

SCOVILL BULLETIN

Jan. -- Feb., 1972

Published by Scovill Manufacturing Company for its Employees

SCOVILL PRODUCTS TO BE ON DISPLAY

This attractive display of many Scovill-made products will soon be erected in the new headquarters of the local Social Security Office in the new Federal Building — the Post Office Building — 14 Cottage Place.

Designed and set up by our Photography Department, the display includes items from electric housewares and home built-ins to apparel fasteners, notions and sewing aids, to mill products, to automotive products and

custom parts and assemblies, to fluid products.

Mrs. Barbara Dubuque, of our Photography Dept., affixes a colorful array of pins made at our Sewing Notions plant in Watertown.

Hamilton Beach Launches Campaign with "Hot Line"

Losing no momentum from a product innovating, sales winning 1971, our Hamilton Beach Division has kicked off the first quarter of 1972 with a challenging "Hot Line" of new products, sales incentives and merchandising tools, backed with the quality for which the Hamilton Beach name is known and matched by the best values in electrical appliances to hit the marketplace.

There are three new Blend 'N Serve blender introductions, all with 720 watt motors, dependable solid state engineering, 14-speeds, unique high/low selector switches. Each comes with the big bonus of one or two Blend 'N Serve containers, in 16 and/or 48 oz. sizes.

What could be "hotter" than the exclusive Hamilton Beach hole-in-the-handle electric knife! The "Hot Line" has two new feature-packed models. One offers the switchblade feature for vertical or horizontal cutting while the other is self contained in a decorator wood grain caddy that can be mounted on the wall for easy reach and use.

There's sizzling news in two "Hot Line" stand mixers—the first model has a bowl shift control combined with every other wanted feature; the second is a heavy duty model with stainless steel bowls and the power to handle any mixing requirements.

A new "Hot Line" casserole skillet is feature-loaded and priced right.

Scovill Reports Results For 1971

The financial report, for the year 1971, recently released show:

	1971	1970
Sales	\$470,185,000	\$444,513,000
Profits	\$14,316,000	\$12,755,000
Profit as % of Sales	3.0%	2.9%

Malcolm Baldrige, Chairman, and John C. Helies, President stated, "Our earnings improvement was broad-based, with such lines as housing products, apparel fasteners, automotive products and industrial products showing increases over 1971. Housing products registered the greatest gain, benefitting from the introduction of a number of new products into its strong distribution system in a year of record housing starts."

The principal soft spot was the Metals group, they said, but signs of improving sales and a stronger price structure in the depressed brass mill products industry were evident at the end of 1971. Scovill mill operations should also benefit from a soon-to-be completed \$7-1/2 million capital improvement program.

Year-End Awards For Suggestions

\$240 Michael Duhan, New Milford
\$208 Paul Smolinski, Wire Mill
\$120 Joseph Sconziano, Casting;
Dennis McFarlin, Lacquer; Howard Manton, Steam Dept., — a partial award

\$60 Charles Correll, New Milford;
Matthew Kobylinski, Mill Quality Control

\$45 Michael Cicchetti, Forge Tool
\$30.00 Award

Anthony Butnor, Strip Mill
Edward Norman, Millwrights
Robert Bergeron, Rolling Mill
Anthony Mastrofrancesco, Casting
Anthony Milton, Electrical
Robert Dombroski, Strip Mill
Edward Gramigna, Lacquer

\$18.00 Award

Edward Gramigna and Gino Giacobini, Lacquer—a joint award

MEMO *from Management:* "Producerism"

Of the many new words that have come into the English language in recent years, "consumerism" may be the one we hear most often. And with good reason, because every American, all 200 million of us, is some kind of a consumer and each of us deserves a fair shake from the people who make the cars, the houses, the appliances, the sports equipment, and everything else we buy. We want these things to work, to be safe, and to give us our money's worth.

