler was nine months in building to our specifications. It was shop assembled and shipped as a complete unit from the Combustion Engineering Company's shop in Chattanooga, Tennessee, and was unloaded at the Hubbard Hall railroad siding off Bank Street.

Here the task of getting it to Scovill was taken over by Dunbar Transfer Company of Newington, whose men carefully loaded it onto a tractor trailer (left), guided it skillfully through city streets and, (right) raised it gently 15 feet up and into the second story of the power house where it was set on its permanent foundation.

Representing a one-quarter million dollar investment, the boiler is expected to be in operation in October and will serve to supplement our present steam capacity to meet the growing demands of steam for processes, heating and power generation. The oil-fired boiler will provide 120,000 pounds of steam per hour at 660 pounds per square inch pressure and 750° Fahrenheit temperature.

## Musical Aquatic Show At Woodtick

A colorful extravaganza of fine music - beautiful, colorful swimming routines presented by some of the top women swimmers in the state — loud and bright fireworks — all are being planned as part of the official closing of Woodtick for the 1965 season.

On Thursday evening, September 9th, starting at 8:00 o'clock, the popular Bob Mobilio and his well-known 14-piece orchestra will start the strains of music which will lead into a beautiful water show — all on or in the water.

Mrs. Phyllis Russell, of Fairfield, is directing the water show which will feature the Aqua-debs, the teen-age girls group of the Bridgeport Girls' Club who hold the state's AAU Championship title; and the Synchro-nettes, prominent swimming team of the Bridgeport YWCA.

Gene Valentino, most popular master of ceremonies in the area and local radio personality, will be master of ceremonies for the program. Tom Mitchell will direct the show; Ruth Peterson is in charge of finances; Helen Duffy, Joyce Emmons and Robert Brinley in charge of settings and publicity. Other committees are being formed as plans progress for this special event.

Three weeks remain for the Suggestion System Contest — you can still be eligible to win and plan your weekend in New York, for two.

How? Just by sending in a constructive eligible suggestion up to and including October 1, 1965. The drawing will be held on October 5th.

You do not have to win a cash

award to be eligible for the drawing, but all suggestions will be evaluated and regular cash awards will be paid whenever the suggestion merits it.

Jot down your suggestion and submit it now — you have the same chance of winning as the next fellow—and you'll be eligible for a cash award as well.

#### Girls' Club News

By Vi Pelletier & Mary Schifilitti

Latest reports show that we are able to sponsor 13 children at the SERA Day Camp this summer.

Regular monthly meetings of the Council start up again on Monday, Sept. 20th. We hear plans are being formulated for a card party to be scheduled in October. Requests have come in regarding a riverboat trip—if enough interest is shown, one can still be arranged for this year. Contact any one of the Entertainment Committee: Cloe Read, Edith Carolan, Margaret Snowden, or president Dot Chambers.

The Council is happy to receive suggestions for activities that may be of interest to our members. If you have any other ideas, please pass them along.

Response to the request for volunteers to assist young Jimmy Blacker has been tremendous. It's heart-warming to see how the Lacquer Room has responded — not only are several employees in the department volunteering their services, they have also started a fund to help the youngster.

We hope *Josephine Dabbo*, of Dept. 60, is well on the road to recovery. She's returned home from the hospital.

Our sincere sympathy to *Betty Betan-court*, Dept. 45, on the loss of her brother recently.

You're in luck — those 50th anniversary souvenir bracelets are available to interested Club members. Just contact any Council member.

#### **Obituaries**

JOHN T. EDMOND died on August 6, 1965. Retired, Screw Product Finishing, in July, 1959—36 years.

EARLE T. FORD died on August 11, 1965. Retired, Asst. Secretary and Manager of Payroll and Transcribing, in August, 1956—41 years.

ARMAND BRECHBUHLER died on August 14, 1965. Retired, Repair Room, in January, 1955—36 years.

MICHAEL RICCIARDI died on August 13, 1965. Retired, Chucking, in June, 1956—40 years.

EDWARD L. WOLFF died on August 20, 1965. Retired Superintendent of Engineering and Development, Casting Shop in July, 1958—54 years.

HENRY J. MONTAMBAULT died on August 22, 1965. Retired, Head, Rehead & Clip Dept. in April, 1961—41 years.

PETER PICA, maintenance repairman in Millwrights, died on August 28, 1965 — 23 years' service.

## Retreat For Scovill Women

All Scovill women are invited to participate in a retreat during the weekend of October 15-17, 1965 to Graymoor Garrison, New York.

Those interested in attending are asked to contact Helen Johnson, Ext. 2431 before 3:00 p.m. or 755-8188 between 5 and 7:00 p.m., by October 8, 1965.

CLOSURE'S SOUTHEASTERN DISTRICT SERVICE ENGINEERS

The second of the Closure Division's one-day seminars to brief service engineers on the latest in products and equipment was held in Atlanta, Georgia, for men in the Southeast Regional territory. It was similar to the one held in Waterbury for men in the Northeast territory. Another seminar is being planned for service representatives in the Mid-west territory.

Pictured above:— Kneeling: Philip Jensen, Manager of Research & Development — Field Machines, who conducted the seminar; Robert McCloskey, sales representative in Puerto Rico.

Standing, left to right:—Harold Grant, service manager, Greensboro; James Wikle, product engineer, Clarkesville; Harold Belanger, project engineer, Waterbury; Robert Plants, service engineer, Dallas; Bryant Water, service engineer, Greensboro; Joseph Ballew, service engineer, Atlanta; Hugh Andrews, Asst. Mgr., Closure R & D, Products, Waterbury; Harry Howie, service engineer, Greensboro.

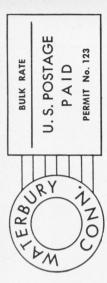

Others attending the seminar but not pictured were:—Closure Division General Manager R. W. Hall and Reed Bertolette, General Sales Manager, each of whom spoke briefly; John Peterson, Application Lab Supervisor, Waterbury; Per Staal, International Operations representative now assigned to Germany; Melvin Tucker, service engineer, Nashville; Edward Anderson, District Sales Manager, Atlanta; William Holyfield, service engineer, Jackson, Miss.; Raymond Cox, engineer, R & D, Newark; Charles Elliott, plant superintendent, Greenwood, Miss.

ROD & GUN CLUB HOLDS ANNUAL SUMMER PICNIC

A finer day could not have been ordered than was enjoyed by the over one-hundred Club members and guests at the annual summer outing held at Woodtick. Action

seemed to be the keyword of the day — various sports, card playing, or just "chewing the fat" — together with partaking of the most appetizing picnic fare prepared and served by the most efficient and congenial of chefs.

  - 3 rooms, furnished. 755-7256.

### Blood Donor Day\_Tuesday, Sept. 14

If you have already read the article on Page 3 of this issue in which a grateful family thanks all Scovill blood donors for their quick and eager response to help a fellow-worker - you must know that the blood you give does help someone to live.

While not giving for immediate use, as is required in heart surgery, may not be as dramatic — you can be sure your blood has also helped to save a life — whether it was used in another type of surgery, a serious illness, or an emergency. And you

can be sure that someone is grateful for your help.

The third visit of the Blood Mobile Unit to Scovill is set for Tuesday, September 14th, at the SERA Building, from 12:30 to 5:00 p.m. With an early return of appointment cards, arrangements can be made to cut down on the waiting time.

Scheduled for this visit is Section #3 — Mills, Transportation, Planning, Purchasing, and Executive Offices — but all other employees are most welcome.
