SUGGESTION SYSTEM CONTEST

You Could Win A 1970 Ford Torino

CONTEST RULES—suggestions must be dated between November 10, 1969 and January 30, 1970. They must be submitted on official Suggestion System blanks which can be found in display units throughout the plant.

ELIGIBLE EMPLOYEES—all hourly and piecework employees, in productive or non-productive classification, and all "D" payroll employees of the Waterbury Divisions including New Milford, and Branch Sales Office personnel.

ELIGIBLE SUGGESTIONS—those which *reduce* cost, waste, spoilage, defective work; *improve* methods, product quality, tools, fixtures, equipment handling, storage, maintenance, office and clerical forms and procedures; *develop* new products, equipment or techniques.

NON-ELIGIBLE SUGGESTIONS—those not constructive, previously submitted, or pertaining to safety.

PRIZE DRAWING—Each eligible suggestion will be given a number which will be placed in a container for a

special drawing to be held on February 5, 1970 at 3:15 p.m. in the SERA Building. In the event that two or more people submit the winning suggestion, a secondary drawing will be held to determine the winner.

THE PRIZE—a 2-door hardtop 1970 Ford Torino, medium blue color, 8 cylinder engine, automatic transmission, power steering, whitewall tires, wheel covers, radio, black vinyl roof, undercoating. State sales tax, income tax and registration fee paid for by Scovill Manufacturing Company.

MEMO *from Management:*

A Tradition Lives On

When the Oakville Division broke ground for a new main plant in Watertown a few days ago, it meant a great deal more to each of us at Scovill than just the turning of a spadeful of earth — or even having a fine, new facility with which to carry on the work of the Company.

It meant that the Naugatuck Valley is maintaining its place in the highly competitive world of industry within the United States.

The fact is that no company, Scovill included, can pour millions of dollars into a new manufacturing center without first determining the most favorable spot geographically in which to locate it. The future of a company, and of all its employees, depends upon careful site selection. A decision made only for sentimental reasons could be fatal.

Therefore, even though Oakville was founded in this area in 1852 and has operated at its present site for 100 years, many other possible locations had to be carefully surveyed when it was decided that an efficient, modern plant was necessary for Oakville to meet competition and remain a leader in its industry.

When all the returns were in, we found that it was feasible for Oakville to remain here. This means that transportation facilities, power and water supplies, access to raw materials, educational systems and other important factors involved in a good location continue to be favorable here. But, much more important, it is a tribute to the tradition of superior craftsmanship that has made this the pin capital of the world and a major supplier of many small but indispensable metal and plastic products.

Thanks to its people, it's still good business to do business in the Naugatuck Valley.

Scovill Reports 9 Months Results

In a statement issued last week, Scovill reported that both sales and earnings for the first nine months of this year were ahead of the same period last year. President Malcolm Baldrige said that most of this improvement was due to continuing growth in Scovill's NuTone, Lightcraft and Caradco lines of housing products. He noted that although the Company entered this field only two years ago, it now accounted for more than 25 per cent of total sales. Other consumer lines, such as Hamilton Beach appliances, and Dritz and Clinton sewing aids and notions, also registered higher earnings.

Comparative figures for the two 9-month periods are summarized as follows:

	Nine Months	
	1969	1968
Sales	\$328,954,000	\$293,061,000
Profits after taxes	\$ 11,051,000	\$ 10,151,000
Profits as % of Sales	3.4%	3.5%

Christmas Mail To Servicemen

These deadlines for mailing Christmas parcels to servicemen overseas are given by the Dept. of Defense and the Post Office Department

November 22 — Space Available Mail (SAM). If regular rates are used and parcel weighs less than 5 pounds. Such parcels will be airlifted on a space-available basis from East or West Coast to overseas areas.

November 29—Parcel Airlift (PAL). For extra fee of \$1.00, parcels weighing 30 pounds or less. Such parcels will be airlifted, on a space-available basis, from point of mailing to overseas areas.