But there are two sides to everything. In this case, the opposite side of "consumerism" is "producerism". Not only are we all consumers, but each of us is some kind of a producer, too. As a company, Scovill, since its very beginning, has been proud of the engineering and manufacturing skills of its people, of the quality of our products, and of our ability to move them at a reasonable price into the nation's market places, and into its homes and factories.

However, as with every other company, Scovill's reputation with consumers, that is—our customers, remains dependent on the pride of accomplishment of our individual producers—each one of us—in our plants and in our offices. As producers, when we make quality products for consumers, each of us can be proud. As consumers, we then would have real cause to expect other people's products to be just as good.

Looking at it the other way around, a producer of second-rate products has no right to complain when, as a consumer he buys second-rate products. Producerism begins at home.

Health Service For Those Over 59

A new service, entitled "Eldicare Laboratories" has been established in Waterbury for the elderly.

Under the auspices of a federal grant, under Title III, the Old American Act, a comprehensive health screening service is available at 166 East Main Street (the old Garden Theatre Building), in Waterbury.

Various general tests for health including heart, lungs, blood work, chest x-rays, eyes, ears and diabetic test work are carried out for a minimal fee of \$5.00. Any elderly person from the age of 60 on can take these examinations.

Should an abnormality be discovered, the results of the tests will be forwarded to the individual's private physician for definitive action.

A regular examination of this type is best assurance of your good health. Take advantage of this service—set your mind at ease regarding your physical condition.

Appointments can be made by calling 756-8929 or 756-8920.

ARTHUR ALGREN left for service in the U.S. Air Force on December 16, 1971. A toolmaker in Gripper Eyelet Tool Room, he has been in Scovill since September, 1967.

Sunshine Fund - 1971

During the year, approximately 128 employees, members of their families, and retired persons were given a helping hand by the Scovill Sunshine Fund. Over \$4400 was used to help cover expenses, as listed below, in cases of serious illness, or some similar difficulty which created a hardship.

Food	\$3,310.00
Rent	525.00
Medical	105.02
Utilities	254.02
Clothing	41.82
Fuel	50.00
Miscellaneous	161.00

The Sunshine Fund is supported by commissions from vending machines located throughout the plant.

The committee which handles the administration of the Fund's activities consists of Chairman E.F. Howes, Dr. R.W. Butler, Anthony Cugno (General Products Div.), Ralph Dad-desio (Metals Div.), Ray Kasidas (General Products Toolroom), Susanna Shell (Press Room) and Amelia Upton (Employee Relations).

Check Exemptions For Withholding

The Revenue Act of 1971 with its changes in the withholding rates and tables has made it necessary for employees to file a new "Employee's Withholding Exemption" (Form W-4) if they wish to claim the new 'special withholding allowance'.

Each single person, and each married person whose spouse is not also employed, may find that they are having more taxes withheld than they are liable for and for this reason are entitled to one "special withholding allowance."

Also, if you itemize your deductions and find that you have a large refund due each year, you may claim additional withholding allowances.

This allowance may not be claimed by either husband or wife when both are employed or by any employee who has two or more concurrent jobs.

The table, for determining number of withholding allowances, is available at any Internal Revenue Service office. Form W-4 is available in our Payroll Department.

Training Course

TOOLMAKER. Fred Gagnon was graduated as of November 29, 1971 as a toolmaker. He has been assigned to the Gripper Eyelet Tool Room.

TOOLMAKER. Ronald Heidorn was graduated as a toolmaker as of January 24, 1972. He has been assigned to the Gripper Eyelet Tool.

TOOLMAKER. Anthony Rubano was graduated as a toolmaker as of December 6, 1971 and has been assigned to the Blanking & Draw Tool.

ELECTRICIAN. John Sturges was graduated as an electrician as of December 6, 1971. He has been assigned to the Electrical Dept., East Plant.

TOOLMAKER. Robert VanderEyck was graduated as a toolmaker as of November 29, 1971, and has been assigned to the Closure Tool Room.