December 1 to 13 — Air Mail. Priority on airlift all the way.

Substantial savings can be realized by using SAM and PAL service.

third award came to Waterbury. A special "Employer's Merit Award" was presented to the Community Workshop of Waterbury by the Governor's Committee for the Employment of the Handicapped. Dr. Butler serves as president of the board of directors of the Workshop.

Employment Of The Handicapped Awards To Company, Dr. Butler

The Company received singular recognition recently when, in the office of Governor John Dempsey, two awards were presented to President Malcolm Baldrige and Dr. Robert Butler.

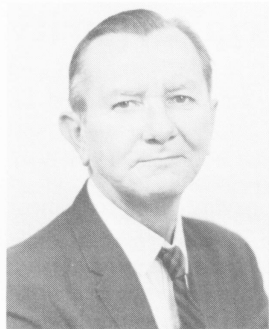

The President's Committee on Employment of the Handicapped annually presents two awards in recognition of employers' participation in the program.

The "Employer's Merit Award" was conferred on Scovill—"in view of exceptional accomplishments in extending more opportunities through selec-

tive placement in useful employment of handicapped employees and assisting in every feasible way to acquaint the public and employers with these principles."

The second award, presented to Dr. Butler, reads: "Citation for Meritorious Service conferred upon Robert W. Butler in appreciation for exceptional contributions in furthering the employment of the handicapped."

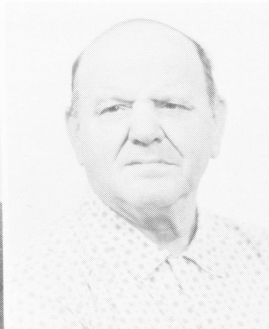

While this is the first time both awards have gone to the same Company, it is further recognition of Dr. Butler's work in this program that a

Team Spirit Keeps Fire Costs Down

A fine show of team spirit prevailed in the Lacquer Room last month following a fire and resulting water damage which caused several thousand dollars damage.

Scovill volunteer firemen joined the Waterbury Fire Department in quickly putting out the fire, thus preventing a more serious one. The tireless efforts of a quickly formed clean-up committee, consisting of department employees, foremen, and maintenance men, made it possible to get employees back on the job in record time.

A tip of the hat to all these wonderful people.

James R. Mitchell (left) has been appointed Sales Manager of the Division. **Dennis G. Maxwell** (center) is appointed Planning Manager; **William G. Morris** (right) is appointed Product Manager—Aluminum.

Retirement

ANNA DADDONA was retired as of November 1, 1969 after 13.5 years of service. She has been an inspector of Quality Control, Gen. Prod. Div.

FIRE LANE—KEEP IT CLEAR. *The Scovill fire truck passes over one of the newly marked "Fire Lane" roadways in the East Plant. Such lanes are to be kept clear at all times to assure safe and quick passage of ambulance or fire apparatus in event of an emergency.*

Safe Driving Rules

Rules for driving within the plant are the same as required by State law for all Connecticut roadways. The importance of adhering to these rules within the plant is even greater because an emergency in the plant could involve you personally.

1. Do not block roadways
2. Keep to the right of the yellow line when entering or leaving
3. Be courteous when driving
4. When you hear a siren, pull over to the right side of the roadway
5. Watch out for pedestrians

LIFE SAVER MEDAL TO RICHARD PROULX. *Joseph M. Gaudreau, Vice President of Liberty Mutual Insurance Company, presents award. Looking on are John J. Proulx, Safety Manager and Richard's father; President Malcolm Baldrige, and George A. Goss, Vice President and Waterbury Services General Manager.*

Richard Proulx, local high school student who worked in our Carpenter Shop during the summer months, was recently awarded the "Life Savers' Medal" by Liberty Mutual Insurance Company for his part in saving the life of a 10-year old boy.