ONE FOR RIPLEY! Scovill guard Daniel Baldino points to area in canal where tire was found. Black lines describe trip tire took after flying off right rear wheel of tanker truck travelling on I-84 above Bridge St. parking lot.

Security Dept. Turns Detective

The tasks of our Security Department are many and varied but a most unusual assignment was given to them recently when they undertook to investigate what appeared to be tire tread marks on a badly dented roof of a car parked in the driveway leading to the assigned section of the Bridge Street parking lot.

On December 17th last, Sandra D'Amelio of the Shipping & Receiving Office, went out as usual to take her car out at lunchtime. Discovering the roof of her Mustang pancaked, she sought out Guard Daniel Baldino. He noted what appeared to be tire tread marks on the roof, but no tire could be seen laying around.

Donning their Sherlock Holmes caps, our Security Department called the Waterbury Police Department; Officer Northrup responded and soon the tire was located in the canal. The mystery deepened as the question arose as to where the tire could have come from. No report was found in the local police headquarters as to a missing tire.

At 3:00 p.m., a concerned citizen, James Quinn of Farmington, (recently moved from California) stopped at the South Hamilton Gate to ask if anyone had contacted us regarding the tire. He said he was following a tanker truck on Route I-84 about 10:45 a.m. when he saw the right rear wheel come off the truck, bounce up on the curb and fly over the fence like a gazelle. Mr. Quinn caught up

with the truck some distance down the road and advised the driver of the lost wheel. The driver was to have come back for it.

Mr. Quinn supplied the marker number and, acting on this information, liaison was established with the Waterbury and State police, bringing a satisfactory solution to the mystery. The truck had originated its journey in New Jersey.

On retracing his route a bit, the truck driver had been unable to locate the area where he lost the wheel. He went to the Waterbury Police Department, telling of his loss and inability to explain just where it had happened.

SERA Plans For Sports Bus Trip

A special bus trip is being arranged for Scovill employees (adults only) to view a basketball game between the Celtics and the Milwaukee Bucs.

James Spann, co-chairman of the SERA Sports Committee, announces that the bus will leave from the SERA on Sunday, February 13th, at 3:00 p.m. allowing ample time for dinner in Boston prior to the game, which starts at 7:30 p.m.

This is bound to be a sell-out, be sure to get your tickets early. They're available at the Employee Activities Office on a first-come, first served basis.

Your Social Security

People 65 and over collecting social security retirement benefits are part of the "fastest growing age group in the population," according to Mr. Ernest D. Bauer, social security district manager in Waterbury.

Census figures show that since 1950 the number of people 65 and over has increased by about 63%—from 12 million to 20 million. The younger population increased 32%.

About 16.8 million now get monthly retirement checks from social security. That includes about 13.6 million retired workers plus dependents in their families.

Not all of these retired workers are over 65, however. Eligible workers can begin collecting social security retirement benefits as early as age 62, although payments are reduced. Full benefits are payable if the worker begins collecting them at 65. Social security retirement benefits now average \$131 a month.

"The very fastest growing age group is the very oldest—75 and over," Mr. Bauer said. "They've almost doubled in number during the past 20 years—from 3.9 million, according to the census." Some 5,250 people who are 100 or over get regular monthly checks from social security—an increase of 61% compared to 1969.

Almost everyone 65 or over has health insurance protection under Medicare. He noted that many people in the 65 and over population are still working. It's not unusual for social security retirement beneficiaries to work at least part of the year.

If a retirement beneficiary earns \$1,680 or less a year, he'll still get his regular check every month. And, no matter how much his earnings add up to for the year, he can be paid a social security check for every month he earns \$140 or less or performs no substantial services in self-employment.

In addition, people 72 or older can collect social security benefits each month regardless of how much they earn.

And, almost everyone 65 or over has health insurance protection under Medicare whether they are retired or still working.

Mr. Bauer noted that it is through social security that younger workers and their families build disability and survivors protection as well as retirement protection.

Retirements

Thomas Pawlowski, shipping room helper in the Rolling Mill, retired as of November 1, 1971—30 years' service.

Renald Ouimet, machinist in General Products Tool Room, retired as of November 22, 1971 with 25 years of service.

Effective December 1, 1971

Julia Boyd, Manufacturing Timekeeper—29 years.

Harold Moore, Supervisor in Sanitation—22.9 years.

Philomena Savino, Set-up clerk in Central Accounting—12 years.

George White, repairman-storekeeper in Plant Services—29.8 years.

Effective January 1, 1972

John Burbank, project engineer in Closure Design—10.7 years.

Eleanor Cadieux, assembler-miscellaneous machines operator in Automotive Assembly—14.8 years.

Albert Ciasullo, TRMO benchwork in Attaching Machines—36 years.

Andrew Dalton, safety equipment specialist, Hospital, 29.5 years.

Merlina DiNapoli, quality control job master in Closure Inspectors—44 years.

Mary Lau, quality control inspector in General Quality Control—29 years' service.

Roger Makepeace, assistant credit manager, Financial Dept.—40 years.

Susan Sacco, quality control inspector in General Quality Control—29 years' service.

Thank You All

As it is impossible for me to personally express the thanks and deep appreciation I feel to all the many friends throughout the Scovill plants who made my retirement party and gift so memorable—I take this opportunity to express my profound gratitude to you all.

Andy Dalton

Vacation Trip

Plans are being formulated for a spring vacation trip (April 27th to May 12th) for interested employees. A planning meeting was scheduled for Monday, January 31st. If you didn't get to the meeting, but are interested in the trip, watch for flyers announcing destination.

RETIREES FETED BY CO-WORKERS

(1) Albert Ciasullo receives warm good wishes of John McAree, foreman of Attaching Machines Dept., while Charles Brickner and William Mitchell, Chief Engineer of Closure Engineering, Res. & Devel., look on.

(2) Andrew Dalton accepts a piece of his "retirement" cake from Nurse Mary Archambault. Dr. Butler smiles his approval.

(3) Susan Sacco cuts her cake, apparently to the satisfaction of Operations Manager Robert Dunn while Quality Control Supervisor Richard Billus' attention is caught elsewhere.

AIR POLLUTION ABATEMENT PROGRAM

Now in operation in the Salvage Department is this huge "Radiator" incinerator which was installed at a cost of \$80,000. as another phase of our air pollution abatement program. Vito Doria is at the controls.

The new "Radiator" operating in the Salvage Dept. is capable of burning 2,000 pounds of waste per hour.

"Trash" coming in from all offices, mills, service and production departments throughout the plant, includes paper, wood, cafeteria waste, etc. Combustibles are sorted out and

burned. The non-combustibles must be disposed of elsewhere.

The new incinerator does such a complete job that only a very fine completely non-toxic residue remains which is amendable to land filling. All smoke and fumes are eliminated.

Girls' Club News

By Irene Owens

A most sincere "thank you" from the Council and everyone receiving Christmas baskets—to all you wonderful people who contributed toys, clothes and other hand-made items for the needy children. They were exceptional gifts and we only wish you could have heard the "oohs" and "aahs"—especially of the children. It really would have done your hearts good.

Our ever popular fashion show is being planned for February 22nd. You'll be getting flyers pretty soon.

Plans are also in the offing for more trips and, as soon as dates, etc. are firmed up, you'll be hearing about them.

It may seem a bit early right now, but won't you give some thoughts to serving on the Council for a year? Election will be in April but a Nominating Committee is being formed and they'll be contacting the women they know to be interested in serving. So, if you would like to serve—and, really, we should have representation from all sections of the plant—please let your nearest Council member—or me—know and we'll pass the word along to the Committee.

Remember, also—we do have a Club room which is available for your use if you have any long range projects to work on in the coming year in arts and crafts. Just call president *Dot Chambers*.