On July 14th, Richard was driving along the road near Abbott's pond in Middlebury when he saw a large

crowd gathered. He stopped the car to see what was going on. Young Billy Zealor was stretched out on the ground with all indications that he was beyond help. A woman who had pulled the boy out of deep water, completely exhausted, pleaded for someone to apply artificial respiration. Richard, having learned mouth-to-mouth resuscitation, immediately took over. After

Your Social Security

One goal of the Waterbury Social Security Office, according to Ernest D. Bauer, District Manager, is to speed up the receipt of the first social security check. When a person retires, he is interested in having his retirement payments delivered as early as possible.

With this thought in mind, Bauer said there are a few things the prospective retiree can do to speed delivery of his social security payment:

1. File his claim two or three months before retirement is to take place
2. Bring along the birth or baptismal certificate of each beneficiary who is going to file for monthly benefits
3. Have exact information about last year's earnings. Withholding Form W-2 or a copy of last year's tax return will provide this information
4. Widows filing for survivor's benefits should bring a marriage certificate.

Mr. Bauer said following these suggestions would make it possible to complete the claim process at the first visit with the social security office, thereby avoiding any delay in receipt of the first check.

Anyone having problems in obtaining required proofs should not delay in coming to the social security office. Mr. Bauer said his office can advise on locating the needed evidence and encourages prospective claimants to call his office in advance of filing a claim so that the supporting evidence can be assembled and ready at the time of claiming social security benefits.

The Waterbury office is located at 236 Grand St., telephone 756-7475.

*You Could

about 10 minutes, the police and fire departments arrived, applied a resuscitator and took the boy to the hospital.

Liberty Mutual's Life Savers' Medal is awarded to employees of participating companies for "the saving of a human life." Richard, in accepting the award, noted his part would not have been needed if Billy had not been pulled out of the water and he feels the person really deserving an award is the woman who did so.

Purchasing Seminar Held in Waterbury

The buying of raw materials, supplies and equipment for use in a company the size of Scovill involves many people and millions of dollars. Our Purchasing Department, under the direction of Charles Grimes and his assistant William O'Brien, is constantly improving its methods and procedures to efficiently supply the needs of our Waterbury operations.

The benefits of new systems installed within the past year have been dramatic—resulting in less paper work, increased efficiency, lower cost and reduced inventories.

This past summer it was felt these benefits should be shared with all Scovill divisions and so a seminar was held in Waterbury during September to which all divisions were invited to send representatives.

The two-fold objective of this seminar was to present new techniques and concepts in purchasing and, also, to provide an opportunity for Scovill purchasing personnel to meet each other. This overall task was effectively accomplished through the use of visual aids, exhibits, lectures and group discussions.

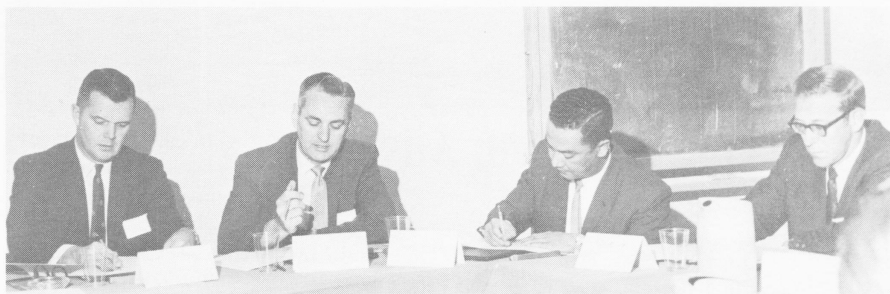

1. President Malcolm Baldrige welcomed the attendants in the Company's display room. With him are: William Utenwaldt of Schrader, Dickson, Tenn.; Material Manager Andrew Hoppie, Director of Purchasing at NuTone, Cincinnati, Ohio; Howard Smith, Asst. to Manufacturing Manager, Schrader, Dickson; Harry Kosbak, Purchasing Man-

ager at Conmar, Newark, N.J. and Victoria, Va.; and Philip Gach, Purchasing Agent for General Hose & Coupling, Caldwell, N. J.