Medicare

A reminder to those covered by Medicare that if they have to go to a hospital this year they will be required to pay the first \$68 of the costs compared with the first \$60 in 1971.

The \$8 boost reflects an increase in hospital costs, say Social Security officials, and is designed to keep the "deductible" in line with the average cost of one day's stay in a hospital. For hospital stays of more than 60 days, the patient will pay \$17 a day, up from \$15 in 1971, for the 61st through the 90th day.

Scovill Group - A. A.

Meetings are held each Sunday at 6:30 p.m. at the SERA.

All employees and members of their immediate families who are now members of A.A., or who have a drinking problem, are invited to attend.

Further information may be had by contacting any member of the Scovill Alcohol Program Committee: Dr. R.W. Butler, Roger Rose, of the Main Hospital, or Employee Relations Manager Emil F. Howes.

DAN LAUGHLIN HONORED BY BROOKLYN YMCA

Midst the happy faces of some of his students, Dan Laughlin receives an assist in displaying the award plaque presented to him by the Brooklyn YMCA for "great leadership and outstanding service."

Dan, a Metals Division salesman in the Rochester Office, is a Black Belt holder himself and has served as judo instructor to youngsters in the Buffalo area for the past several years. He is also coordinating officer between the

U.S. Judo Association and the New York State Judo Federation.

He is presently involved in preparations for the Junior Judo National championship competition to be held in Rochester this coming July.

Obituaries

JOSEPH PROULX died December 16, 1971. Safety Manager—31 years' service.

WILLIAM TURLEY died December 27, 1971. Retired in August, 1961—20 years' service.

GERTRUDE NORTHWAY died December 31, 1971. Retired in May, 1961—23 years' service.

RAMADAN LICH0 died January 3, 1972. Retired in April, 1971—21 years' service.

HELEN FLAVIN died January 6, 1972. Retired in October, 1956—50 years' service.

HUGH BROWN died January 6, 1972. A project engineer at the Scovill Development Center in Thomaston—almost 4 years' service.

EDWARD LAFOND died January 10, 1972. Retired in January, 1968—48 years' service.

ANDREW PODGAESKY died January 10, 1972. Retired in February, 1958—35 years.

P. BENNETT BAILEY died January 13, 1972. Retired, Cincinnati Office, Mills Division, in September, 1968—38 years.

CLEOPHAS ZUKAUSKAS died January 17, 1972. A serviceman in Casting—21 years' service.

FREDERICK PIERPONT died January 18, 1972. Retired in July, 1967—24 years' service.

ALBINO RIBAS died January 23, 1972. Retired, North Mill, in June, 1961—34 years' service.

CHRISTMAS SCENES AT THE SERA

Upper left:— Scovill Local 1604 president Tom Curtin and Employee Relations Manager Emil Howes visit with a group at the Retired Folks Club Annual Christmas party. Right:— Co-chairmen Emma Daffin and Helen Johnson distribute leaflets to one of the groups.

Lower left:— Committee members Dorothy Almeida and Betty Betancourt with some of the fine gifts contributed by employees to the Girls' Club for their Christmas baskets to families who needed a helping hand.

Right:— Entertainment for the Retired Folks party was provided by JoAnn Davino and "The Style Tones"—a Scovill group: Joe Durso of Gen. Products Tool, Bob Montory and Benny Macrelli of Hot Forge.

STUDYING DRUG AND ALCOHOLIC PROBLEMS

Meeting at Scovill recently were members of the Connecticut Association of Alcohol and Drug Problems to discuss and draw up suggestions to present to the Governor's Committee which has the responsibility of disbursing state and federal funds available for such problems.

The Association's In-Put Committee are:— Louis Famiglietti, of UAW Local 1604; Roger Rose, Scovill Counselor, Human Relations; James Car-

roll, Committee Chairman; Dr. Richard E. Nicholson, Conn. Mutual Life Insurance Co.