2. Conducting the seminar were: Vice President George A. Goss; Director of Purchasing Charles G. Grimes and Purchasing Manager William T. O'Brien.

3. Studying their notes at Workshop Session are: Hayden Nichols, Purchasing Manager for Oakville Division; Neil McEvoy, Material Manager for Caradco at Dubuque, Iowa; George Bennett, Materials Manager for Aerosol Products, Manchester, N. H.; and Donald Martin, Manager of Purchasing and Personnel for our Closure Division at Clarkesville, Ga.

4. Seminar included tour of the Display Room and Purchasing Office. At Hamilton Beach Division display are: Joseph Gabagan, Purchasing Manager for Fluid Power, Wake Forest, N. H.; and Linley Gibbs, Materials Manager for Hamilton Beach Division at Washington and Clinton, North Carolina.

Suggestion Awards

\$270 AWARD—Philip Gaudiosi, Blacksmith Shop, suggested a method of salvaging gondola wheels by re-drilling and inserting bearing — originally the wheel was discarded.

\$198 AWARD — Deborah Shea (left picture below) of Hot Forge discusses with Inspector John DeBlasio the workings of her suggested turntable which makes work more easily available to the inspectors, thus greatly increasing the efficiency.

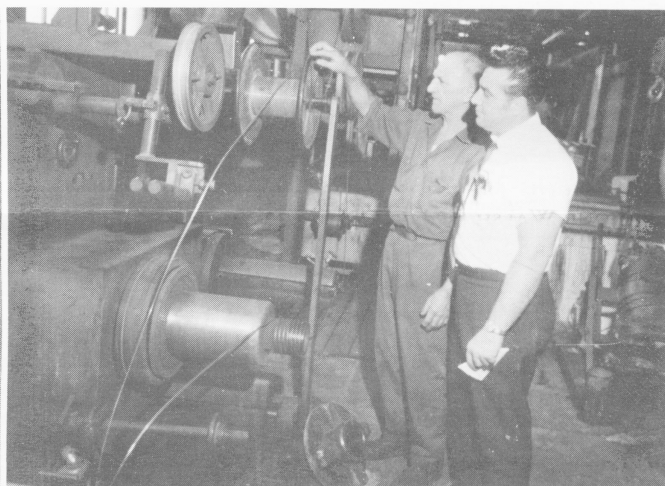

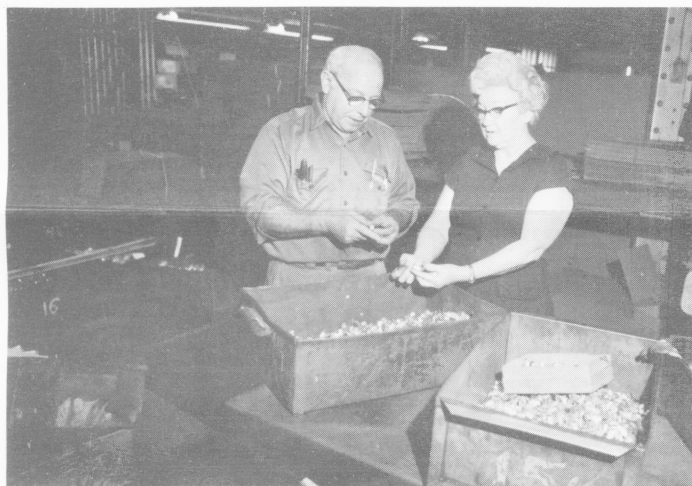

\$160 PARTIAL AWARD—Joseph Favale (pictured right below) and Richard Renkun (not shown) of the Wire Mill were each awarded a partial payment of \$120 for their suggested type of pulley that prevents the wire from falling off the pulley, resulting in better quality, less scrap and increased production on the Strand Pickler.

\$400 PARTIAL AWARD — Roland Dupont, of Industrial Couplings Dept., describes his winning suggestion to James Quirke and Robert Bailey. His idea changed the method of machining Schrader crimping dies which greatly increases production, along with closer tolerances, better finish and less tool breakage.

Foreman James Burns is interested listener.

\$60. AWARD — John Favale was also awarded \$60. for a second suggestion.

PLUMBER - STEAM-FITTER. James Pape was graduated as a plumber-steamfitter as of October 6, 1969. He has been assigned to the Pipe Shop.

T.R.M.O. - E.D.M. William Smolinski was graduated as a Tool Room Machine Operator on E.D.M. machines as of September 29, 1969. He has been assigned to the Hot Forge Tool Room.

ONE MILLION ACCIDENT-FREE HOURS. *Liberty Mutual's Vice President J. M. Gaudreau presents "Award of Merit" plaque to Oakville Div. Vice President Joseph P. Stevens. On hand at presentation were: Liberty Mutual's Loss Prevention Account Representative Albert Warner, Oakville Operations Manager John W. Goepel, Liberty Mutual's Account Executive F. W. Stedman, Oakville Plant Manager Frank Fernandez and Oakville Plant Engineer Vincent Cimaglio.*

Oakville Division Sets Safety Record

One million manhours worked without a single lost time accident. This record, established between June 30, 1968 and July 18, 1969 by the Oakville Division, received recognition recently from Liberty Mutual Life Insurance Company.

In accepting the award, Vice President Stevens paid tribute to the approximately 500 employees whose interest in the promotion of accident prevention helped to make this outstanding record which continues unbroken.

Rod & Gun Club

By Vin Manzolli

As of this writing, the last of the Reeves Competitions has just been held. Time, for the printer, does not permit a review of all the competitions to determine this year's Champion. However, all the prize winners will be known by the night of our banquet, November 13th, at which time they'll be named.

We would recommend you make it a point to attend this 40th anniversary banquet as we know you'll be pleasantly surprised with the program and speakers. A quick glimpse at the records show that 4 or 5 fishermen are in contention for the Championship. Some of the fish measured in are as follows:—

George Bezuhly—11 $\frac{1}{8}$ " trout, 10 $\frac{1}{2}$ " perch, 10 $\frac{1}{2}$ " bullhead

Roy Dubuque — 20 $\frac{1}{2}$ " pickerel, 11 $\frac{1}{2}$ " perch

Charles Rietdyke—14" trout, 18 $\frac{5}{8}$ " pickerel, 13 $\frac{5}{8}$ " bass

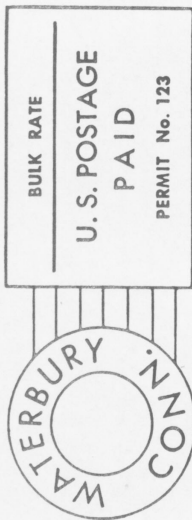

Jim Gilroy — 12 $\frac{1}{8}$ " bass, 16 $\frac{1}{8}$ " pickerel, 15" bullhead

Many other fellows also caught some fine fish this year and it is not our intention to slight anyone but the full story will be told at the banquet.

Charlie Carpentier advises that rifle practice at the range takes place on Wednesday, Thursday and Friday nights. Team competitions are expected to begin early November. A turkey shoot is scheduled for Nov. 16th. Charlie also advises that anyone purchasing ammo at the range will have to sign a form that will be provided. This is necessary to cover state regulation.

Oh, one more thing — to avoid further criticism, it is suggested that, as soon as he is finished, each shooter clean up his loose shells, thus leaving the area in neat order for the next shooter.

Harvey Giese has been conducting instruction periods and pistol practice at the range every Tuesday. This will continue for a while, after which Harvey hopes to get into competitive shooting. Altho not at the range at the same time, 22 fellows have expressed interest in a pistol club. This will certainly make for some good competition. Good luck, Harvey, with your new venture. We're sure you'll get the cooperation needed to make it a success.
